

**MODEL:
WAFER-ADL-N**

3.5" SBC supports Intel® Alder Lake-N N200/N97 on-board SoC with 8GB LPDDR5x on board default. with DP, HDMI and iDPM, dual 2.5 GbE, USB 3.2 Gen 2, M.2, SATA 6Gb/s, COM, PCIe x4 for riser card and RoHS

Chapter

1

Introduction

1.1 Introduction

Figure 1-1: WAFER-ADL-N

The WAFER-ADL-N is a 3.5" industrial motherboard equipped with an Intel® AlderLake-N N97/N200 quad-core processor, turbo up-to 2.60 GHz with 1.5M cache, and supports onboard LPDDR5 with 8 GB re-installed memory, up to 16GB.

The WAFER-ADL-N includes a HDMI1.4 (up to 4096 x 2160@30Hz) connector, a DP1.4 (up to 4096 x 2160 @60Hz) connector and one IEI iDPM slot for triple independent display.

Expansion and I/O include one M.2 A-key slot for Wi-Fi or Bluetooth expansions, one M.2 M-key slot for NVMe storage and one PCIe x4 slot with x2 signal for installing riser card. Two USB 3.2 Gen 2 and two USB 2.0 connectors on the rear panel, two USB 2.0 connectors by pin header. One SATA 6Gb/s connector. Serial device connectivity is provided by two internal RS-232/422/485 connectors. Two RJ-45 2.5 GbE connectors provide the system with smooth connections to an external LAN.

WAFER-ADL-N SBC

1.2 Features

Some of the WAFER-ADL-N motherboard features are listed below:

- 10nm Intel® AlderLake-N on-board SoC, 4 cores and 4 threads,
- Two Intel® I225-V/I226-V 2.5GbE ports
- Two USB 3.2 Gen 2, four USB 2.0, two RS-232/422/485
- M.2 A key, M.2 M key and PCIe x4 slot (x2 signal) expansions
- Support triple independent display via HDMI, DP and IEI iDPM

1.3 Connectors

The connectors on the WAFER-ADL-N are shown in the figure below.

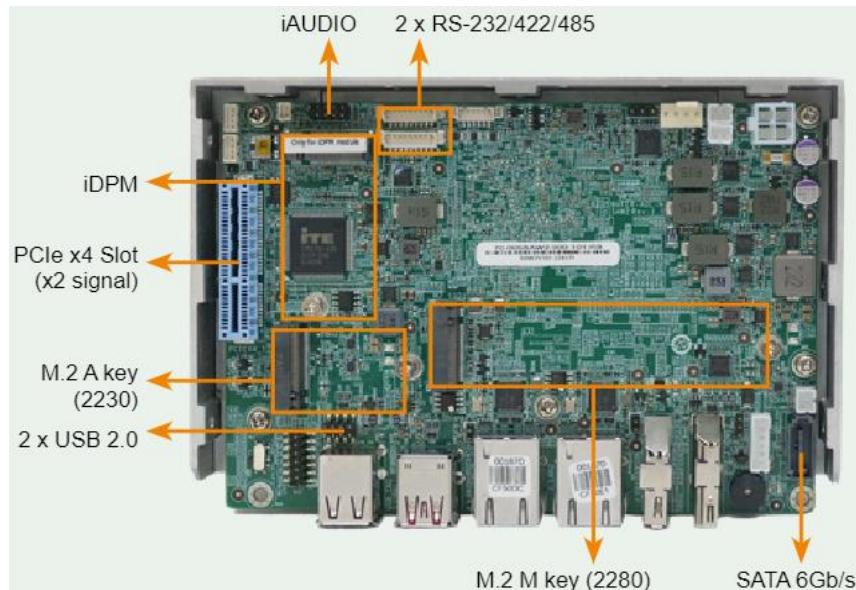

Figure 1-2: Connectors

1.4 Dimensions

The dimensions of the board are listed below:

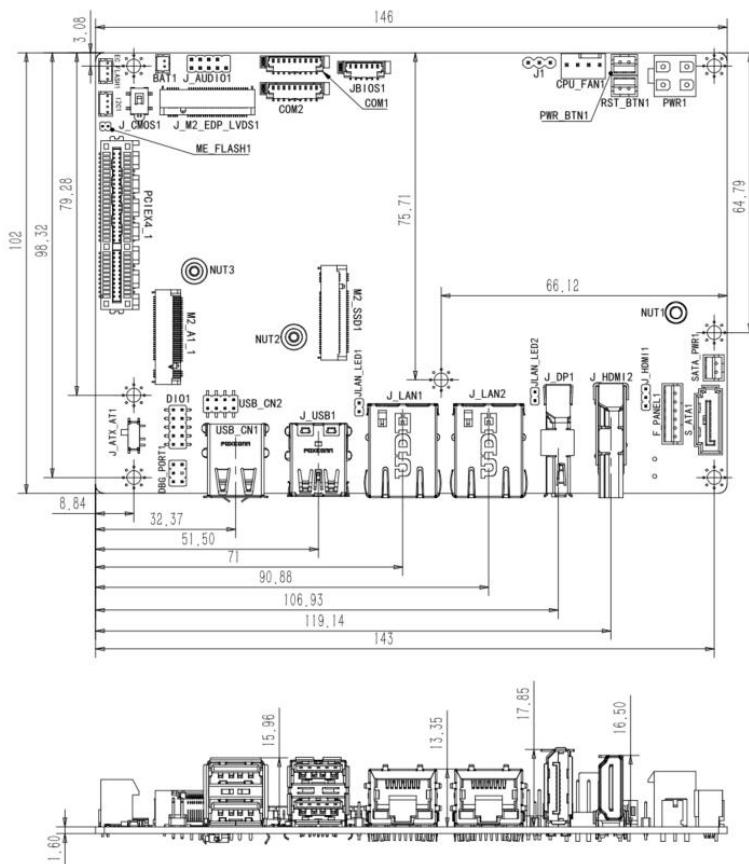

Figure 1-3: Dimensions (mm)

WAFER-ADL-N SBC**1.5 Data Flow**

Shows the data flow between the system chipset, the CPU and other components installed on the motherboard.

