Copyright Notice

Acknowledgement

Cincoze is a registered trademark of Cincoze Co., Ltd. All registered trademarks and product names mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

Disclaimer

This manual is intended to be used as a practical and informative guide only and is subject to change without notice. It does not represent a commitment on the part of Cincoze. This product might include unintentional technical or typographical errors. Changes are periodically made to the information herein to correct such errors, and these changes are incorporated into new editions of the publication.

Declaration of Conformity

FCC

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can

radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

CE

The product(s) described in this manual complies with all application European Union (CE) directives if it has a CE marking. For computer systems to remain CE compliant, only CE-compliant parts may be used. Maintaining CE compliance also requires proper cable and cabling techniques.

UL

A product that carries the "UL Listed" approval mark means that the product has been tested by UL to nationally recognized Safety Standards and has been found to be free from reasonably foreseeable risk of fire, electric shock and related hazards.

Product Warranty Statement

Warranty

Cincoze products are warranted by Cincoze Co., Ltd. to be free from defect in materials and workmanship for 2 years from the date of purchase by the original purchaser. During the warranty period, we shall, at our option, either repair or replace any product that proves to be defective under normal operation. Defects, malfunctions, or failures of the warranted product caused by damage resulting from natural disasters (such as by lightening, flood, earthquake, etc.), environmental and atmospheric disturbances, other external forces such as power line disturbances, plugging the board in under power, or incorrect cabling, and damage caused by misuse, abuse, and unauthorized alteration or repair, and the product in question is either software, or an expendable item (such as a fuse, battery, etc.), are not warranted.

RMA

Before sending your product in, you will need to fill in Cincoze RMA Request Form and obtain an RMA number from us. Our staff is available at any time to provide you with the most friendly and immediate service.

■ RMA Instruction

- Customers must fill in Cincoze Return Merchandise Authorization (RMA) Request Form and obtain an RMA number prior to returning a defective product to Cincoze for service.
- Customers must collect all the information about the problems encountered and note anything abnormal and describe the problems on the "Cincoze Service Form" for the RMA number apply process.

- Charges may be incurred for certain repairs. Cincoze will charge for repairs to products whose warranty period has expired. Cincoze will also charge for repairs to products if the damage resulted from acts of God, environmental or atmospheric disturbances, or other external forces through misuse, abuse, or unauthorized alteration or repair. If charges will be incurred for a repair, Cincoze lists all charges, and will wait for customer's approval before performing the repair.
- Customers agree to ensure the product or assume the risk of loss or damage during transit, to prepay shipping charges, and to use the original shipping container or equivalent.
- Customers can be sent back the faulty products with or without accessories (manuals, cable, etc.) and any components from the system. If the components were suspected as part of the problems, please note clearly which components are included. Otherwise, Cincoze is not responsible for the devices/parts.
- Repaired items will be shipped along with a "Repair Report" detailing the findings and actions taken.

Limitation of Liability

Cincoze' liability arising out of the manufacture, sale, or supplying of the product and its use, whether based on warranty, contract, negligence, product liability, or otherwise, shall not exceed the original selling price of the product. The remedies provided herein are the customer's sole and exclusive remedies. In no event shall Cincoze be liable for direct, indirect, special or consequential damages whether based on contract of any other legal theory.

Technical Support and Assistance

1. Visit the Cincoze website at www.cincoze.com where you can find the latest information about the product.
2. Contact your distributor, our technical support team or sales representative for technical support if you need additional assistance. Please have following information ready before you call:
   - Product name and serial number
   - Description of your peripheral attachments
   - Description of your software (operating system, version, application software, etc.)
   - A complete description of the problem
   - The exact wording of any error messages

Conventions Used in this Manual

⚠	WARNING (AVERTIR)	**This indication alerts operators to an operation that, if not strictly observed, may result in severe injury.** **(Cette indication avertit les opérateurs d'une opération qui, si elle n'est pas strictement observée, peut entraîner des blessures graves.)**
CAUTION	CAUTION (ATTENTION)	**This indication alerts operators to an operation that, if not strictly observed, may result in safety hazards to personnel or damage to equipment.** **(Cette indication avertit les opérateurs d'une opération qui, si elle n'est pas strictement observée, peut entraîner des risques pour la sécurité du personnel ou des dommages à l'équipement.)**
✓ Notes	NOTE (NOTE)	**This indication provides additional information to complete a task easily.** **(Cette indication fournit des informations supplémentaires pour effectuer facilement une tâche.)**

Safety Precautions

Before installing and using this device, please note the following precautions.
1. Read these safety instructions carefully.
2. Keep this User's Manual for future reference.
3. Disconnected this equipment from any AC outlet before cleaning.
4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a reliable surface during installation. Dropping it or letting it fall may cause damage.
7. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
8. Use a power cord that has been approved for using with the product and that it matches the voltage and current marked on the product's electrical range label. The voltage and current rating of the cord must be greater than the voltage and current rating marked on the product.
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.
12. Never pour any liquid into an opening. This may cause fire or electrical shock.
13. Never open the equipment. For safety reasons, the equipment should be opened only by

qualified service personnel.

If one of the following situations arises, get the equipment checked by service personnel:

- The power cord or plug is damaged.
- Liquid has penetrated into the equipment.
- The equipment has been exposed to moisture.
- The equipment does not work well, or you cannot get it work according to the user's manual.
- The equipment has been dropped and damaged.
- The equipment has obvious signs of breakage.

14. CAUTION: Risk of Explosion if Battery is replaced by an Incorrect Type. Dispose of Used Batteries According to the Instructions.

   ATTENTION : Risque d'explosion si la batterie est remplacée par un type incorrect. Mettre au rebus les batteries usagées selon les instructions.

15. Equipment intended only for use in a RESTRICTED ACCESS AREA.

16. Output of the external power source shall be complied with ES1, PS3 requirements, output rating between 9-48 VDC, minimum 6-1.5A, with minimum rated maximum ambient temperature 70°C, and has to be evaluated according to UL/IEC/EN 60950-1 and/or UL/IEC/EN 62368-1. If need further assistance, please contact Cincoze for further information.

17. Ensure to connect the power cord of power adapter to a socket-outlet with earthing connection.

18. Dispose of used battery promptly. Keep away from children. Do not disassemble and do not dispose of in fire.

Package Contents

Before installation, please ensure all the items listed in the following table are included in the package.

Item	Description	Q'ty
1	P2202 / P2202E Embedded Computer	1
2	Thermal Pad (for CPU Thermal Block)	1
3	Power Terminal Block Connector	1
4	Remote Power On/Off Terminal Block Connector	1
5	DIO Terminal Block Connector	2
6	Screws Pack	5
7	Wall Mounting Kit	1
8	DIN Rail Mounting Kit	1
9	PCI / PCIe Card Installation Kit (For P2202E Only)	1

Note: Notify your sales representative if any of the above items are missing or damaged.

Ordering Information

Model No.	Product Description
P2202-i5-R10	12th Gen. Intel® Core™ i5-1245UE Slim Embedded Computer with CDS Technology
P2202E-i5-R10	12th Gen. Intel® Core™ i5-1245UE Expandable Embedded Computer with CDS Technology
P2202-i3-R10	12th Gen. Intel® Core™ i3-1215UE Slim Embedded Computer with CDS Technology
P2202E-i3-R10	12th Gen. Intel® Core™ i3-1215UE Expandable Embedded Computer with CDS Technology

Chapter 1
Product Introductions

1.1 Overview

The P2202 series are ultra-slim high-performance embedded computers designed for industrial IoT edge computing. High-performance and flexible expansion are the standout features, with rich native I/O interfaces, Mini PCIe and M.2 Key E Type 2230 expansion slots, and PCIe expansion (Model: P2202E). The thinnest model is only 41.5 mm, a perfect fit for installation in small spaces.

The main highlight of the P2202 series is the 12th Gen Intel® (Alder Lake-P) processors. The P2202 series can be used as a standalone embedded computer or, by using the exclusive CDS patented technology to connect a display module, used as an industrial panel PC, sunlight readable panel PC, or open frame panel PC to meet any display computing needs.

- Onboard Intel® Alder Lake-P U-Series Core™ Processor

- 2 x DDR5 SO-DIMM Socket, Supports up to 4800MHz 64GB Memory

- Quad Independent Display (CDS / HDMI / DP / VGA)

- 1x M.2 Key E Type 2230 Socket for Intel CNVi / Wireless Module

- Supports Cincoze Patent CDS Technology (Patent No. M482908)

- CFM Technology for Power Ignition Sensing & PoE Function

- Wide Operating Temperature -40°C to 70°C

- EMC Emission / Immunity Standard for Industrial Environment: EN61000-6-4, EN61000-6-2

AI & Multi-tasking Performance

The P2202 series is equipped with the 12th Gen Intel® Core™ i5/i3 U-series (Alder Lake-P) processor based on the Intel® 7 process. The U-series has a low power consumption of only 15W, boasts excellent performance with up to 10 cores (2P+8E), and includes the built-in Intel® Iris Xe graphics to easily handle image classification inference performance in AI deep learning.

i5 Processor

12th Gen Alder Lake i5-1245UE **+2.23X**

8th Gen. Whiskey i5-8365UE

i3 Processor

12th Gen Alder Lake i3-1215UE **+1.62X**

8th Gen. Whiskey i3-8145UE

Slim Design

For Space-constrained Environments

The P2202 series has a compact, ultra-thin design with dimensions of only 254.5 x 190 x 41.5 mm (Model: P2202), allowing flexible installation in various narrow application environments such as equipment machines, control cabinets, or AMRs. They are suitable for production data collection and processing in smart factories and mobile equipment.

41.5 mm
190 mm
254.5 mm

One Computer / Two Purposes

The P2202 series is not only an embedded computer. Using the Cincoze patented Convertible Display System technology an industrial display module (CV-100 series), sunlight readable display module (CS-100), or open frame display module (CO-100) can be added to form panel PCs with different characteristics.

Patent No. M482908

Flexible Expansion For Any Application

Mini PCIe and M.2 Key E slots can support a variety of wireless connections (WiFi, 4G, GNSS, and Bluetooth), providing a full range of data transmission options for mobile devices. The PCIe x4 slot (P2202E model only) can accommodate 75W add-on cards (I/O expansion cards, frame grabber cards, and others). The P2202 series meets different application needs with its diverse expandability.

Industrial EMC Protection

To enhance stability when installed in high-vibration equipment control cabinets and mobile robots, the P2202 series has passed different vibration and shock reliability tests, such as random vibration (5G), sinusoidal vibration (1G), and shock resistance (50G). It also complies with the industrial-grade EMC standards for industrial environments (EN 61000-6-4 and EN 61000-6-2).

IEC 60068

EN 61000-6

1.2 Specifications

| Model Name	P2202	P2202E
System		
Processor	• Onboard 12th Generation Intel® Alder Lake-P U-Series CPU: - Intel® Core™ i5-1245UE 10 Cores Up to 4.40 GHz, TDP 15W - Intel® Core™ i3-1215UE 6 Cores Up to 4.40 GHz, TDP 15W	
Memory	• 2x DDR5 4800MHz SO-DIMM Socket Supports Un-buffered and non-ECC Type, Up to 64GB	
BIOS	• AMI BIOS	
Graphics		
Graphics Engine	• Integrated Intel® Iris® Xe Graphics: Core™ i5-1245UE • Integrated Intel® UHD Graphics: Core™ i3-1215UE	
Maximum Display Output	• Supports Quad Independent Display	
CDS	• 1x CDS Connector (1920 x 1080 @60Hz)	
DP	• 1x DisplayPort Connector (4096 x 2304 @60Hz) * Verified maximum resolution: 3840 x 2160 @ 60Hz	
HDMI	• 1x HDMI Connector (3840 x 2160 @30Hz)	
VGA	• 1x VGA Connector (1920 x 1200 @60Hz)	
Audio		
Audio Codec	• Realtek® ALC888, High Definition Audio	
Line-out	• 1x Line-out, Phone Jack 3.5mm	
Mic-in	• 1x Mic-in, Phone Jack 3.5mm	
I/O		
LAN	• 2x 1GbE LAN, RJ45 - GbE1: Intel® I219 - GbE2: Intel® I210	
COM	• 4x RS-232/422/485 with Auto Flow Control (Supports 5V/12V), DB9	
USB	• 3x 10Gbps USB 3.2 Gen2x1, Type A • 1x 480Mbps USB 2.0, Type A	
DIO	• 16x Isolated Digital I/O (8in/8out), 20-Pin Terminal Block	
Storage		
SSD/HDD	• 2x 2.5" SATA HDD/SSD Bay (SATA3.0)	
RAID	• Support RAID 0/1	
Expansion		
Mini PCI Express	• 2x Full-size Mini-PCIe Socket	
PCI Express	--	• 1x PCI or 1x PCIe x4 Expansion slot (with Optional Riser Card) * Supports maximum dimensions of

		add-on card (H x L):169 x 111mm
SIM Socket	• 1x SIM Socket	
M.2	• 1x M.2 Key E Type 2230 Socket, Support Intel CNVi/Wireless Module	
CFM (Control Function Module) Interface	• 1x CFM Interface for optional IGN Module Expansion • 1x CFM Interface for optional PoE Module Expansion	
CDS (Convertible Display System) Interface	• 1x CDS Interface for Convertible Display Module	
Other Function		
Clear CMOS Switch	• 1x Clear CMOS Switch	
Reset Button	• 1x Reset Button	
Instant Reboot	• Support 0.2sec Instant Reboot Technology	
Watchdog Timer	• Software Programmable Supports 256 Levels System Reset	
OSD Button	• LCD On/Off, Brightness Up, Brightness Down	
Internal Speaker	• AMP 2W + 2W	
Status LED Indicator	• Power LED, HDD LED	
Power		
Power Button	• 1x ATX Power On/Off Button	
Power Mode Switch	• 1x AT/ATX Mode Switch	
Power Input	• 9 - 48VDC, 3-pin Terminal Block	
Remote Power On/Off	• 1x Remote Power On/Off, 2-pin Terminal Block	
Operating System		
Windows	• Windows®11, Windows®10	
Linux	• Ubuntu 22.04	
Physical		
Dimension (W x D x H)	• 254.5 X 190 X 41.5 mm	• 254.5 x 190 x 61 mm
Weight Information	• 2.22 kg	• 2.74 kg
Mechanical Construction	• Extruded Aluminum with Heavy Duty Metal	
Mounting	• Wall / VESA / CDS / DIN Rail	
Physical Design	• Fanless Design • Jumper-less Design	
Reliability & Protection		
Reverse Power Input Protection	• Yes	
Over Voltage Protection	• Protection Range: 51-58V • Protection Type: shut down operating voltage, re-power on at the present level to recover	
Over Current Protection	• 15A	
CMOS Battery Backup	• SuperCap Integrated for CMOS Battery Maintenance-free Operation	
MTBF	• 216,747 Hours - Database: Telcordia SR-332 Issue3, Method 1, Case 3	
Environment		

