

High Performance USB to 2-port CAN bus Converter

I-7565-H2

Dimensions

I-7565-H2 is a high performance intelligent USB to CAN converter and provides two CAN channels. It provides faster CAN bus communication performance than I-7565. I-7565-H2 supports CAN2.0A/2.0B protocol and different baud rates from 5 Kbps to 1 Mbps. The important feature of I-7565-H2 is to support the user-defined baud rate function no matter what the baud rate is. When connecting I-7565-H2 to PC, PC will load the relevant device driver automatically (hot plug & play). Therefore, users can make data collection and processing of CAN bus network easier and quicker by applying I-7565-H2.