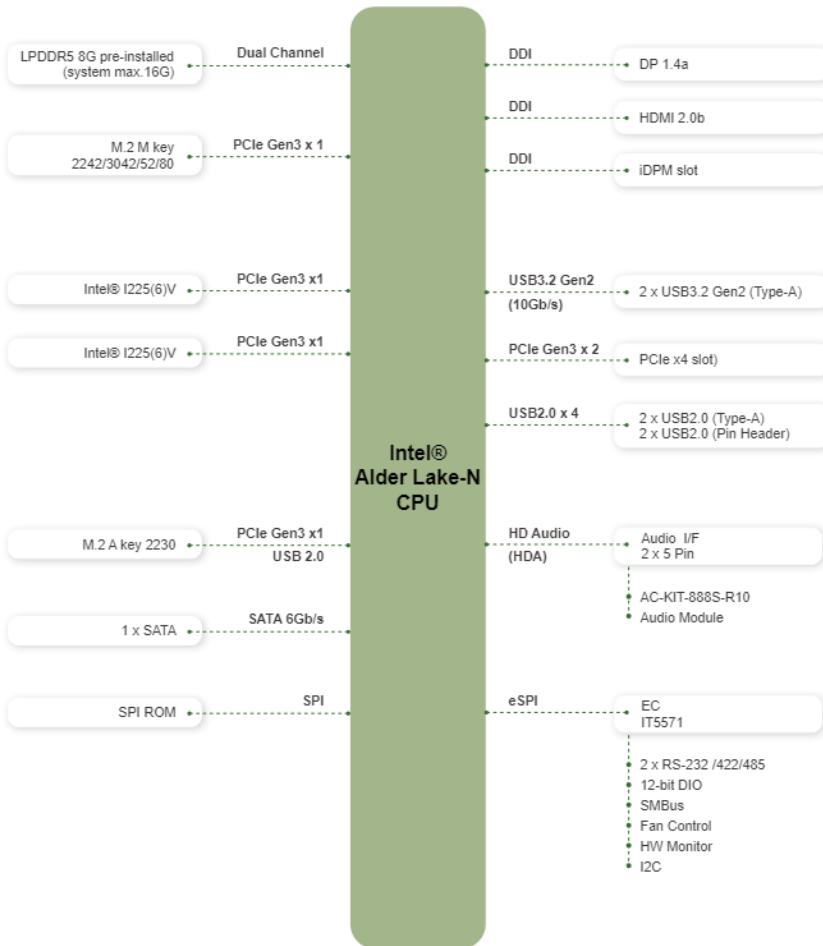

Block Diagram

Figure 1-4: Data Flow Diagram

1.6 Technical Specifications

WAFER-ADL-N technical specifications are listed below.

Specification	WAFER-ADL-N
SoC	Intel® Alder Lake-N N97 SoC Processor Intel® Alder Lake-N N200 SoC Processor
BIOS	AMI UEFI BIOS
Memory	Dual channel LPDDR5 8G pre-installed (system max.16G)
Graphics	Gen 12 UHD Graphics
Display Output	Triple independent display 1 x HDMI 1.4 (up to 4096 x 2160@30Hz) 1 x DP 1.4 (up to 4096 x 2160 @ 60Hz) 1 x IEI iDPM 3040 slot (only for IEI eDP/LVDS/VGA module)
Ethernet	LAN1: Intel® I225-V/I226-V 2.5GbE LAN2: Intel® I225-V/I226-V 2.5GbE
Digital I/O	12-bit digital I/O by 14-pin (2x7) header
Embedded Controller	ITE IT5571
Watchdog Timer	Software programmable support 1~255 sec. system reset
I/O Interface	
Audio Connector	1 x iAUDIO supports IEI AC-KIT-888S Audio Kit (2x5 pin)
Ethernet	2 x RJ-45 2.5 GbE port
Serial Ports	2 x RS-232/422/485 by 9-pin (1x9 pin, P=1.25) wafer
USB Ports	2 x USB 3.2 Gen 2 on rear I/O 2 x USB 2.0 on rear I/O 2 x USB 2.0 by 8-pin (2x4 pin, P=2.0) header
Front Panel	1 x Power LED and HDD LED connector by 6-pin (1x6) wafer 1 x Power button connector by 2-pin wafer 1 x Reset button connector by 2-pin wafer
Fan	1 x System Smart fan connector by 4-pin (1x4) wafer

WAFER-ADL-N SBC

Specification	WAFER-ADL-N
SMBus/I²C	1 x I ² C connector by 4-pin (1x4) wafer 1 x SMBus connector by 4-pin (1x4) wafer
Storage	1 x SATA 6Gb/s with 5 V SATA power connectors
Expansions	1 x M.2 A Key 2230 (PCIe Gen3 x1 & USB 2.0) 1 x M.2 M Key 2280 (PCIe Gen3 x1) 1 x PCIe x4 Slot (PCIe Gen3 x2 signal)
Environmental and Power Specifications	
Power Supply	12 V DC input only (AT/ATX support)
Power Connector	1 x Internal power connector by 4-pin (2x2) connector
Power Consumption	12V@3.21A (Intel® Processor N97 with 8 GB 4800 MHz LPDDR5 memory, max. loading, EuP mode disabled) 12V@2.67A (Intel® Processor N200 with 8 GB 4800 MHz LPDDR5 memory, max. loading, EuP mode disabled)
Operating Temperature	0°C ~ 60°C
Storage Temperature	-30°C ~ 70°C
Humidity	5% ~ 95%, non-condensing
Physical Specifications	
Dimensions	146mm x 102mm
Weight GW/NW	850g / 350g

Table 1-1: Technical Specifications

Unpacking

2.1 Anti-static Precautions

WARNING!