Operating Temperature	• -40°C to 70°C - With extended temperature peripherals; Ambient with air flow - According to IEC60068-2-1, IEC60068-2-2, IEC60068-2-14
Storage Temperature	• -40°C to 70°C
Relative Humidity	• 95%RH @ 70°C (non-Condensing)
Shock	• Operating, 50 Grms (w/ SSD, according to IEC60068-2-27)
Vibration	• Operating, 1 Grms, 10-500 Hz, 3 Axes (w/ SSD, according to IEC60068-2-6) • Operating, 5 Grms, 5-500 Hz, 3 Axes (w/ SSD, according to IEC60068-2-64)
EMC	• CE, UKCA, FCC, ICES-003 Class A • EN IEC 61000-6-4, EN61000-6-2 (24VDC Input Only)
EMI	• CISPR 32 Conducted & Radiated: Class A • EN/BS EN 55032 Conducted & Radiated: Class A • EN/BS EN IEC 61000-3-2 Harmonic current emissions: Class A • EN/BS EN61000-3-3 Voltage fluctuations & flicker • FCC 47 CFR Part 15B, ICES-003 Conducted & Radiated: Class A
EMS	• EN/IEC 61000-4-2 ESD: Contact: 4 kV; Air: 8 kV • EN/IEC 61000-4-3 RS: 80 MHz to 1000 MHz: 10 V/m • EN/IEC 61000-4-4 EFT: AC Power: 2 kV; DC Power: 1 kV; Signal: 1 kV • EN/IEC 61000-4-5 Surges: AC Power: 2 kV; Signal: 1 kV • EN/IEC 61000-4-6 CS: 10V • EN/IEC 61000-4-8 PFMF: 50 Hz, 30A/m • EN/IEC 61000-4-11 Voltage Dips & Voltage Interruptions: 1 cycles at 60 Hz
Safety	• uL, cUL, CB, IEC, EN 62368-1

2.5 Optional Module Pin Definition & Settings

2.5.1 CFM-IGN101 Module

SW2 (on CFM-IGN101)：IGN Module Timing Setting Switch

Set shutdown delay timer when ACC is turned off

Pin 1	Pin 2	Pin 3	Pin 4	Definition
ON (IGN Enabled) / OFF (IGN Disabled)	ON	ON	ON	0 second
	ON	ON	OFF	1 minute
	ON	OFF	ON	5 minutes
	ON	OFF	OFF	10 minutes
	OFF	ON	ON	30 minutes
	OFF	ON	OFF	1 hour
	OFF	OFF	ON	2 hours
	OFF	OFF	OFF	Reserved (0 second)
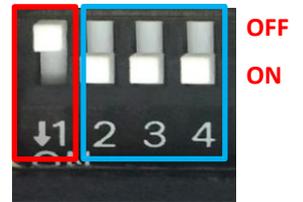

Default setting of Pin1 to Pin4 is OFF/ON/ON/ON.

24V_12V_1 (on the system)：IGN Module Voltage Mode Setting Switch

12V / 24V Car Battery Switch

Switch	Definition
Left	24V Car Battery Input (Default)
Right	12V Car Battery Input

Chapter 3
System Setup

This chapter uses P2202 as an example to illustrate the installation of hardware components, with the exception of Chapter 3.6 and 3.17 (which demonstrates the installation of P2202E).

3.1 Removing the Top Cover

⚠	WARNING (AVERTIR)	In order to prevent electric shock or system damage, must turn off power and disconnect the unit from power source before removing the chassis cover. (Afin d'éviter tout risque d'électrocution ou d'endommagement du système, vous devez couper l'alimentation et débrancher l'appareil de la source d'alimentation avant de retirer le couvercle du châssis.)

Step 1. Loosen the eight screws at front and rear panel

Step 2. Raise the top cover and remove it from the chassis.

Step 3. Place the top cover aside gently.
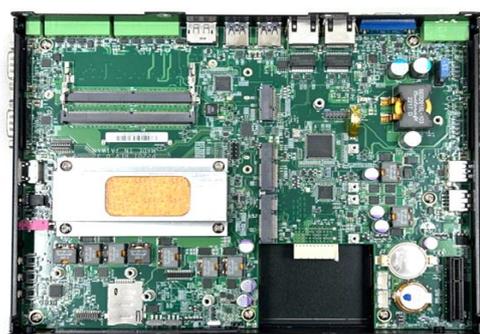

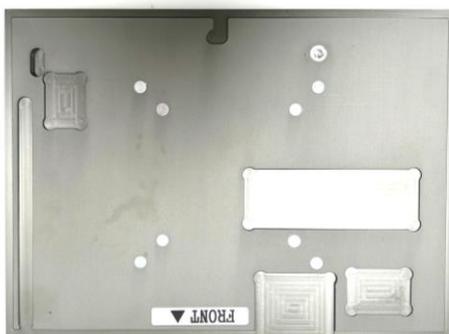

3.2 Installing Mini PCIe Card(s)

Step 1. Locate Mini PCIe sockets on the system board.
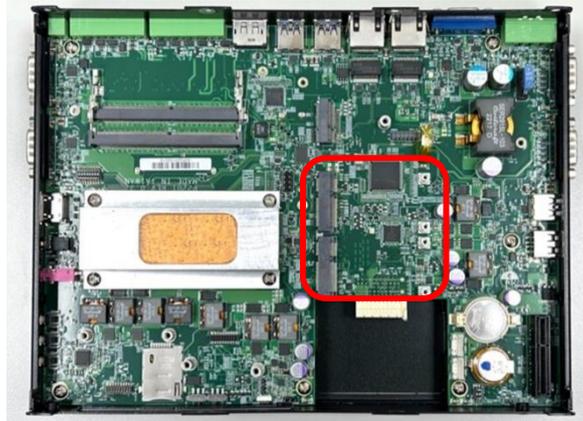

Step 2. Use provided two screws fasten the half size module and adapter bracket together as shown in Fig (a) below.

(a) Half Size Mini-PCIe Card   (b) Full Size Mini-PCIe Card

Step 3. Tilt the Mini PCIe card at a 45-degree angle and insert it into the socket until the golden finger connector of the card seated firmly.

Step 4. Press down the card and secure it with two screws.

3.3 Installing a M.2 E Key Card

Step 1. Locate the M.2 E Key socket on the system board.
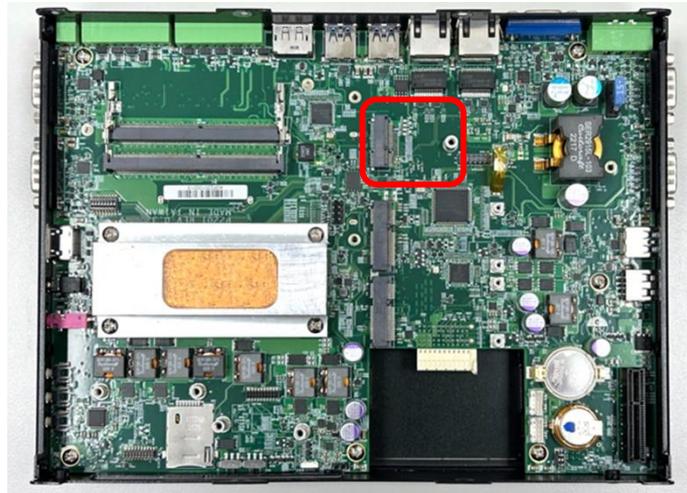

Step 2. Tilt the M.2 E Key card at a 45-degree angle and insert it to the socket until the golden finger connector of the card seated firmly.
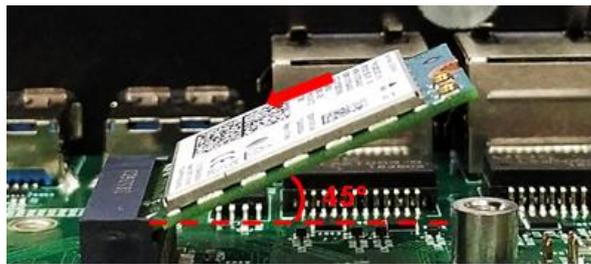

Step 3. Press the card down and secure it with 1 screw.

3.4 Installing Antenna(s)

Step 1. Remove the antenna rubber cover on either the front, left, or right panel of the system. (The front panel will be used for this example.)

Step 2. Penetrate the antenna jack through the hole. And then put on the washer and fasten the nut with antenna jack.

Step 3. Assemble the antenna and antenna jack together.

Step 4. Attach the RF connector at another end of the cable onto the card.
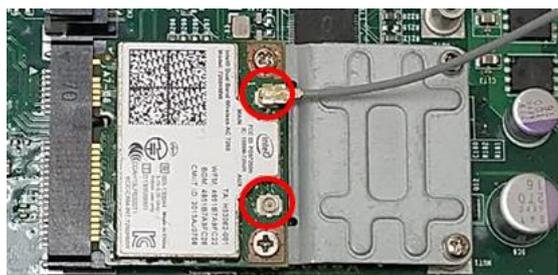

3.5 Installing SO-DIMM(s)

Step 1. Locate the SO-DIMM socket on the system board.
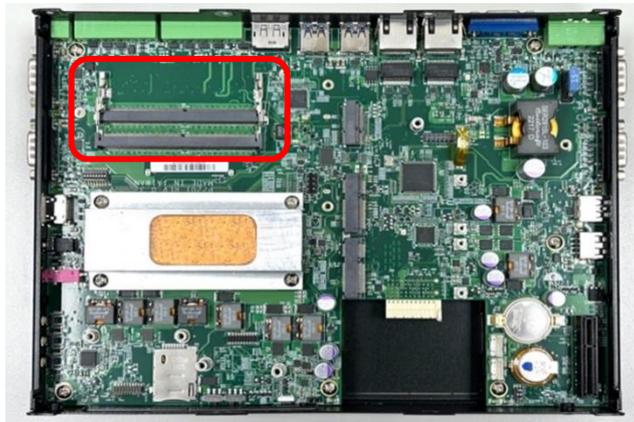

Step 2. Tilt the memory module at a 45-degree angle, and insert it into SO-DIMM socket until the golden finger connector of the module is seated firmly.

Lower socket
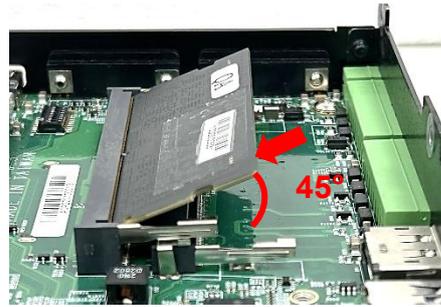

Upper socket

Step 3. Press down the memory module until retaining clips snap back in place.

Lower socket

Upper socket

3.6 Installing a PCI(e) Card

This chapter takes P2202E for example to demonstrate the installation steps.

Step 1. Loosen the two screws as indicated at rear panel.

Step 2. Attach the PCI / PCIe Card Installation Kit on, and fasten the two screws back on rear panel to fix the Kit.

Step 3. Loosen the screw as indicated to remove the PCI bracket.

Step 4. Align the notch of golden fingers of Riser card (Optional) with the slot. Insert the card vertically, and press the card straight down into the slot until it's seated firmly.

Step 5. Align the notch of golden fingers of PCI(e) card with the expansion slot. Insert the card horizontally, and press the card straight down into the slot until it's seated firmly.
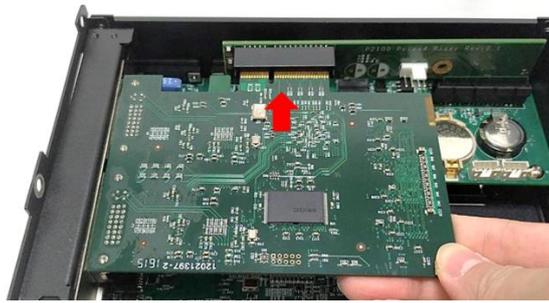

Step 6. Fasten the screw back to secure the PCI(e) expansion card.