Static electricity can destroy certain electronics. Make sure to follow the ESD precautions to prevent damage to the product, and injury to the user.

Make sure to adhere to the following guidelines:

- **Wear an anti-static wristband:** Wearing an anti-static wristband can prevent electrostatic discharge.
- **Self-grounding:** Touch a grounded conductor every few minutes to discharge any excess static buildup.
- **Use an anti-static pad:** When configuring any circuit board, place it on an anti-static mat.
- **Only handle the edges of the PCB:** Don't touch the surface of the motherboard. Hold the motherboard by the edges when handling.

2.2 Unpacking Precautions

When the WAFER-ADL-N is unpacked, please do the following:

- Follow the antistatic guidelines above.
- Make sure the packing box is facing upwards when opening.
- Make sure all the packing list items are present.

2.3 Packing List

NOTE:

If any of the components listed in the checklist below are missing, do not proceed with the installation. Contact the IEI reseller or vendor the WAFER-ADL-N was purchased from or contact an IEI sales representative directly by sending an email to sales@ieiworld.com.

The WAFER-ADL-N is shipped with the following components:

Quantity	Item and Part Number	Image
1	WAFER-ADL-N single board computer	
1	Power cable	
1	SATA with power cable kit	
1	Quick Installation Guide	<p>1.8" SBC System-in-a-Module (SOM) Processor: i.MX8M Mini DFP: DSI, Dual 4.0GbE, M.2 Key A & M Key, USB 3.2 Gen 2, eMMC 5.1, QSG 1.0, 1.8" SLC Nand WAFER-ADL-N Quick Installation Guide Version 1.0 June 15, 2023</p> <p>Package List WAFER-ADL-N package includes the following items: • 1 x WAFER-ADL-N single board computer with heat spreader • 1 x Power cable • 1 x SATA with power cable • 1 x QSG • 1 x QSG</p> <p>IEI ©2023 Copyright to IEI Integration Corp. All rights reserved.</p>

Table 2-1: Packing List

WAFER-ADL-N SBC

The following are optional components which may be separately purchased:

Item and Part Number	Image
Dual-port USB 2.0 cable, 210mm, P=2.0 (P/N : CB-USB02A-RS)	
RS-232/422/485 cable, 250 mm, p=1.25 (P/N : 32005-003500-200-RS)	
Audio kit, 7.1 Channel (P/N: AC-KIT-888S-R10)	
Cooler module, 157 mm x 100 mm x 20 mm, with pad and fan (P/N: CM-WAFER-WF-R10)	
Heatsink module, 157 mm x 100 mm x 20 mm, with pad (P/N: CM-WAFER-WOF-R10)

Connectors

3.1 Peripheral Interface Connectors

This chapter details all the jumpers and connectors.

3.1.1 WAFER-ADL-N Layout

The figures below show all the connectors and jumpers.

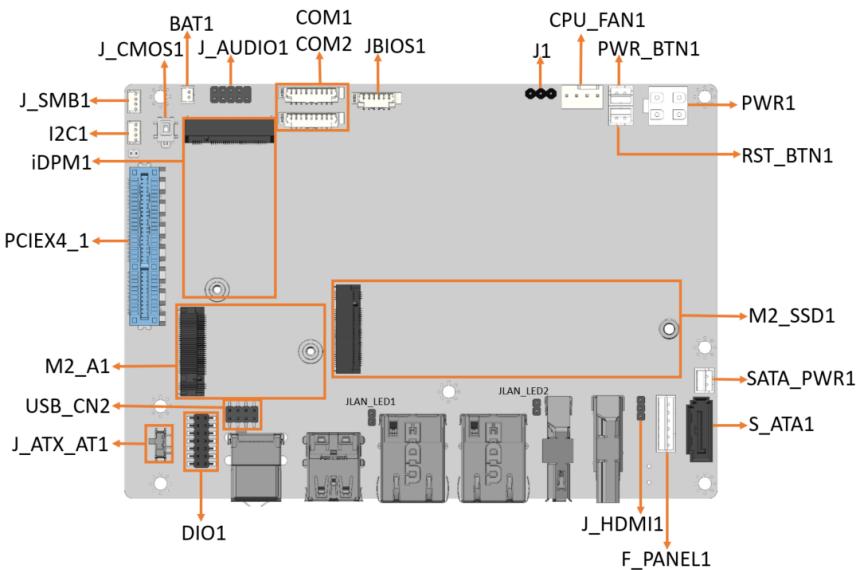

Figure 3-1: Connector and Jumper Locations

3.1.2 Peripheral Interface Connectors

The table below lists all the connectors on the board.

Connector	Type	Label
Clear CMOS button	Button	J_CMOS1
AT/ATX power mode setting	3-pin header	J_ATX_AT1
Audio connector for IEI AC-KIT-888S kit	10-pin header	J_AUDIO1
ATX 12V power connector	4-pin Molex	PWR1
Battery connector	2-pin wafer	BAT1
Digital I/O connector	14-pin header	DIO1
Fan connector	4-pin header	CPU_FAN1
Power LED & HDD LED connector	6-pin wafer	F_PANEL1
Power button connector	2-pin wafer	PWR_BTN1
Reset button connector	2-pin wafer	RST_BTN1
RS-232/422/485 serial port connectors	9-pin wafer	COM1, COM2
SATA 6Gb/s connectors	7-pin SATA connector	S_ATA1
SATA power connector	2-pin wafer	SATA_PWR1
I2C connector	4-pin wafer	I2C1
SMBus connector	4-pin wafer	J_SMB1
Flash SPI ROM connector	6-pin wafer	JBIOS1
LAN LED Connector	2-pin header	JLAN_LED1, JLAN_LED2
Internal USB 2.0 connector	8-pin header	USB_CN2
M.2 A-key slot	M.2 A-key slot	M2_A1
M.2 M-key slot	M.2 M-key slot	M2 SSD1
IEI iDPM slot	iDPM slot	iDPM1
PCIe x4 slot (x2 signal)	PCIe slot for riser card	PCIEX4_1

Table 3-1: Peripheral Interface Connectors

3.1.3 External Interface Panel Connectors

The table below lists the connectors on the external I/O panel.

Connector	Type	Label
External 2.5GbE RJ-45 connectors	RJ45	J_LAN1, J_LAN2
External USB 3.2 Gen 2x1 Type-A connector	USB 3.2 Gen 2 Type-A	J_USB1
External USB 2.0 Type-A connector	USB 2.0 Type-A	USB_CN1
External DisplayPort connector	DP	J_DP1
External dual HDMI connector	HDMI	J_HDMI2

Table 3-2: Rear Panel Connectors

3.2 Internal Peripheral Connectors

The section describes all of the connectors on the WAFER-ADL-N.

3.2.1 Clear CMOS Button

CN Label: J_CMOS2

CN Type: Button

CN Location: See **Figure 3-2**

CN Pinouts: See **Table 3-3**

To clear the CMOS Setup (for example if you have forgotten the password, you should clear the CMOS and then reset the password), you should disconnect the RTC battery and press the button for about 3 seconds. This will set back to normal operation mode.

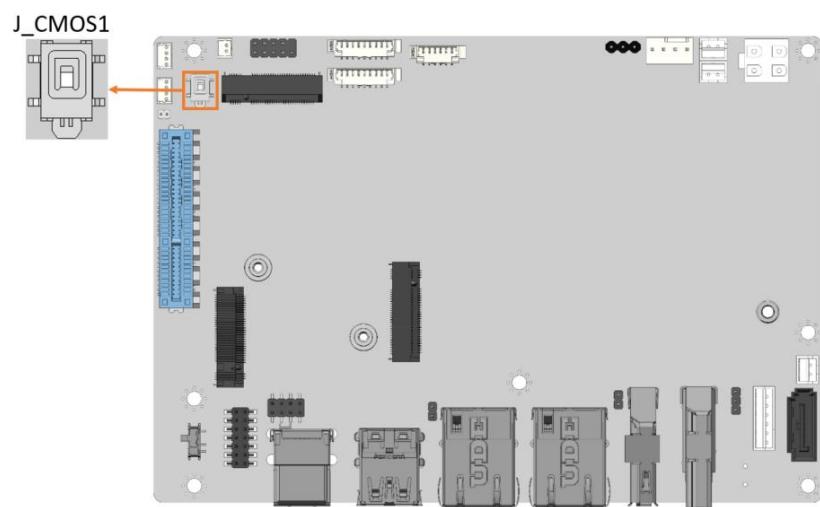

Figure 3-2: Clear CMOS Location

PIN NO.	DESCRIPTION
NC (default)	Keep CMOS Setup (Normal Operation)
Press button	Clear CMOS Setup

Table 3-3: Clear CMOS Pinouts

WAFER-ADL-N SBC

3.2.2 AT/ATX Power Mode Setting

CN Label: J_ATX_AT1

CN Type: Switch

CN Location: See Figure 3-3

CN Pinouts: See Table 3-4

The AT/ATX power mode selection is made through the AT/ATX power mode switch which is shown in Figure 3-3.

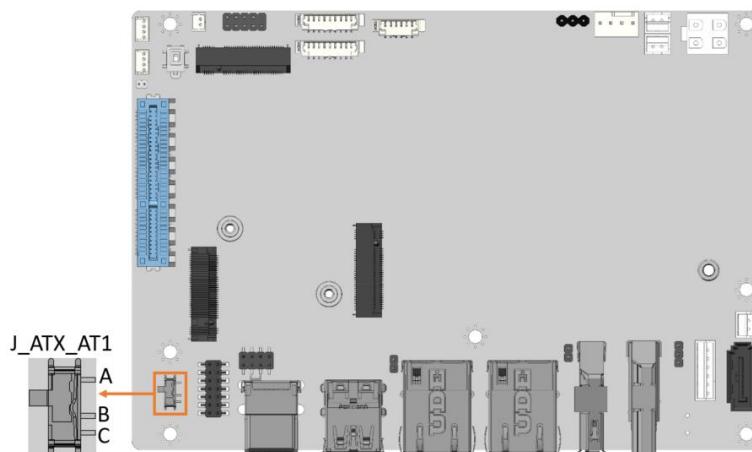

Figure 3-3: AT/ATX Power Mode Switch Locations

PIN NO.	DESCRIPTION
Short A - B	ATX Power Mode (default)
Short B - C	AT Power Mode

Table 3-4: AT/ATX Power Mode Switch Pinouts

3.2.3 Internal Audio Connector

CN Label: J_AUDIO1

CN Type: 10-pin header, p=2.00 mm

CN Location: See Figure 3-4

CN Pinouts: See Table 3-5

The audio connector is connected to external audio devices (AC-KIT-888S-R10) including speakers and microphones for the input and output of audio signals to and from the system.