Step 7. Loosen the two screws as indicated to have the clamp arm slidable.
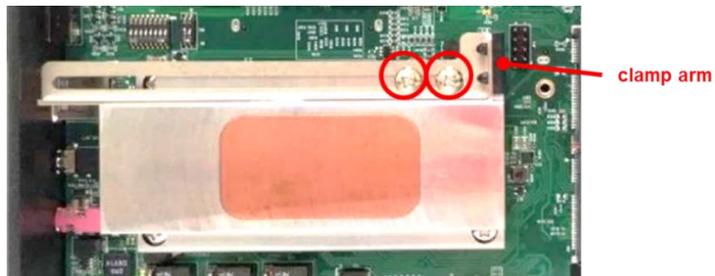

Step 8. Slide the clamp arm of retention module until it contacts the edge of PCI(e) expansion card.
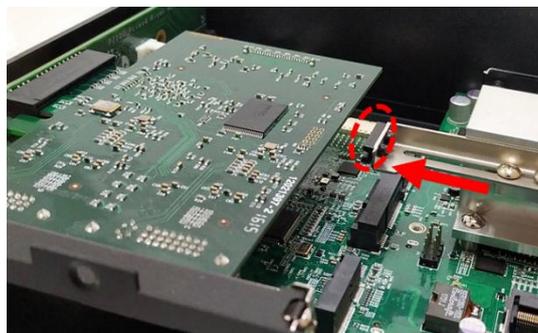

Step 9. Finally, fasten the two screws that were previously loosen halfway to fix the retention module.
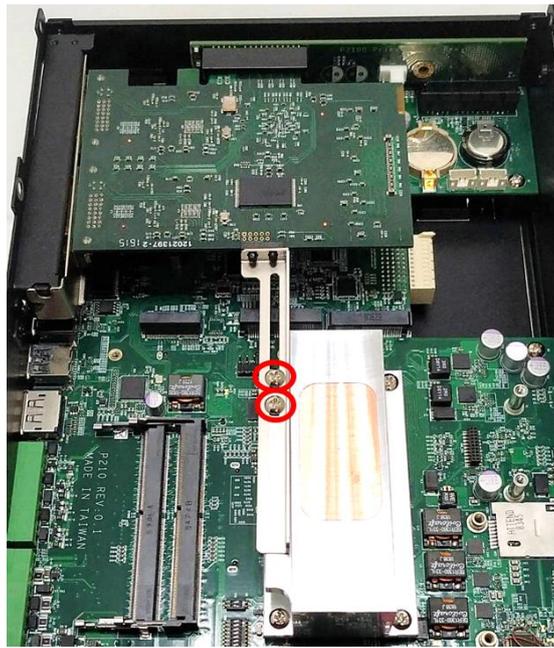

3.7 Installing Thermal Pad of Thermal Block

Step 1. Place thermal pad on the top of CPU thermal block in order to provide a seamless contact with the body of chassis to create an efficient heat dissipation.
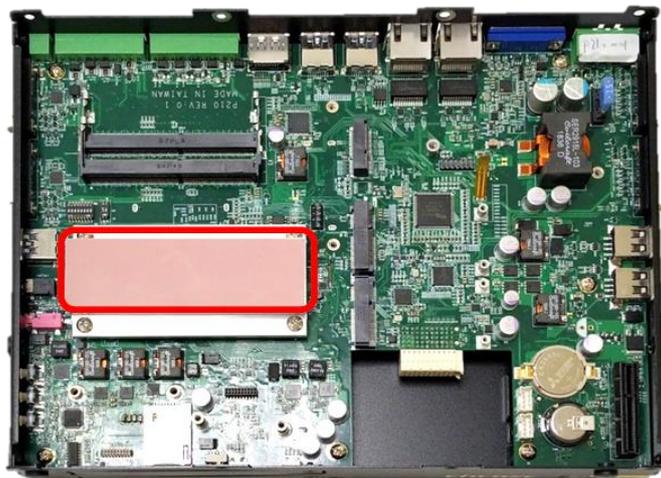

⚠ CAUTION	CAUTION (ATTENTION)	**Before assembling the system's chassis cover, please make sure the protective film on the Thermal Pad has been removed!** **(Avant d'assembler le capot du châssis du système, assurez-vous que le film protecteur du coussin thermique a été retiré !)**

3.8 Installing the Top Cover

Step 1. Put on the edge of top cover onto system, and the other side subsequently.

Step 2. Fasten the eight screws at front and rear panel to secure the top cover.

3.9 Installing a SATA Hard Drive at Front Panel

Step 1. Loosen the screw to remove the HDD bay cover bracket.

Step 2. Loosen the screw as indicated on the HDD bracket.

Step 3. Pull the rotating arm of HDD bracket outward as indicated.

Step 4. Hold the rotating arm to pull out the HDD bracket.

Step 5. Place the HDD bracket on screw-hole side of HDD. Use four screws provided to assemble HDD on the bracket.

Step 6. Align the HDD bracket with the entrance of HDD bay. And insert the HDD bracket and push it until the edge connector of HDD fully inserted into SATA slot.

Step 7. Fasten the screw as indicated on the HDD bracket.

Step 8. Put back HDD bay cover at front panel, and fasten it with the screw.

3.10 Installing a SATA hard drive on Bottom Side

Step 1. Turn over the system to bottom side. Locate the cover of HDD compartment.
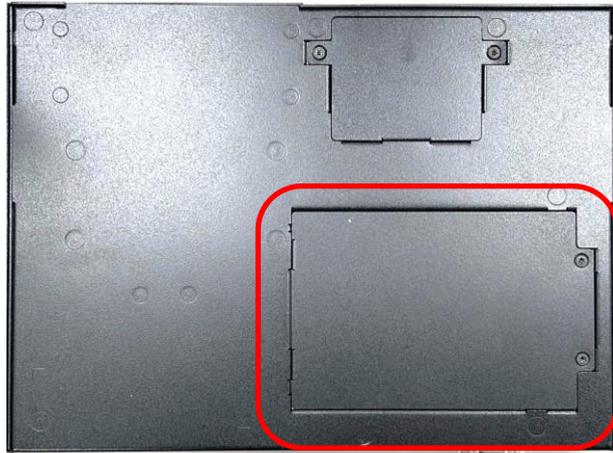

Step 2. Loosen the two screws, lift the cover, and then remove it.
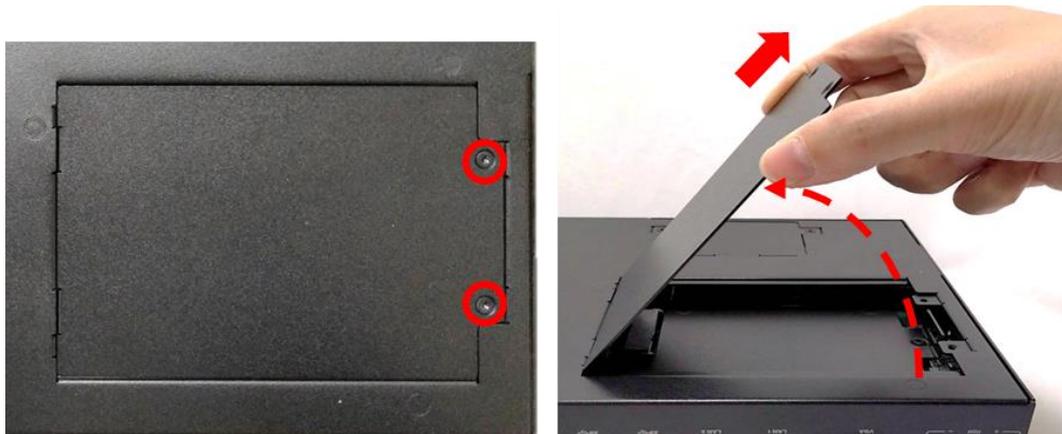

Step 3. Loosen three screws and take the HDD bracket out of HDD compartment.
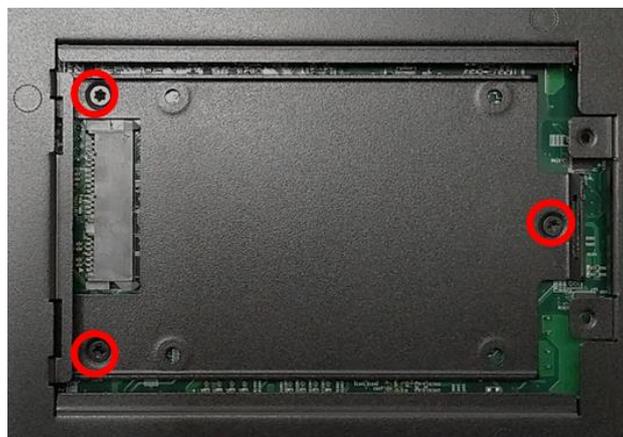

Step 4. Place the HDD bracket on screw-hole side of HDD. Use four screws provided to assemble HDD on the bracket.
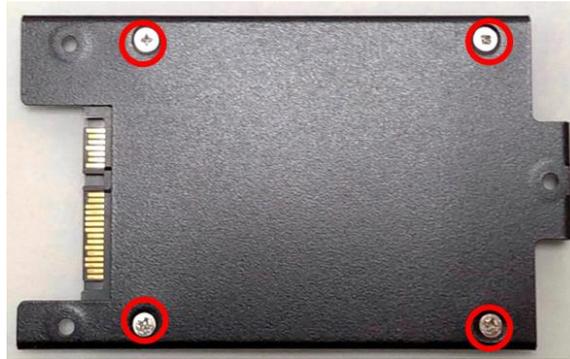

Step 5. Seat the HDD bracket into HDD compartment, and line up the connector of HDD with SATA slot, then push it until HDD is fully connected into slot.

Step 6. Secure the HDD bracket with three screws.

Step 7. Put back the cover and fasten the two screws.

3.11 Installing a SIM Card

Step 1. Loosen the screw to remove the Maintenance cover bracket.

Step 2. Locate the SIM card slot.

Step 3. Insert the SIM card.

3.12 Installing the Wall Mount

Step 1. Prepare wall mount kit (two wall brackets and one screw pack with each screw size of M3-0.5x5) that came with the P2202. De-attach six rubber holes from the mounting brackets as indicated.

Step 2. Remove the six screws at left and right panel.

Step 3. Assemble two wall mount brackets by fastening six screws from the screws pack.

Step 4. Attach the P2202 to wall by fastening screws through mounting holes at each side as illustrated.

3.13 Connecting with a Display Module

Step 1. Please refer to Chapter 3.12 to install wall mounting brackets on both sides of the system, and then flip the system over to its underside. Here, you will find the connector cover for the display module.
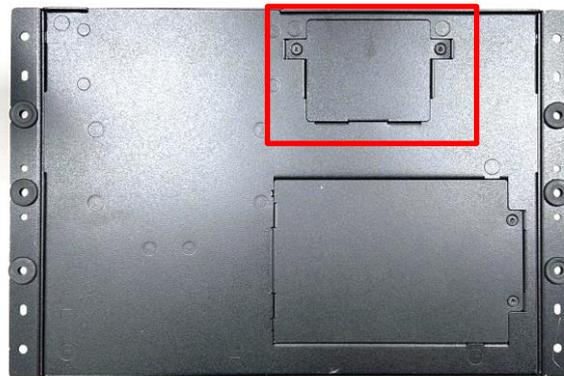

Step 2. Loosen two screws to remove the cover.
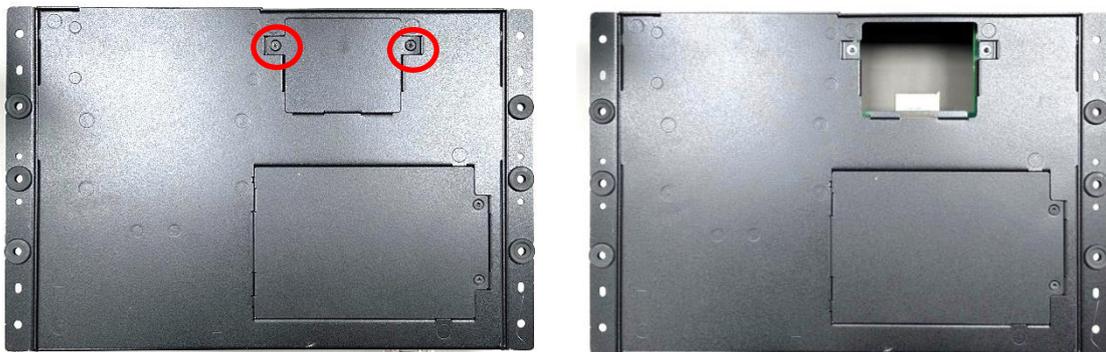

Step 3. Locate the male connector on the display module.

Step 4. Place the P2202 on the display module through its display connector hole as indicated.

Step 5. Align the mounting holes of P2202 with the screw holes of display module underneath. Slide the P2202 until it and the display module connected together, and then fasten six screws to secure P2202 on the display module.
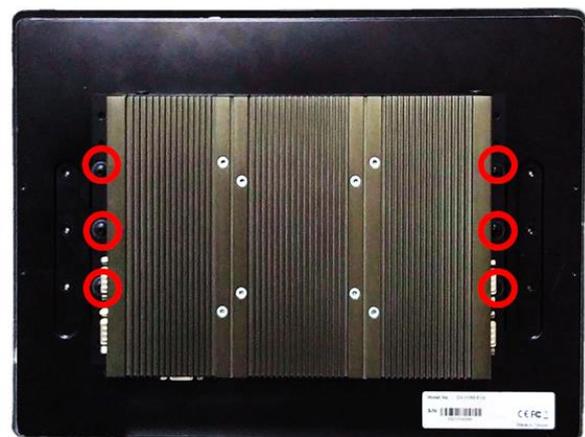

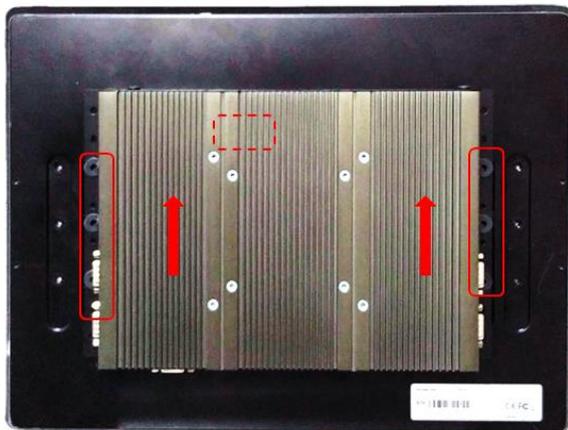

3.14 Installing DIN-Rail Mount Brackets

P2202 series offers DIN-Rail Mount that customer can install system on the DIN Rail.

Step 1. Please refer to Chapter 3.12 to install wall mounting brackets on both sides of the system, and then remove the middle rubber bands as demonstrated below.
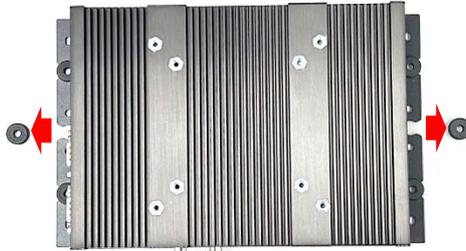

Step 2. Fasten 2 DIN rail mounting clips to mounting brackets on both sides with provided 4 screws (with each screw size of T3x10.5) as illustrated.