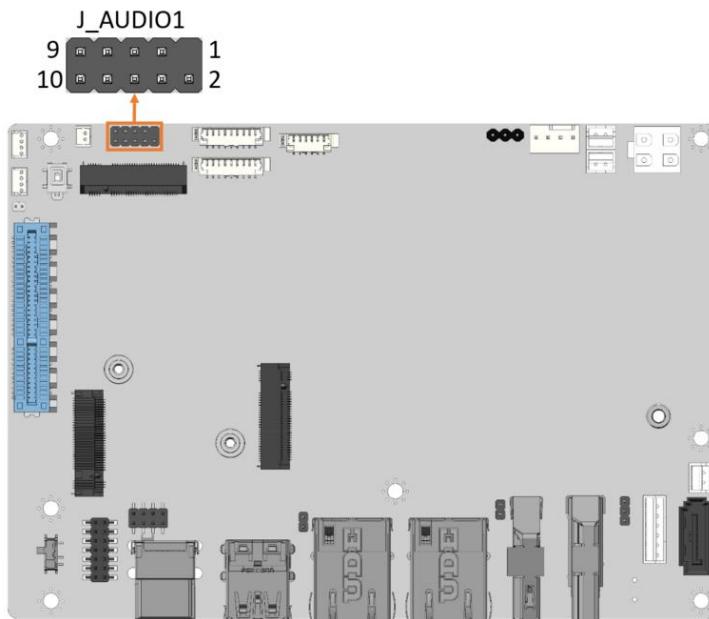

Figure 3-4: Audio Connector Location

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	HDA_SYNC	2	HDA_CLK
3	HDA_SDOUT	4	HDA_SPKR
5	HDA_SDIN	6	HDA_RST#
7	+5V	8	GND
9	+12V	10	GND

Table 3-5: Audio Connector Pinouts

WAFER-ADL-N SBC**3.2.4 ATX 12V Power Connector**

CN Label: PWR1

CN Type: 4-pin Molex, p=4.2 mm

CN Location: See **Figure 3-5**

CN Pinouts: See **Table 3-6**

The connector supports the +12V power supply.

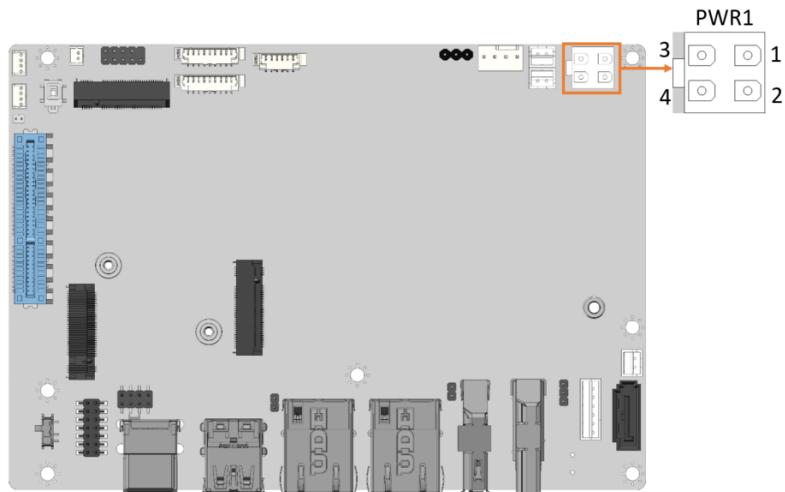

Figure 3-5: ATX 12V Power Connector Location

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	GND	2	GND
3	+12V	4	+12V

Table 3-6: ATX 12V Power Connector Pinouts

3.2.5 RTC Battery Connector

**CAUTION:**

Risk of explosion if battery is replaced by an incorrect type. Only certified engineers should replace the on-board battery.

Dispose of used batteries according to instructions and local regulations.

**NOTE:**

It is recommended to attach the RTC battery onto the system chassis in which the WAFER-ADL-N is installed.

CN Label: BAT1

CN Type: 2-pin wafer, p=1.25 mm

CN Location: See **Figure 3-6**

CN Pinouts: See **Table 3-7**

The battery connector is connected to the system battery. The battery provides power to the system clock to retain the time when power is turned off.

WAFER-ADL-N SBC

WAFER-ADL-N SBC**3.2.9 Power Button Connector**

CN Label: PWR_BTN1

CN Type: 2-pin wafer, p=2.00 mm

CN Location: See [Figure 3-10](#)

CN Pinouts: See [Table 3-11](#)

The power button connector is connected to a power switch on the system chassis to enable users to turn the system on and off.

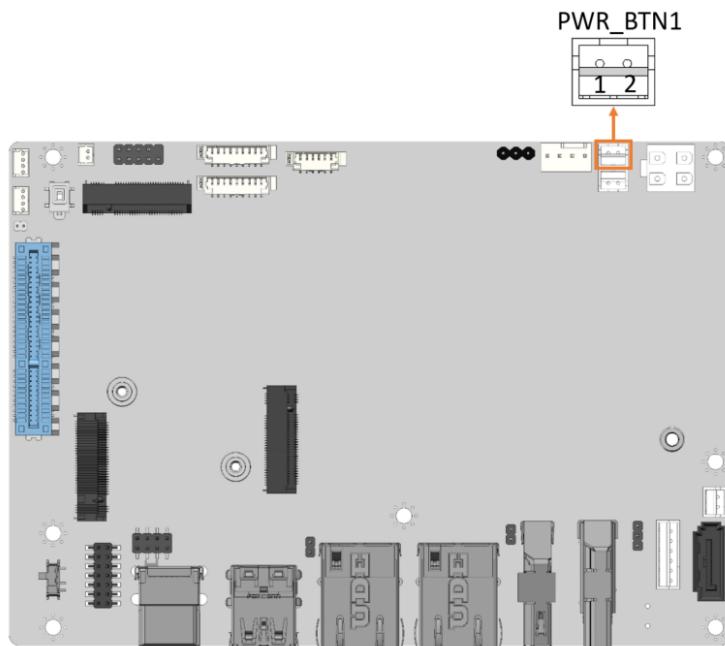

Figure 3-10: Power Button Connector Location

Pin	Description
1	PWR_BTN+
2	PWR_BTN-

Table 3-11: Power Button Connector Pinouts

3.2.10 Reset Button Connector

CN Label: RST_BTN1

CN Type: 2-pin wafer, p=2.00 mm

CN Location: See **Figure 3-11**

CN Pinouts: See **Table 3-12**

The reset button connector is connected to a reset switch on the system chassis to enable users to reboot the system when the system is turned on.

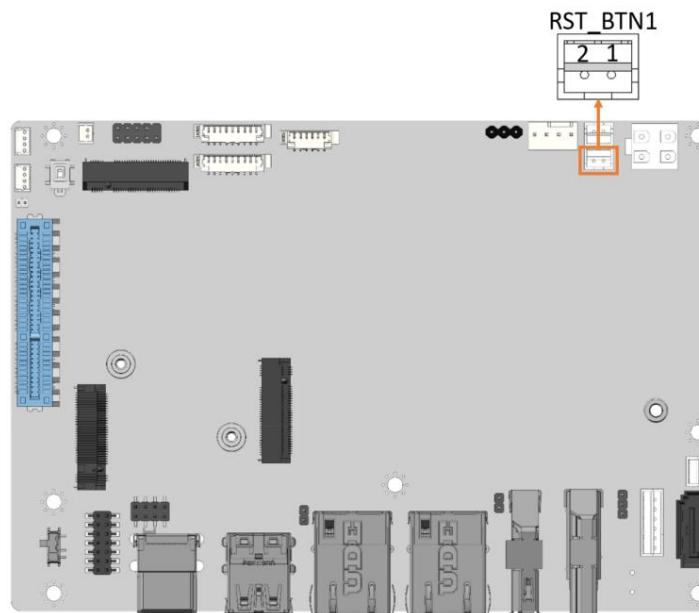

Figure 3-11: Reset Button Connector Location

Pin	Description
1	RESET+
2	RESET-

Table 3-12: Reset Button Connector Pinout

WAFER-ADL-N SBC**3.2.11 RS-232 Serial Port Connector****CN Label:** COM1, COM2**CN Type:** 9-pin wafer, p=1.25 mm**CN Location:** See **Figure 3-12****CN Pinouts:** See **Table 3-13**

The serial connector provides RS-232/422/485 connection.

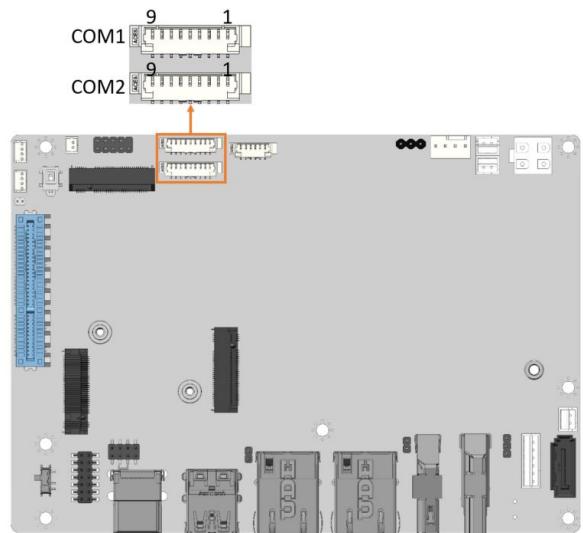

Figure 3-12: RS-232/422/485 Serial Port Connector Location

3.2.12 SATA 6Gb/s Drive Connector

CN Label: S_ATA1

CN Type: 7-pin SATA connector

CN Location: See Figure 3-13

CN Pinouts: See Table 3-14

The SATA 6Gb/s drive connector is connected to a SATA 6Gb/s drive. The SATA 6Gb/s drive transfers data at speeds as high as 6Gb/s.

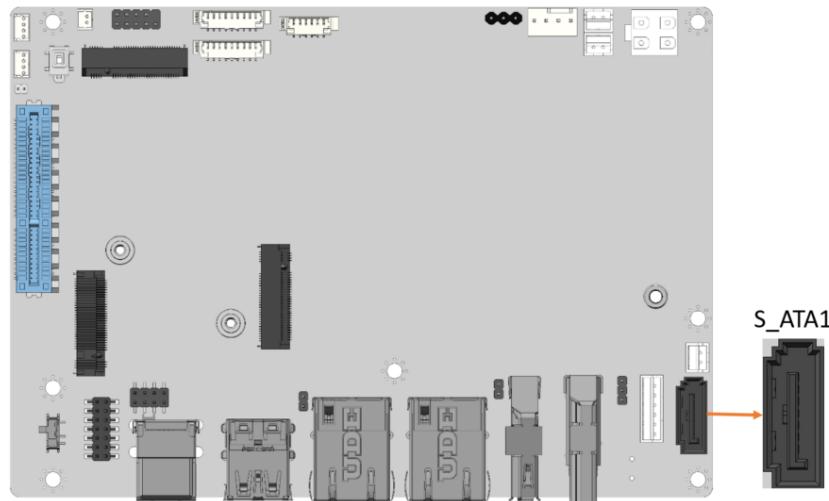

Figure 3-13: SATA 6Gb/s Drive Connectors Location

Installation

4.1 Anti-static Precautions

WARNING:

Failure to take ESD precautions during the installation of the WAFER-ADL-N may result in permanent damage to the WAFER-ADL-N and severe injury to the user.

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the WAFER-ADL-N. Dry climates are especially susceptible to ESD. It is therefore

WAFER-ADL-N SBC

critical that whenever the WAFER-ADL-N or any other electrical component is handled, the following anti-static precautions are strictly adhered to.

- **Wear an anti-static wristband:** Wearing a simple anti-static wristband can help to prevent ESD from damaging the board.
- **Self-grounding** Before handling the board, touch any grounded conducting material. During the time the board is handled, frequently touch any conducting materials that are connected to the ground.
- **Use an anti-static pad:** When configuring the WAFER-ADL-N, place it on an anti-static pad. This reduces the possibility of ESD damaging the WAFER-ADL-N.
- **Only handle the edges of the PCB:** When handling the PCB, hold the PCB by the edges.

4.2 Installation Considerations

NOTE:

The following installation notices and installation considerations should be read and understood before installation. All installation notices must be strictly adhered to. Failing to adhere to these precautions may lead to severe damage and injury to the person performing the installation.