Step 3. Clip the system into DIN rail as illustrated by the following steps. (1) Have upper end of mounting clip snaps into the DIN rail. (2) Press the system toward to have lower end of mounting clip snaps into the other side of DIN rail.

3.15 Installing the VESA Mount

The following picture indicates VESA mounting hole pattern on the P2202, which is compliant with VESA mounting standard.
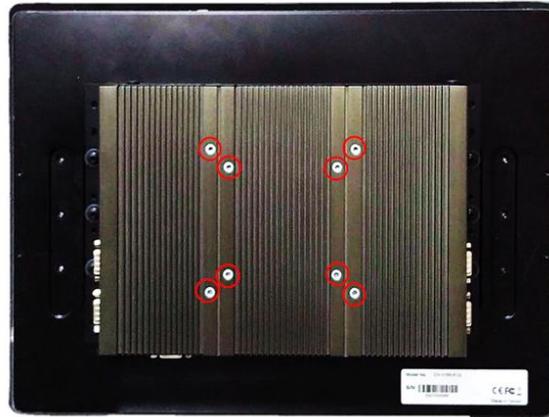

Step 1. The following picture uses a panel PC (P2202+ Display Module) as a demonstration. To attach the panel PC to a VESA stand, please fasten eight screws as indicated to fix it on the stand. (Please refer to section 3.13 in this manual for how to connect P2202 with a display module.)

Panel PC: P2202+ Display Module

VESA Stand

3.16 Installing CFM Modules

3.16.1 CFM-IGN101 Module

Step 1. Locate the power Ignition connector on system motherboard as indicated.
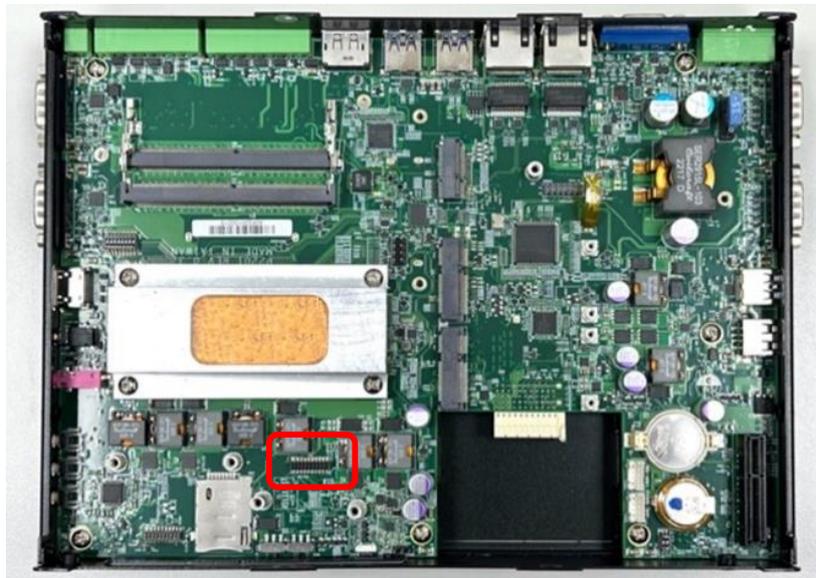

Step 2. Insert the female connector of power ignition board to the male connector on system motherboard.
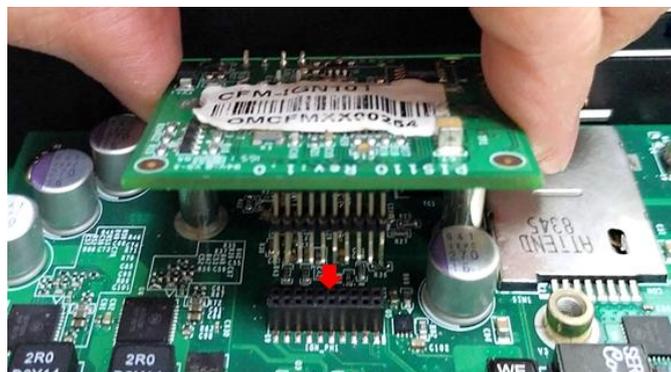

Step 3. Fasten two screws to secure the power ignition board.

3.16.2 CFM-PoE04 Module

Step 1. Place a thermal pad on the top of the heatsink, and locate the two regions as marked.

Step 2. Turn over the heatsink and paste the thermal pad at the marked region.
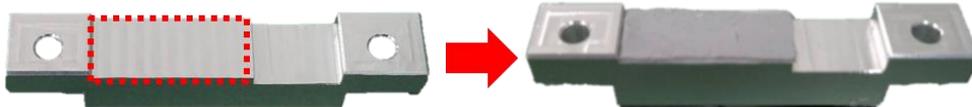

<table>
<tr><td>⚠️ CAUTION</td><td>CAUTION (ATTENTION)</td><td>**Before putting on the thermal block, please make sure the protective film on the Thermal Pad has been removed!**
(Avant de mettre le bloc thermique, veuillez vous assurer que le film protecteur sur le coussin thermique a été retiré!)</td></tr>
</table>

Step 3. Paste the thermal pad onto the coil of the CFM-PoE module.
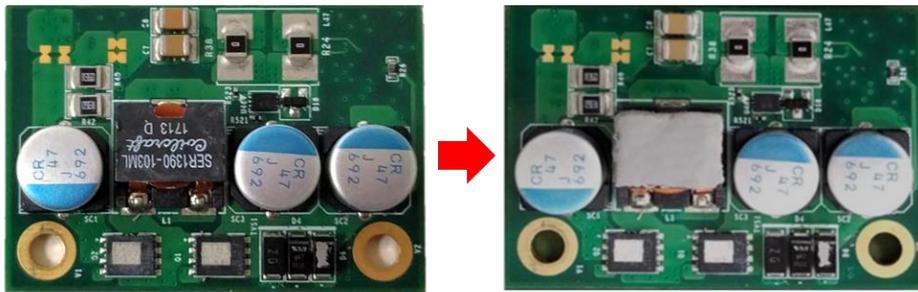

Step 4. Locate the PoE connector on system motherboard as indicated.
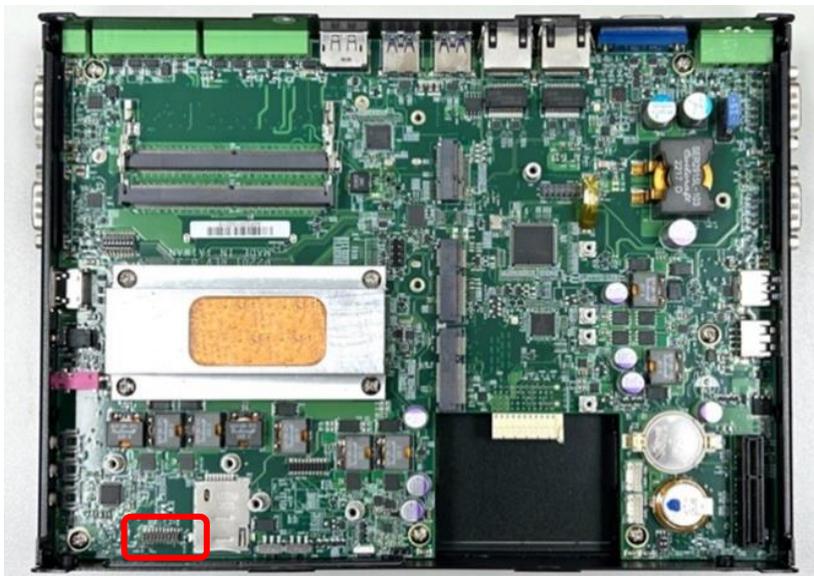

Step 5. Insert the female connector of PoE daughter board to the male connector on system motherboard.
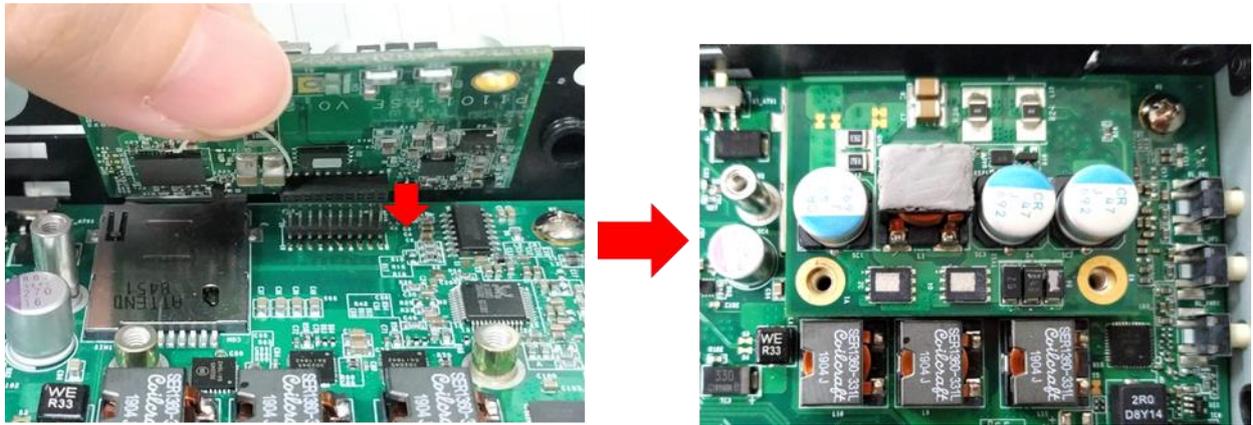

Step 6. Put on the PoE thermal block and fasten two screws to secure the PoE board.
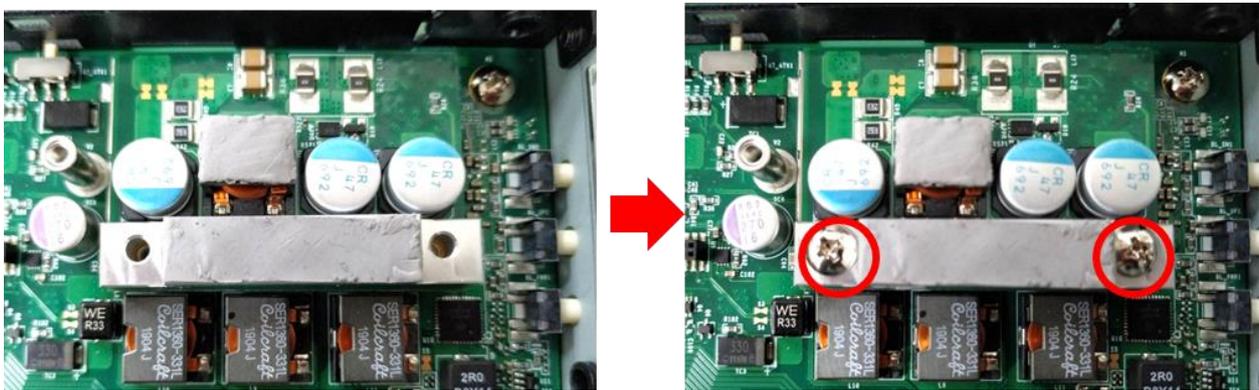

CAUTION	CAUTION (ATTENTION)	**Before assembling the system's chassis cover, please make sure the protective films on the Thermal Pads have been removed!** **(Avant d'assembler le capot du châssis du système, assurez-vous que les films de protection sur les coussinets thermiques ont été retirés !)**

3.17 Installing MEC Modules

This chapter takes P2202E for example to demonstrate the installation steps.

3.17.1 MEC-COM-M212-TDB9/UB1203 Module

Step 1. Loosen 2 screws on the cover plate of number 1 or 2 and then remove it. In the following steps, we use cover plate 1 for example. (You can install two MEC-USB modules for system P2202E. We only use one MEC-USB module for the example.)

Step 2. Locate one of the Mini PCIe sockets on the bottom side of the system.
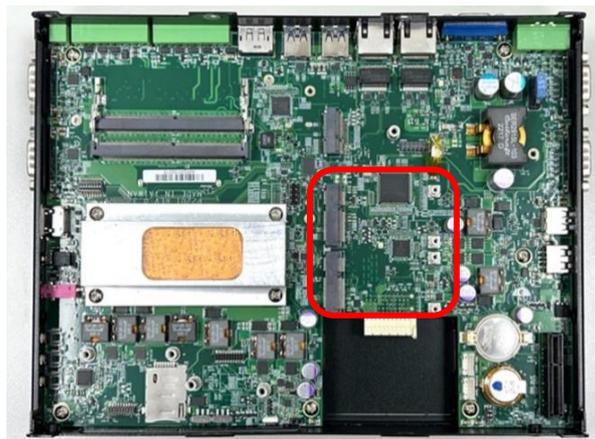

Step 3. Tilt the Mini PCIe card at a 45-degree angle and insert it to the socket until the golden finger connector of the card seated firmly.