WARNING:

The installation instructions described in this manual should be carefully followed in order to prevent damage to the WAFER-ADL-N, WAFER-ADL-N components and injury to the user.

Before and during the installation please **DO** the following:

- Read the user manual:

- The user manual provides a complete description of the WAFER-ADL-N installation instructions and configuration options.
- Wear an electrostatic discharge cuff (ESD):
 - Electronic components are easily damaged by ESD. Wearing an ESD cuff removes ESD from the body and helps prevent ESD damage.
- Place the WAFER-ADL-N on an antistatic pad:
 - When installing or configuring the motherboard, place it on an antistatic pad. This helps to prevent potential ESD damage.
- Turn all power to the WAFER-ADL-N off:
 - When working with the WAFER-ADL-N, make sure that it is disconnected from all power supplies and that no electricity is being fed into the system.

Before and during the installation of the WAFER-ADL-N **DO NOT**:

- Remove any of the stickers on the PCB board. These stickers are required for warranty validation.
- Use the product before verifying all the cables and power connectors are properly connected.
- Allow screws to come in contact with the PCB circuit, connector pins, or its components.

4.3 M.2 Module Installation

To install the M.2 expansion card, Please follow the steps below.

Step 1: Locate the M.2 module slot. See **Chapter 3**.

Step 2: Remove the retention screw secured on the motherboard.

Step 3: Line up the notch on the module with the notch on the slot. Slide the M.2 module into the socket at an angle of about 20° (**Figure 4-1**).

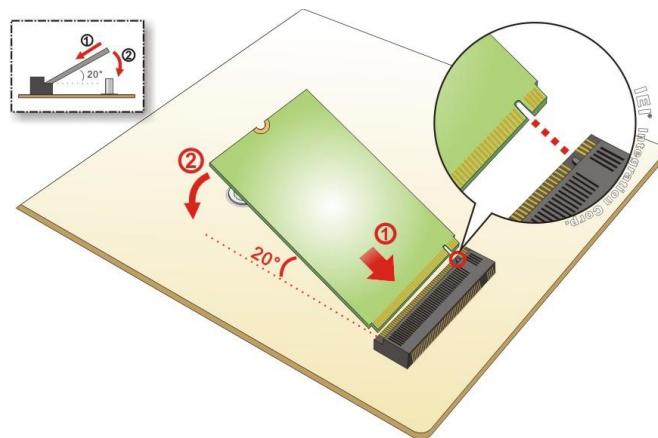

WAFER-ADL-N SBC

Figure 4-1: Inserting The M.2 Module Into The Slot At An Angle

Step 4: Secure the M.2 module with the previously removed retention screw (**Figure 4-2**).

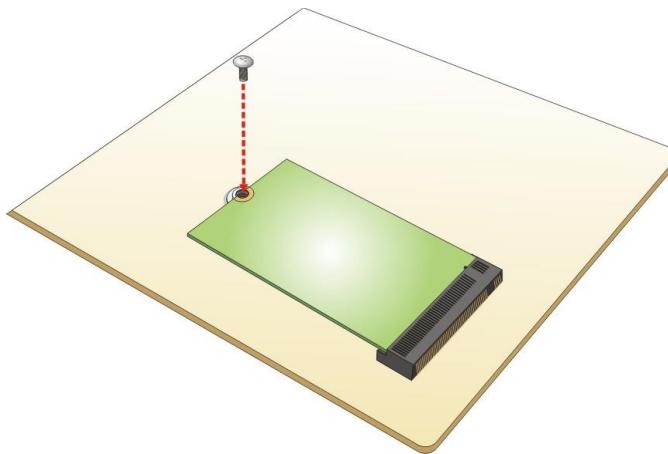

Figure 4-2: Securing The M.2 Module

4.4 Chassis Installation

4.4.1 Heat Spreader

WARNING:

The heat spreader installed on the WAFER-ADL-N can only serve as a heat conductor, which needs additional heat dissipation mechanism to achieve suitable thermal condition. DO NOT put the WAFER-ADL-N with the heat spreader directly on a surface that cannot dissipate system heat, and never run the WAFER-ADL-N without the heat spreader secured to the board.

When the WAFER-ADL-N is shipped, it is secured to a heat spreader with five retention screws. The heat spreader must have a direct contact with a heat dissipation surface to ensure stable operation. In addition, a thin layer of thermal paste has to be applied onto the heat dissipation surface where it contacts the heat spreader.

Figure 4-3: Heat Sink Retention Screws

WAFER-ADL-N SBC

IEI also provides two thermal solutions for customers to choose.

IEI has developed a highly efficient thermal solution for the 3.5" motherboard - IEI Heat Conduction Casing (IHCC). With its well-design structure, the IHCC can effectively improve heat transfer performance and cut time-to-market. It completely joints with the heat spreader for better CPU heat transfer in 0°C–60°C operating temperature using active cooling (P/N: CM-WAFER-WOF-R10, see **Figure 4-4**), and in 0°C–45°C operating temperature using passive cooling (P/N: CM-WAFER-WOF-R10 see **Figure 4-5**).

Figure 4-4: Passive Cooling

Figure 4-5: Active Cooling

4.5 Riser Card Installation

The WAFER-ADL-N features a PCIe x4 (x2 signal) slot, which is a new design of the WAFER motherboard to expand functionality. By installing an IEI-developed riser card into the PCIe slot, the x2 signal is divided into two x1 slots, offering great configuration flexibility and expandability. Two types of riser cards with different orientation are available, one with slots facing outwards and the other with slots facing inwards.

The outwards-facing riser card (P/N: NWR-L2S-R10), although lower in height, is able to provide better spacing to ensure expansion cards to run at a low temperature. It is ideal for the chassis that is wide enough for the expansion card to be placed.