Step 4. Press the card down and secure it with 2 screws.
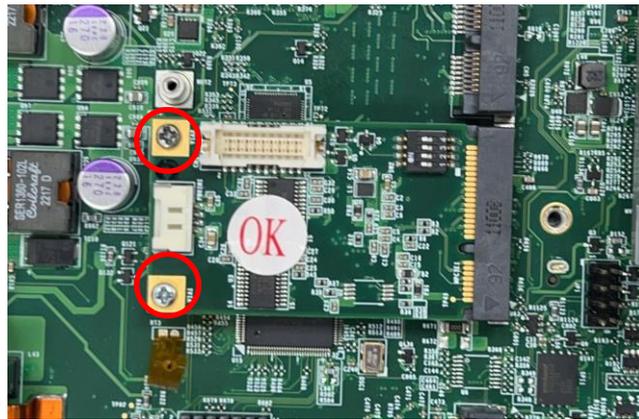

Step 5. Remove the 4 D-Sub jack screws from the COM ports.
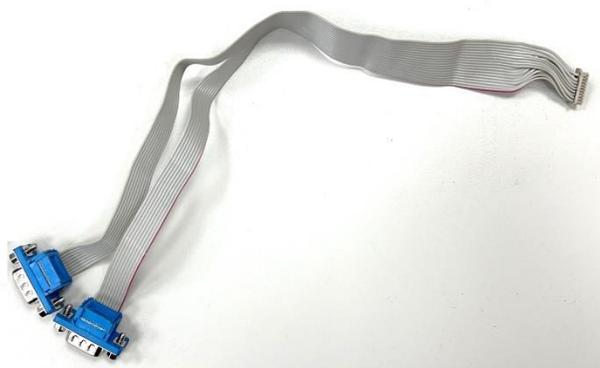

Step 6. Connect the other end of the wire to the Mini PCIe card as indicated.
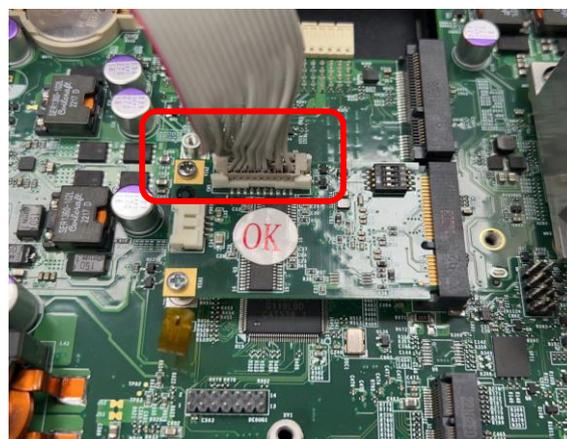

Step 7. Attach the COM ports onto the back side of the cover plates, and then fasten the 4 D-Sub jack screws to secure the COM ports.
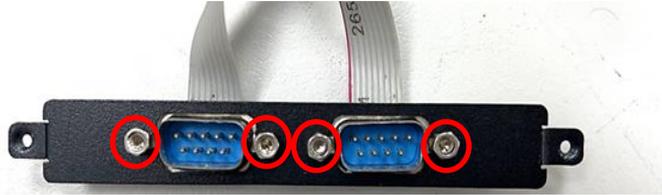

Step 8. Attach the MEC-COM bracket, and fasten the 2 screws to fix it as indicated.

3.17.2 MEC-COM-M334-TDB9/UB1203 Module

Step 1. Loosen 2 screws on the cover plate of number 1 or 2 and then remove it. In the following steps, we use cover plate 1 for example. (You can install two MEC-USB modules for system P2202E)

Step 2. Locate one of the Mini PCIe sockets on the bottom side of the system.
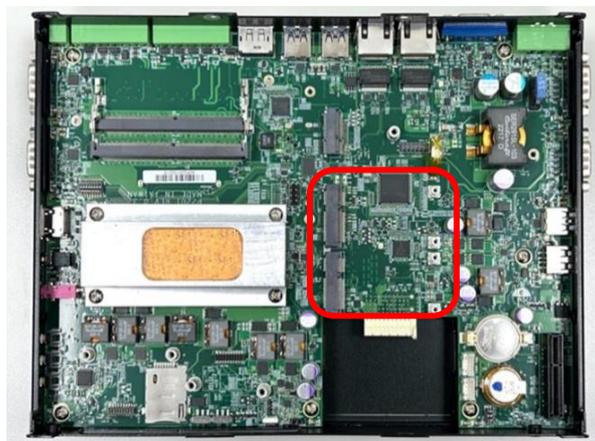

Step 3. Tilt the Mini PCIe card at a 45-degree angle and insert it to the socket until the golden finger connector of the card seated firmly.
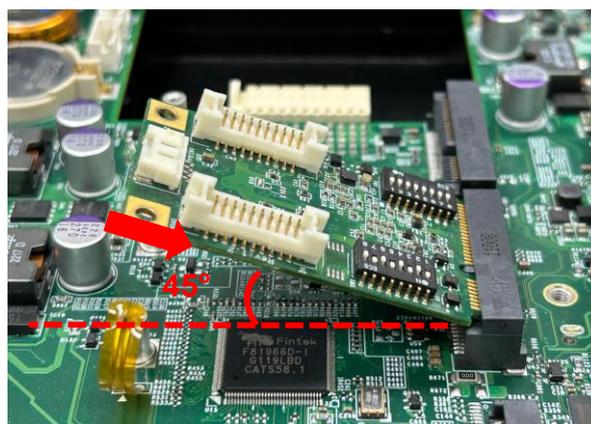

Step 4. Press the card down and secure it with 2 screws.
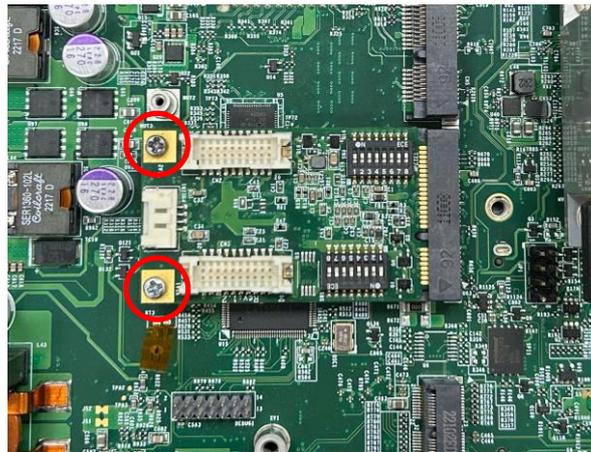

Step 5. Remove the 8 D-Sub jack screws from the COM ports.
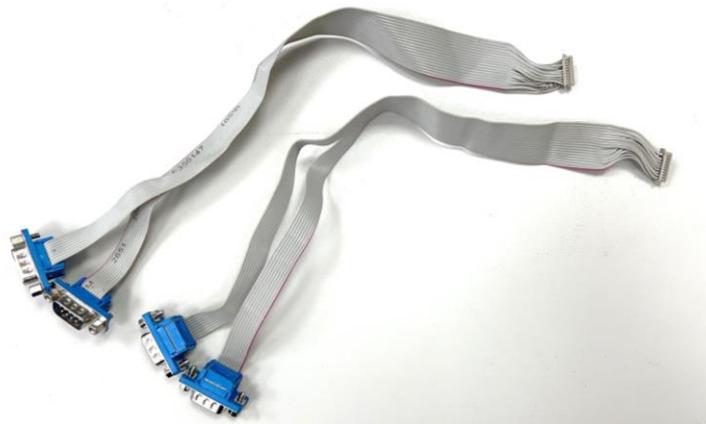

Step 6. Connect the other end of the wire to the Mini PCIe card as indicated.
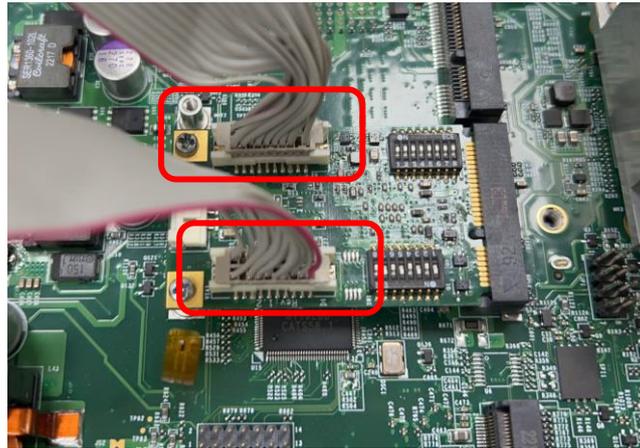

Step 7. Attach the COM ports onto the back side of the cover plates, and then fasten the 8 D-Sub jack screws to secure the COM ports.

Step 8. Attach the MEC-COM bracket, and fasten the 4 screws to fix it as indicated.

3.17.3 MEC-USB-M102-30/UB1214 Module

Step 1. Loosen 2 screws on the cover plate of number 1 or 2 and then remove it. In the following steps, we use cover plate 1 for example. (You can install two MEC-USB modules for system P2202E)

Step 2. Locate one of the Mini PCIe sockets on the bottom side of the system.
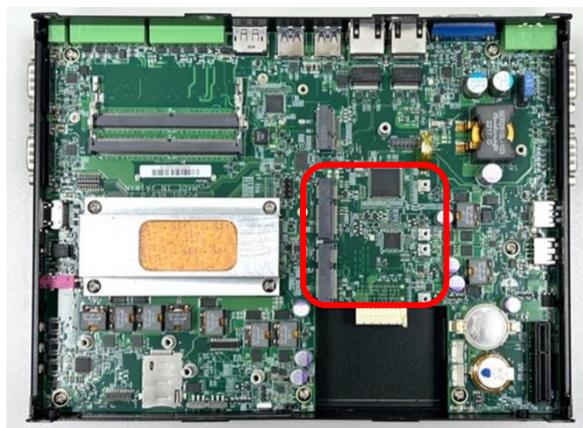

Step 3. Tilt the Mini PCIe card at a 45-degree angle and insert it to the socket until the golden finger connector of the card seated firmly.

Step 4. Press the card down and secure it with 2 screws.
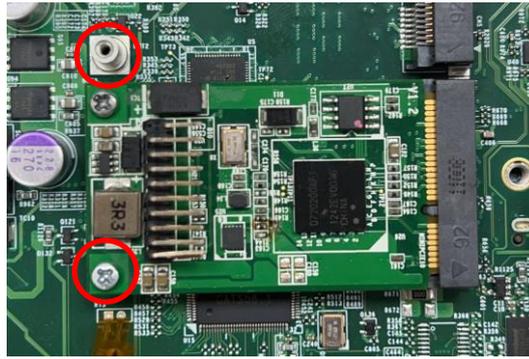

Step 5. Connect the attached wire to the USB board.

Step 6. Connect the other end of the wire to the Mini PCIe card as indicated.

Step 7. Attach the USB board onto the back side of the cover plate, and then fasten the two screws to secure the module.
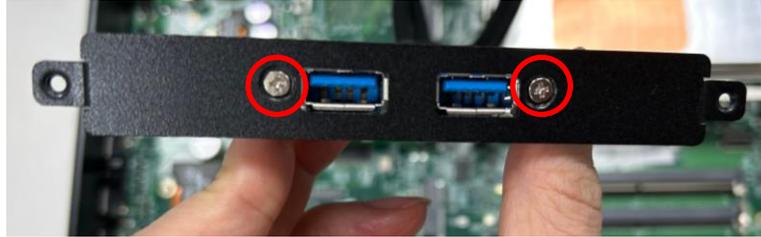

Step 8. Attach the MEC-USB bracket, and fasten the 2 screws to fix it as indicated.

3.17.4 MEC-LAN-M102-30/UB1211 Module

Step 1. Loosen 2 screws on the cover plate of number 1 or 2 and then remove it. In the following steps, we use cover plate 1 for example. (You can install two MEC-LAN modules for system P2202E)

Step 2. Locate one of the Mini PCIe sockets on the bottom side of the system.
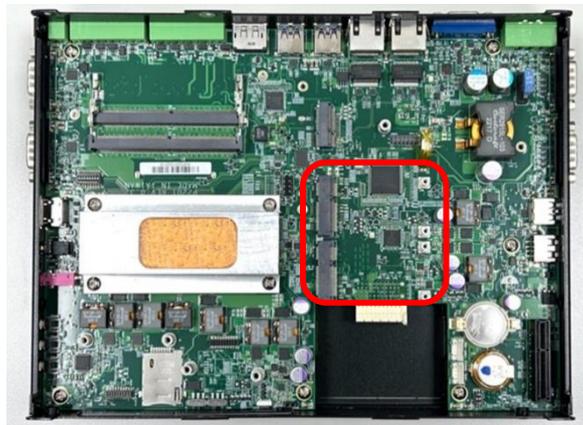

Step 3. Tilt the Mini PCIe card at a 45-degree angle and insert it to the socket until the golden finger connector of the card seated firmly.
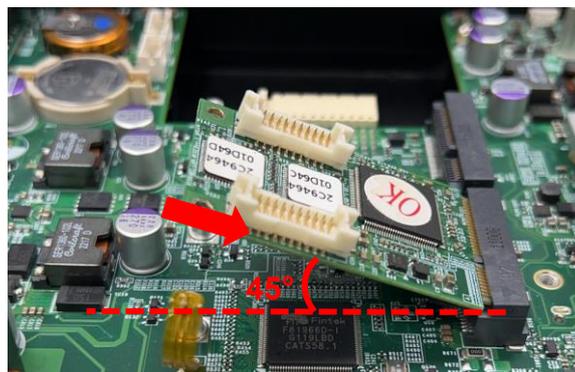

Step 4. Press the card down and secure it with 2 screws.

Step 5. Connect the attached wires to the LAN board.

Step 6. Connect the wires to the Mini PCIe card as indicated.
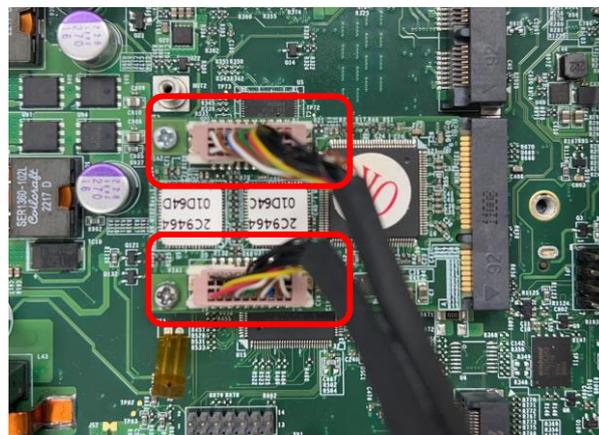

Step 7. Attach the LAN board onto the back side of the cover plate, and then fasten the two screws to secure the module.

Step 9. Attach the MEC-LAN bracket, and fasten the 2 screws to fix it as indicated.

Chapter 4
BIOS Setup

4.1 BIOS Introduction

The BIOS (Basic Input/ Output System) is a program located on a Flash Memory on the motherboard. When you start the computer, the BIOS program will gain control. The BIOS first operates an auto-diagnostic test called POST (power on self-test) for all the necessary hardware, it detects the entire hardware device and configures the parameters of the hardware synchronization.

BIOS Setup

Power on the computer and by pressing <Del> immediately allows you to enter Setup. If the message disappears before your respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing <Ctrl>, <Alt> and <Delete> keys.

Control Keys	
<←> <→>	Move to select screen
<↑> <↓>	Move to select item
<Esc>	Quit the BIOS Setup
<Enter>	Select item
<Page Up/+>	Increases the numeric value or makes changes
<Page Down/->	Decreases the numeric value or makes changes
<Tab>	Select setup fields
<F1>	General help
<F2>	Previous value
<F3>	Load Optimized defaults
<F10>	Save configuration and Exit

Main Menu

The main menu lists the setup functions you can make changes to. You can use the arrow keys (↑↓) to select the item. The on-line description of the highlighted setup function is displayed at the bottom of the screen.

Sub-Menu

If you find a right pointer symbol appears to the left of certain fields that means a sub-menu can be launched from this field. A sub-menu contains additional options for a field parameter. You can use arrow keys (↑↓) to highlight the field and press <Enter> to call up the sub-menu. Then you can use the control keys to enter values and move from field to field within a sub-menu. If you want to return to the main menu, just press the <Esc >.

4.2 Main Setup

Press <Del> to enter BIOS CMOS Setup Utility, the Main Menu (as shown below) will appears on the screen. Use arrow keys to move among the items and press <Enter> to accept or enter a sub-menu.
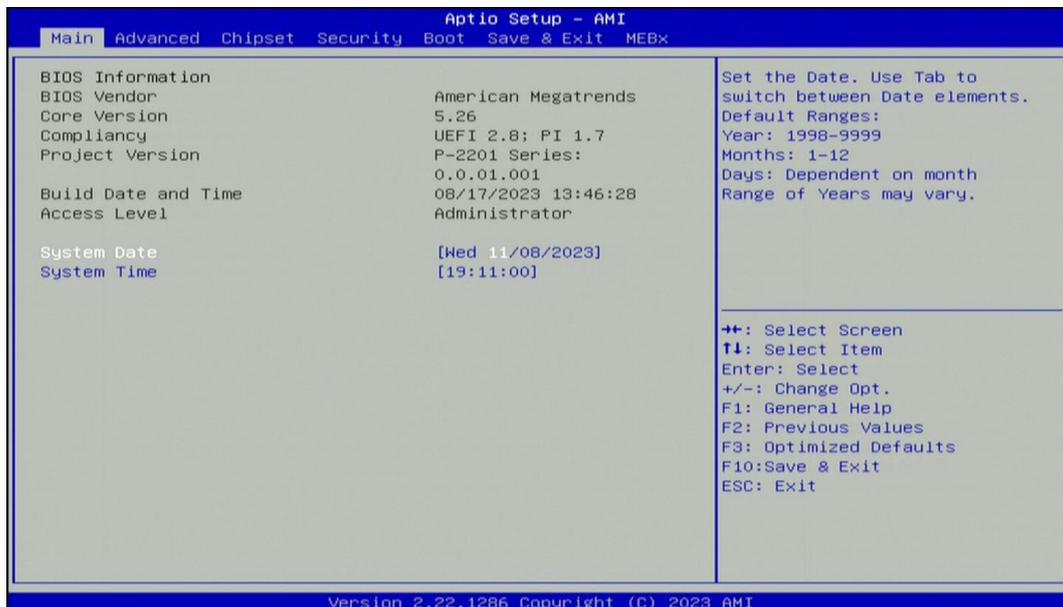

4.2.1 System Date
Set the date. Please use <Tab> to switch between date elements.

4.2.2 System Time
Set the time. Please use <Tab> to switch between time elements.

4.3 Advanced Setup
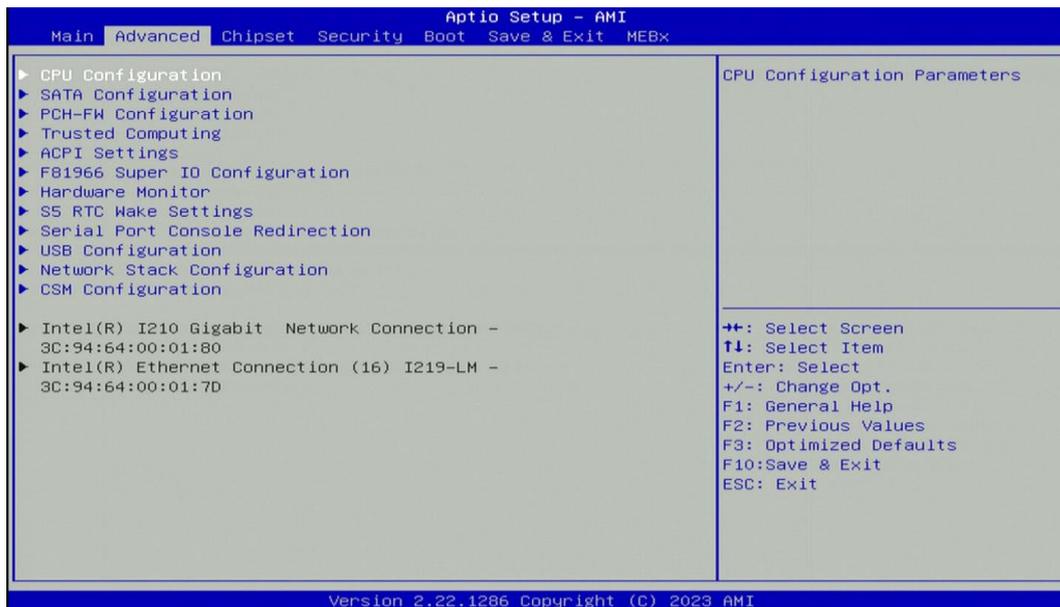

4.3.1 CPU Configuration
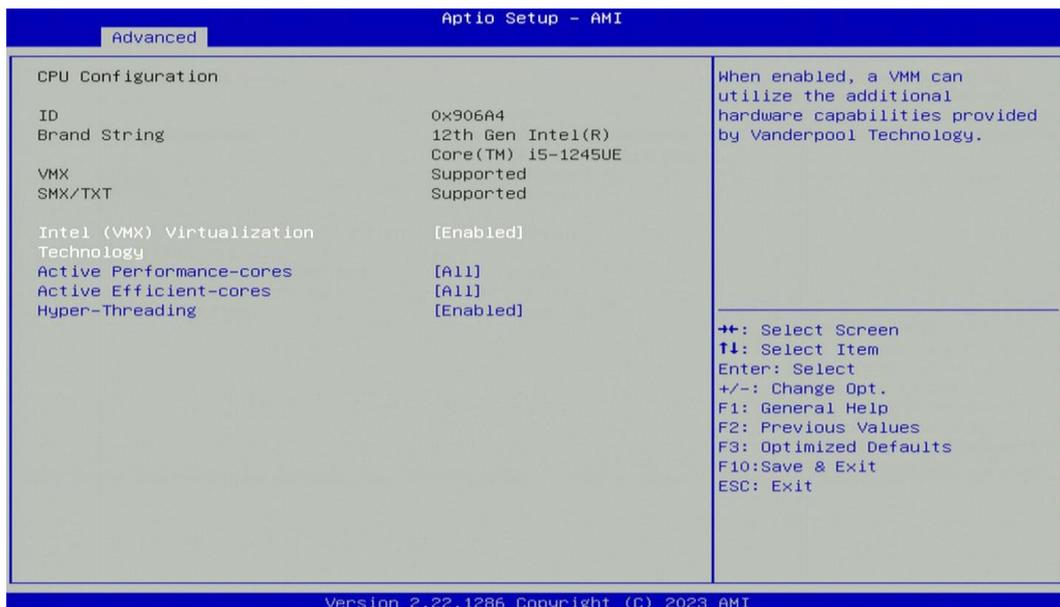

- **Intel® (VMX) Virtualization Technology [Enabled]**

  Enables or disables Intel® Virtualization Technology. Virtualization enhanced by Intel® Virtualization Technology will allow a platform to run multiple operating systems and applications in independent partitions. With virtualization, one computer system can function as multiple virtual systems.

- **Active Performance-cores [All]**

  Allows you to choose the number of active performance cores.

  Configuration options: [All] [1]

- **Active Efficient-cores [All]**

  Allows you to choose the number of active efficient cores.

  Configuration options: [All] [1] [2] [3] [4] [5] [6] [7]

■ **Hyper-Threading [Enabled]**

Allows you to enable or disable Intel® Hyper-Threading function of processor.

4.3.2 SATA Configuration
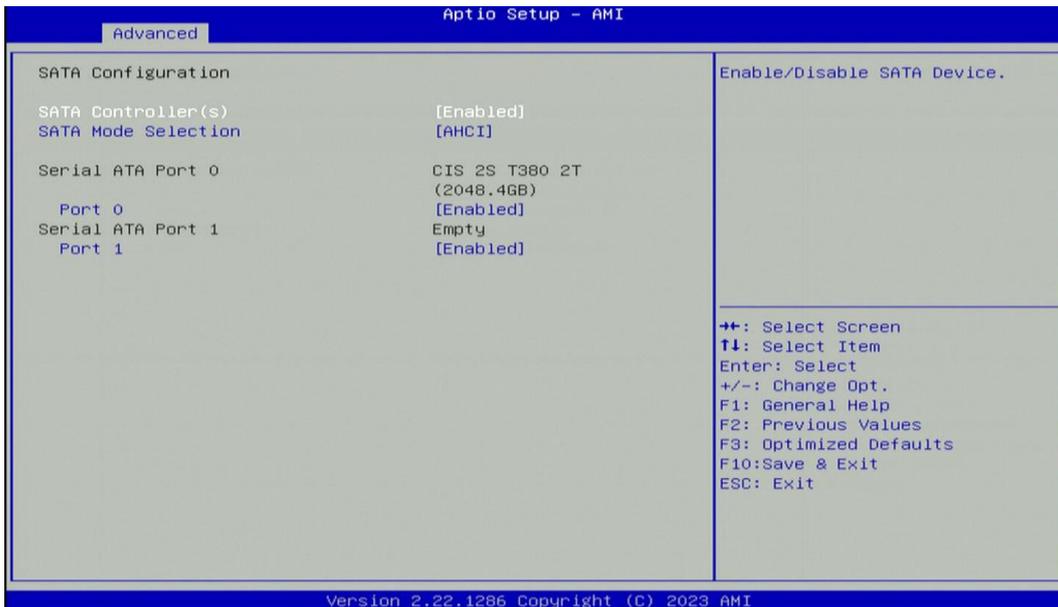

■ **SATA Controller(s) [Enabled]**

Enables or disables Serial ATA controller.

■ **SATA Mode [AHCI]**

This item allows users to choose [AHCI] mode.

■ **Serial ATA Port 0**

Port 0 [Enabled]

Enables or disables SATA Port 0.

■ **Serial ATA Port 1**

Port 1 [Enabled]

Enables or disables SATA Port 1.

4.3.3 PCH-FW Configuration
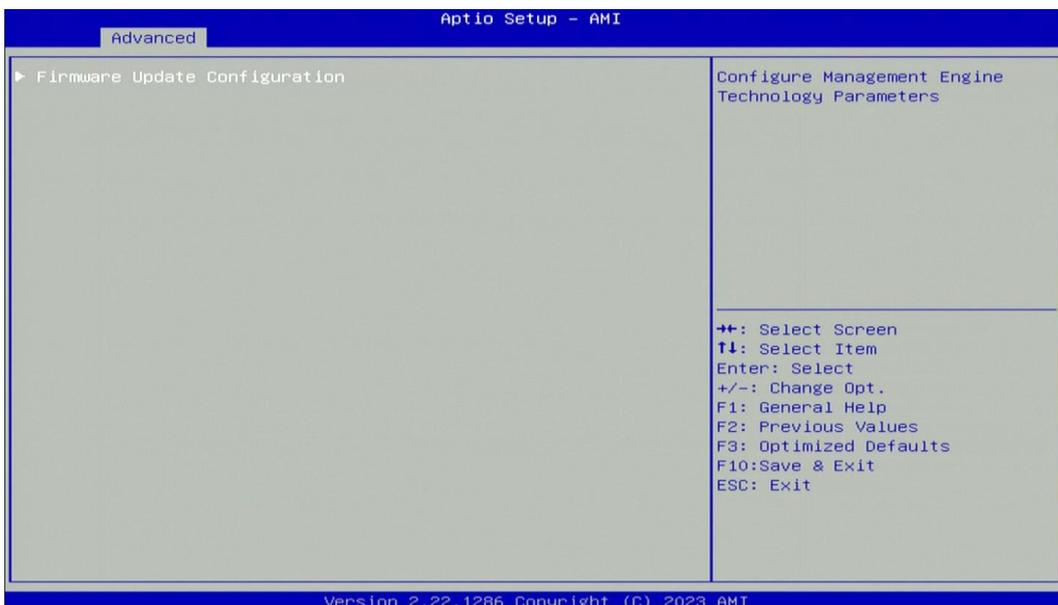

❑ **Firmware Update Configuration**

■ **ME FW Image Re-Flash [Disabled]**

Allows you to enable or disable ME firmware image re-flash function.

4.3.4 Trusted Computing
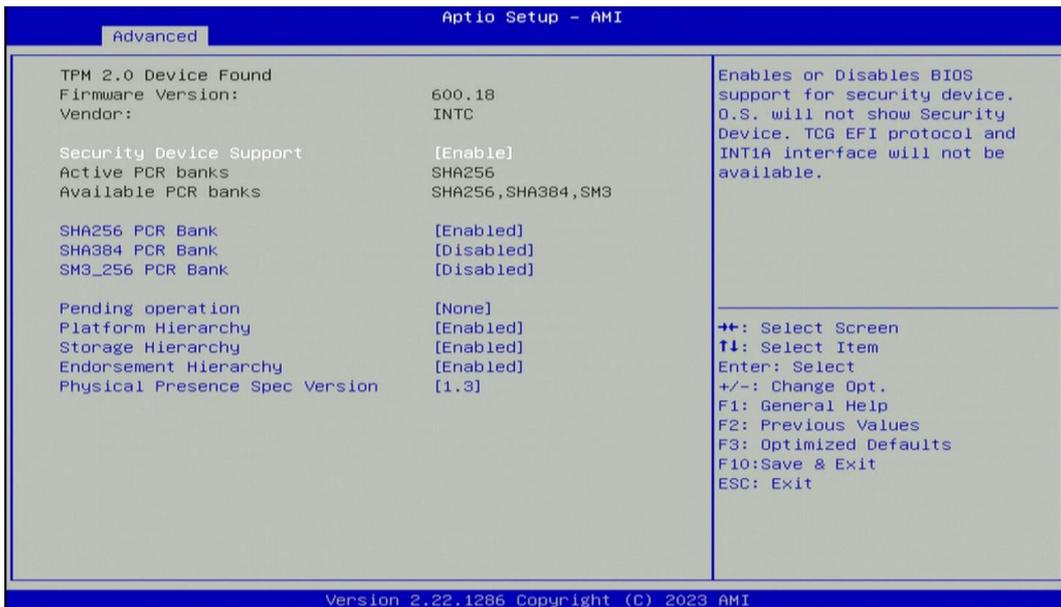

■ **Security Device Support [Enable]**

Allow you to enables or disables Security Device Support function.

■ **SHA256 PCR Bank [Enabled]**

Enables or disables SHA256 PCR Bank function.

■ **SHA384 PCR Bank [Disabled]**

Enables or disables SHA384 PCR Bank function.

■ **SHA3_256 PCR Bank [Disabled]**

Enables or disables SHA3_256 PCR Bank function.

■ **Pending Operation [None]**

Allows users to select which mode Pending Operation will operate.

Configuration options: [None], [TPM Clear]

■ **Platform Hierarchy [Enabled]**

Enables or disables Platform Hierarchy function.

■ **Storage Hierarchy [Enabled]**

Enables or disables Storage Hierarchy function.

■ **Endorsement Hierarchy [Enabled]**

Enables or disables Endorsement Hierarchy function.

■ **Physical Presence Spec Version [1.3]**

Allows users to select which mode Physical Presence Spec Version will operate.

Configuration options: [1.2], [1.3]

4.3.5 ACPI Settings

This item allows users to configure ACPI settings.
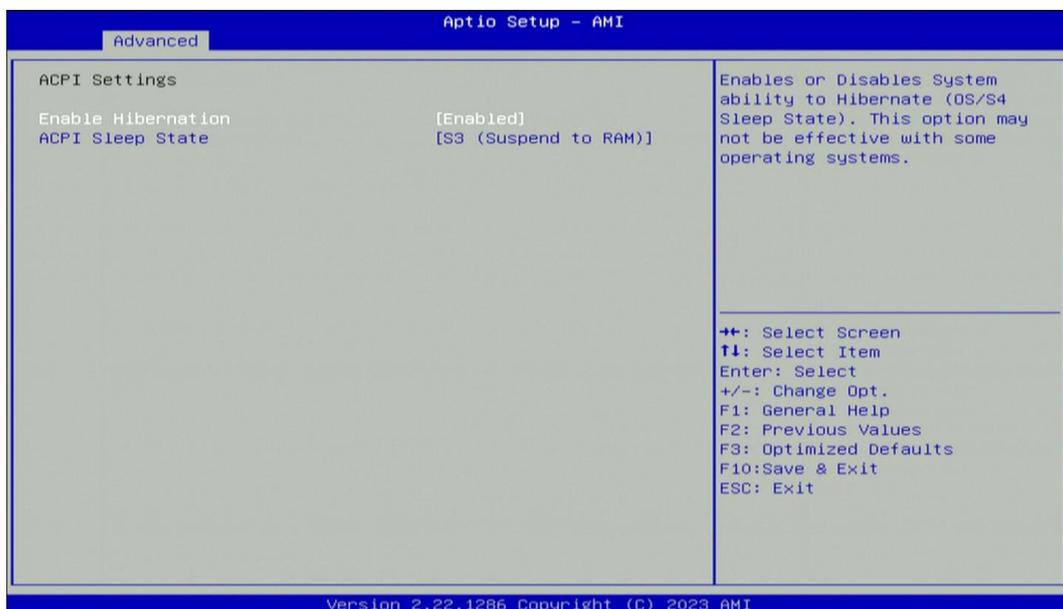

■ **Enable ACPI Auto Configuration [Enabled]**

Enables or disables BIOS Advanced Configuration Power Interface® (ACPI) auto configuration.

■ **ACPI Sleep State [S3 (Suspend to RAM)]**

Allows users to select the highest Advanced Configuration Power Interface® (ACPI) sleep state that system will enter when suspend button is pressed.

[Suspend Disabled]: Disables entering suspend state.

[S3 (suspend to RAM)]: Enables suspend to RAM state.

4.3.6 F81966 Super IO Configuration

The screen allows users to select options for the Super IO configuration, and change the value of the selected option.

```
                        Aptio Setup - AMI
   Advanced

 F81966 Super IO Configuration                          Set Parameters of Serial Port

```

■ **Network Stack [Disabled]**

Enables or disables UEFI Network Stack.

4.3.12 CSM Configuration

- ■ **CSM Support [Disabled]**
  This item allows users to enable or disable UEFI Compatibility Support Module (CSM) to
  support a legacy PC boot process.

4.4 Chipset Setup

This section allows you to configure chipset related settings according to user's preference.
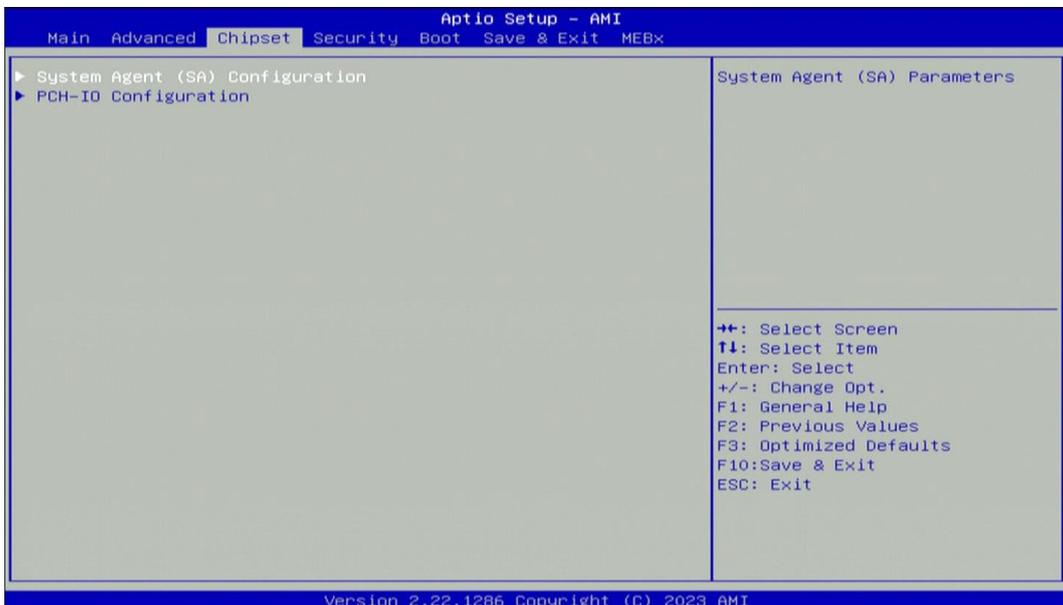

4.4.1 System Agent (SA) Configuration
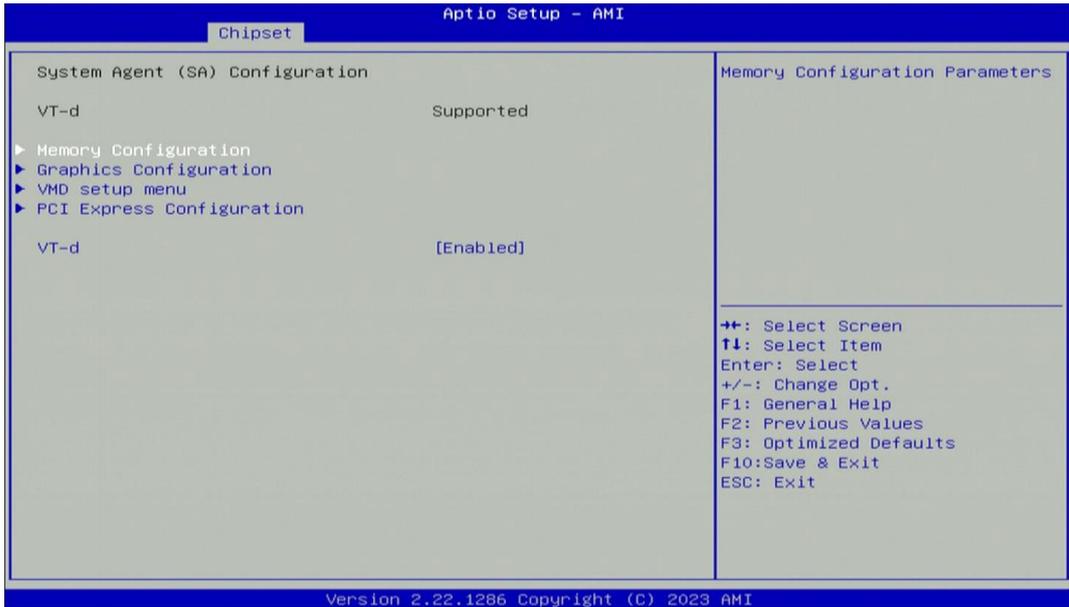

❑ **Memory Configuration**

This item displays detailed memory information in the system.
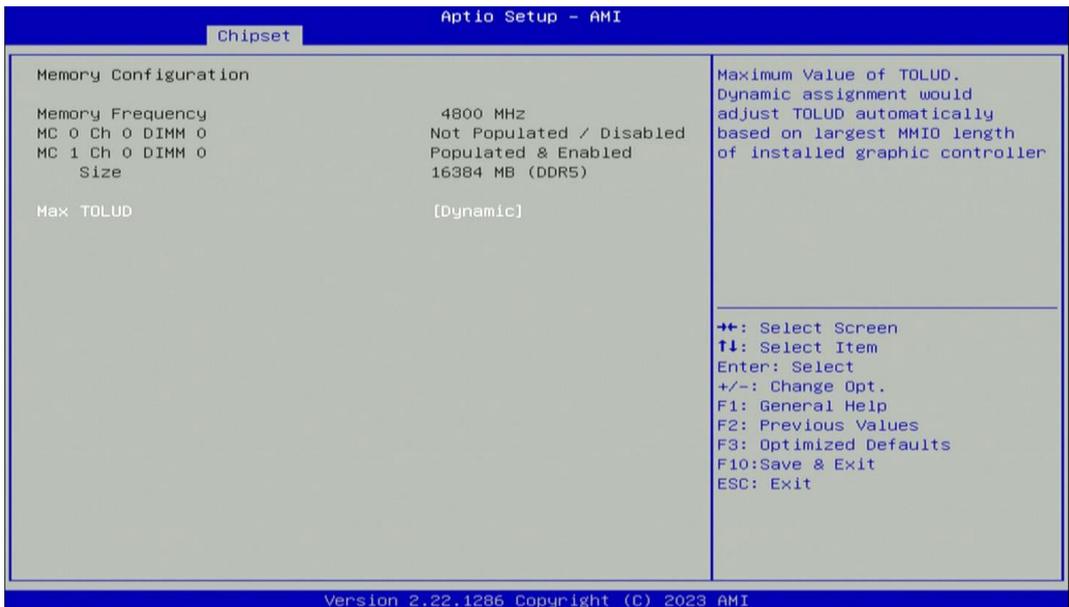

■ **Max TOLUD [Dynamic]**

This item allows users to select maximum value of TOLUD.

❑ **Graphics Configuration**
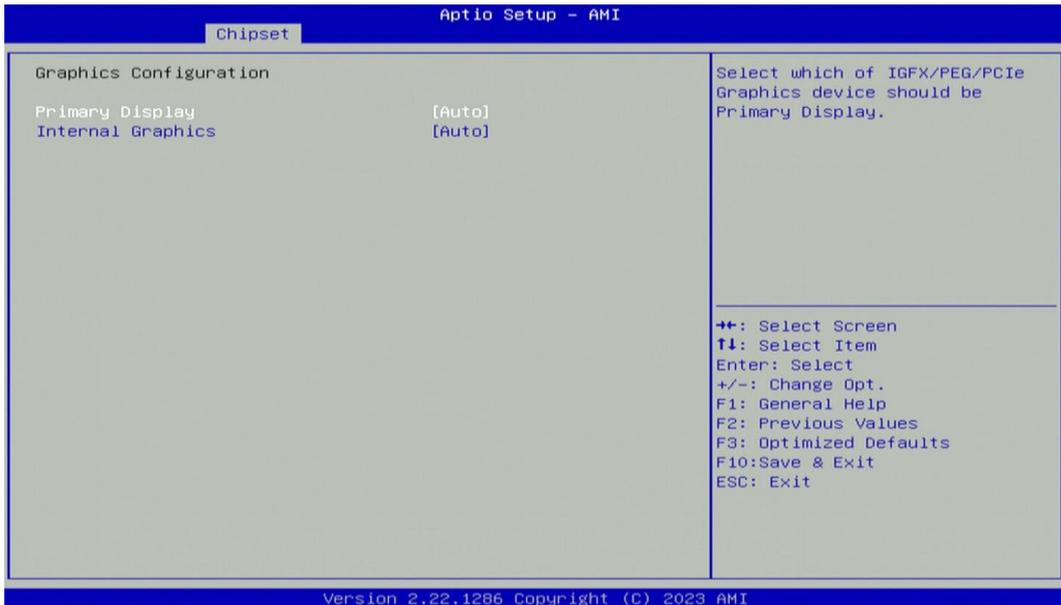

■ **Primary Display [Auto]**

Allows users to select which graphics device should be primary display or select SG for switchable graphics. Configuration options: [Auto] [IGFX] [PEG Slot] [PCIe]

■ **Internal Graphics [Auto]**

This item allows users to enable or disable Internal Graphics. When set to [Auto], it will detect by BIOS. Configuration options: [Auto] [Disabled] [Enabled]

❑ **VMD Setup Menu**

■ **Enable VMD controller [Disabled]**

This item allows users to enable or disable VMD controller. Enable this function can support creating RAID.

❑ **PCI Express Configuration**
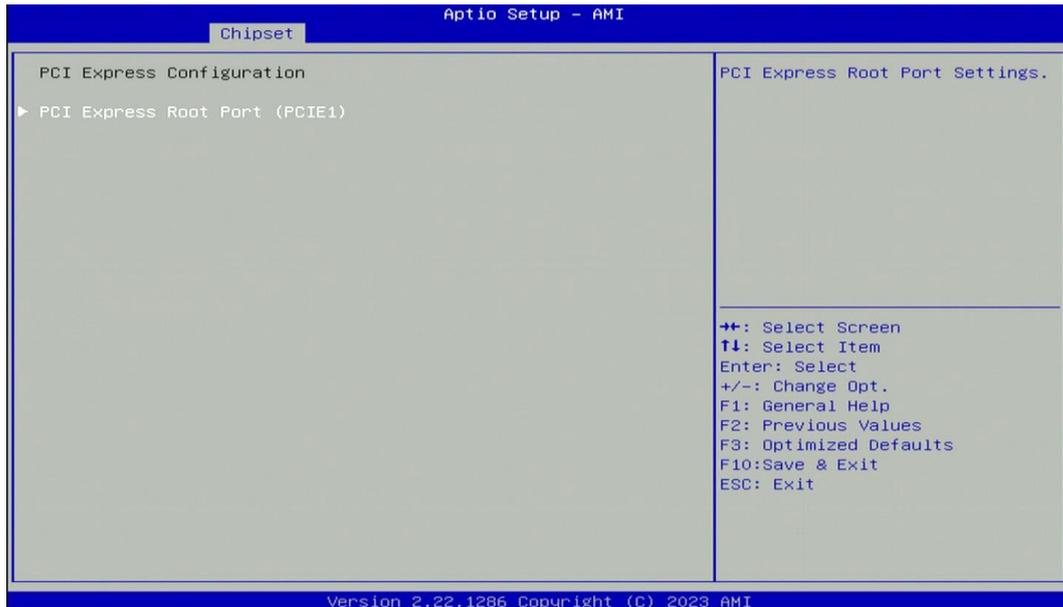

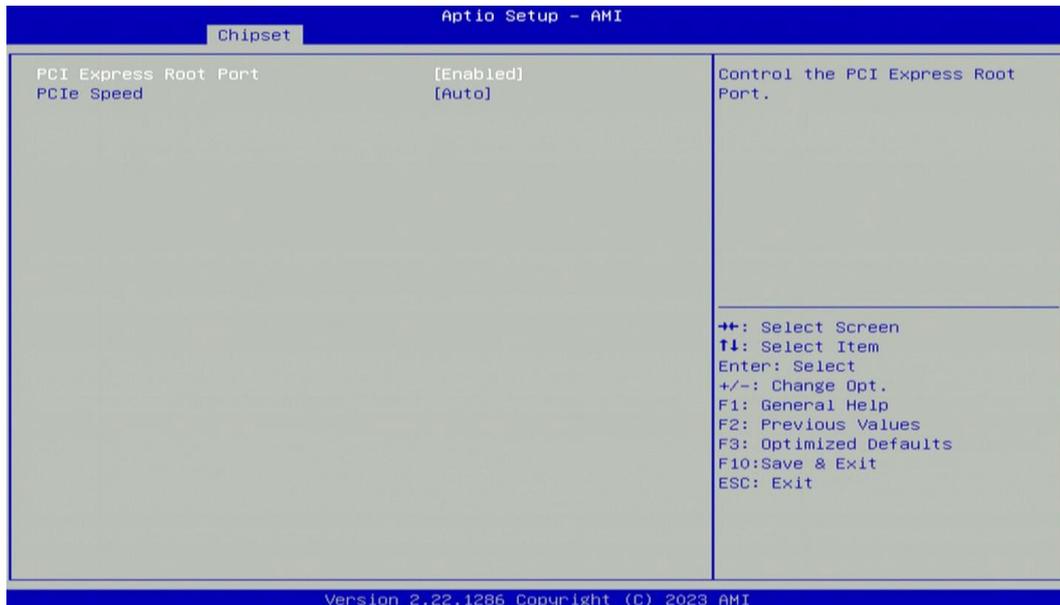

❑ **PCI Express Configuration**

■ **PCI Express Root Port [Enabled]**

Allows you to enable or disable the PCI Express Port.

■ **PCIe Speed [Auto]**

Allows you to select PCI Express interface speed.

Configuration options: [Auto] [Gen1] [Gen2] [Gen3] [Gen4].

■ **VT-d [Enabled]**

This item allows users to enable or disable Intel® Virtualization Technology for Directed I/O (VT-d) function.

4.4.2 PCH-IO Configuration
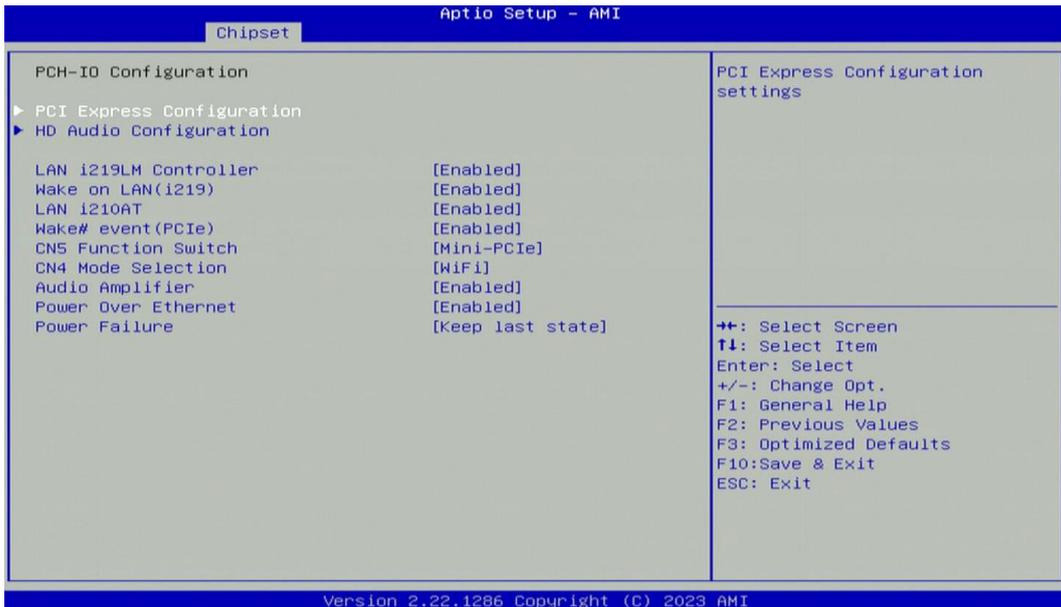

❑ **PCI Express Configuration**
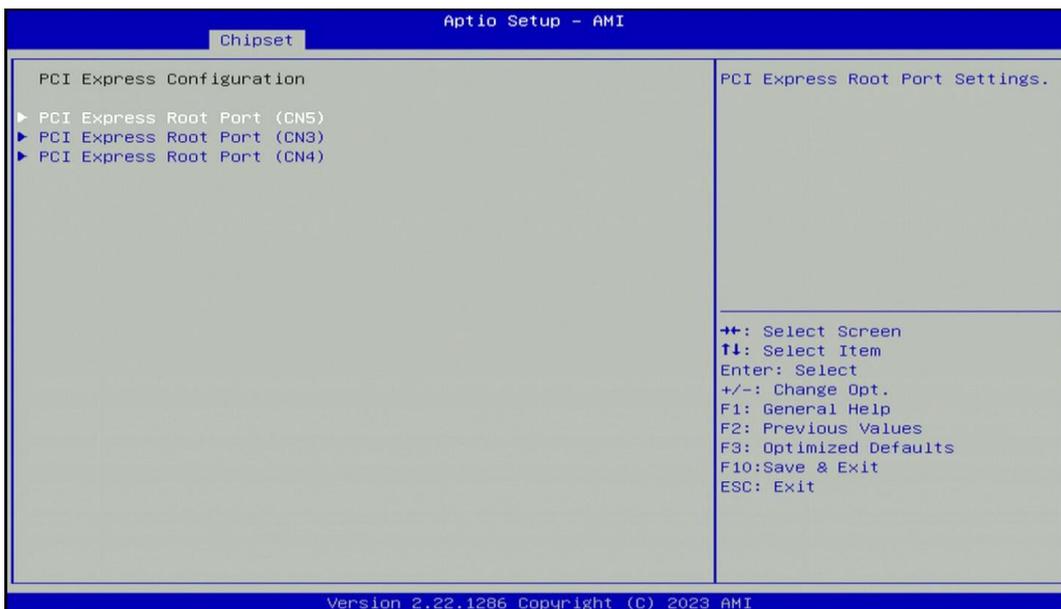

❑ **PCI Express Root Port(CN5)**

■ **PCI Express Root Port [Enabled]**

Allows you to enable or disable the PCI Express Port.

■ **PCIe Speed [Auto]**

Allows you to select PCI Express interface speed.

Configuration options: [Auto] [Gen1] [Gen2] [Gen3].

❑ **PCI Express Root Port(CN3)**

■ **PCI Express Root Port [Enabled]**

Allows you to enable or disable the PCI Express Port.

■ **PCIe Speed [Auto]**

Allows you to select PCI Express interface speed.

Configuration options: [Auto] [Gen1] [Gen2] [Gen3].

❑ **PCI Express Root Port(CN4)**

■ **PCI Express Root Port [Enabled]**

Allows you to enable or disable the PCI Express Port.

■ **PCIe Speed [Auto]**

Allows you to select PCI Express interface speed.

Configuration options: [Auto] [Gen1] [Gen2] [Gen3].

❑ **HD Audio Configuration**
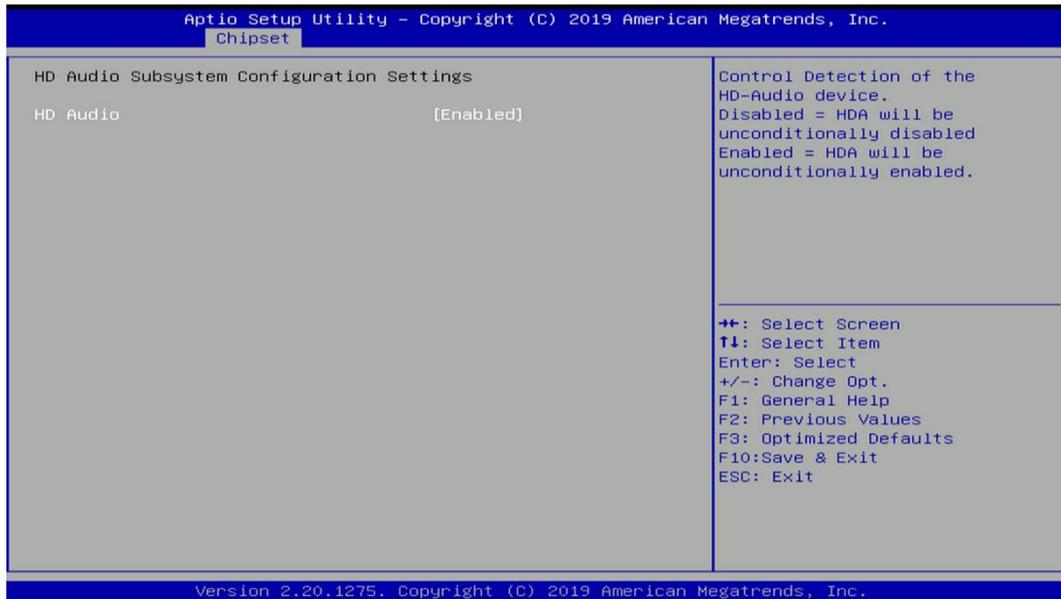

■ **HD Audio [Enabled]**

Allows you to select HD Audio options.

[Enabled]: HD Audio device is unconditionally enabled.

[Disabled]: HD Audio device is unconditionally disabled.

■ **LAN i219LM Controller [Enabled]**

Enables or disables i219LM LAN Controller.

■ **Wake On LAN (i219) [Enabled]**

Enables or disables integrated LAN i219LM Wake On LAN function.

■ **LAN i210AT Controller [Enabled]**

Enables or disables i210 LAN Controller.

■ **Wake# event (PCIe) [Enabled]**

Enables or disables integrated LAN i210 Wake On LAN function.

■ **CN5 Function Switch [Mini-PCIe]**

Select Mini-PCIe/USB3.0 for CN5 connector.

■ **CN4 Function Switch [Wifi]**

Select CNV/Wifi(PCIE) for CN4 connector.

■ **Audio Amplifier [Enabled]**

Enable or disable Audio Amplifier.

- **Power Over Ethernet Function [Enabled]**

  Enable or disable Power Over Ethernet (POE) function.
- **Power Failure [Keep last state]**

  Allows you to specify which power state system will enter when power is resumed after a power failure (G3 state).

  [Always on]: Enters to power on state.

  [Always off]: Enters to power off state.

  [Keep last state]: Enters to the last power state before a power failure.

4.5 Security Setup

This section allows users to configure BIOS security settings.

```
                          Aptio Setup — AMI
    Main  Advanced  Chipset  Security  Boot  Save & Exit  MEBx

    Password Description                      Set Administrator Password

    If ONLY the Administrator's password is set,
    then this only limits access to Setup and is
    only asked for when entering Setup.
    If ONLY the User's password is set, then this
    is a power on password and must be entered to
    boot or enter Setup. In Setup the User will
    have Administrator rights.
    The password length must be
    in the following range:
    Minimum length              3
    Maximum length              20                →←: Select Screen
                                                  ↑↓: Select Item
    Administrator Password                        Enter: Select
    User Password                                 +/−: Change Opt.
                                                  F1: General Help