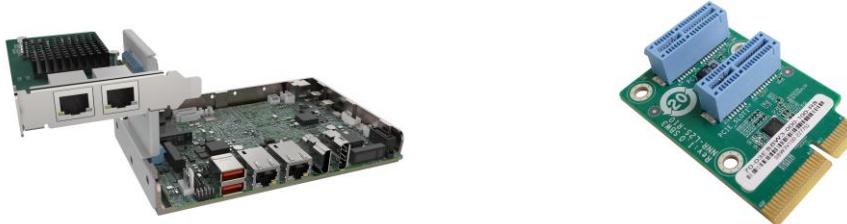

Figure 4-6: Outwards Riser Card Installation Example Figure 4-7: NWR-L2S-R10

The inwards-facing riser card (P/N: NWR-R2S-R10) is designed with higher height to keep a decent space between the expansion cards and the motherboard. This can help improve the airflow and heat transfer within the system. It is suitable for installation where space is limited.

Figure 4-8: Inwards Riser Card Installation Example Figure 4-9: NWR-R2S-R10

Both of the riser cards can be firmly secured to enhance stability by using the L-shaped bracket, in which screw holes are perfectly matched with those on the side of the heat spreader to make it simple and easy to install. See Figure 4-10.

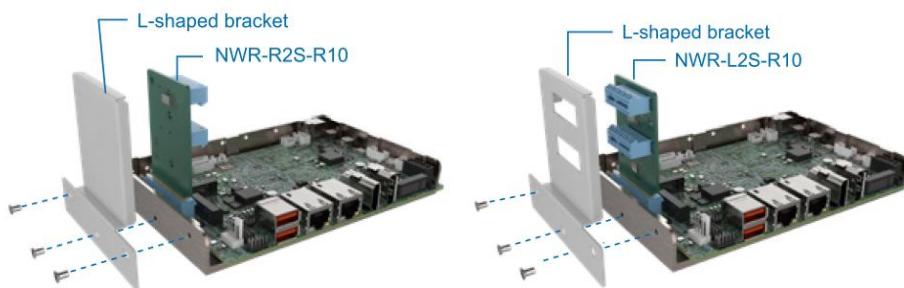

Figure 4-10: L-shaped Bracket Installation Example

4.6 Internal Peripheral Device Connections

This section outlines the installation of peripheral devices to the on-board connectors

4.6.1 AT Power Connection

Follow the instructions below to connect the WAFER-ADL-N to an AT power supply.

WARNING:

Disconnect the power supply power cord from its AC power source to prevent a sudden power surge to the WAFER-ADL-N.

Step 1: Locate the power cable. The power cable is shown in the packing list in **Chapter 2.**

Step 2: Connect the power cable to the motherboard. Connect the 4-pin (2x2) Molex type power cable connector to the power connector on the motherboard. See **Figure 4-11**

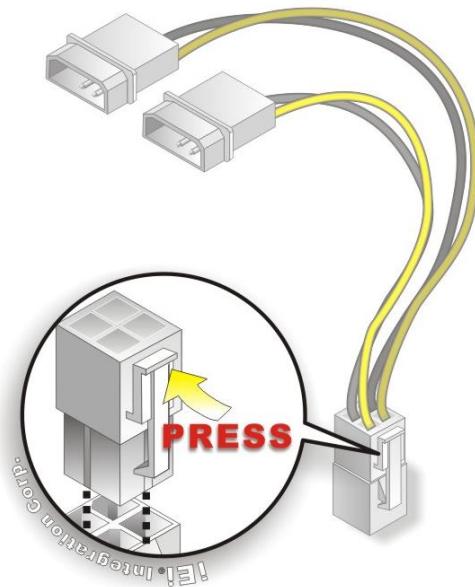

Figure 4-11: Power Cable to Motherboard Connection

Step 3: Connect power cable to power supply. Connect one of the 4-pin (1x4) Molex type power cable connectors to an AT power supply. See **Figure 4-12**

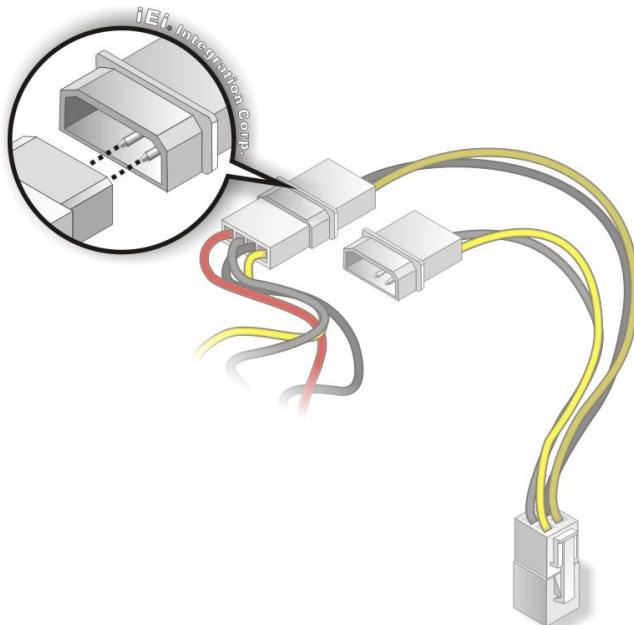

Figure 4-12: Connect Power Cable to Power Supply

4.6.2 7.1 Channel Audio Kit Installation

NOTE:

This item must be ordered separately, and connects to the audio connector. For further information please contact the nearest distributor, reseller or vendor or contact an IEI sales representative directly.

The audio kit attaches to the audio connector. The audio kit provides 7.1 channel audio. To install the audio kit, please refer to the steps below:

Step 1: Connect the cable to the audio kit. Connect the included cable to the audio kit. Make sure pin 1 aligns with the marked pin.

Step 2: Connect the cable to the board. Connect the other end of the cable to the board. Make sure to line up the marked pin 1.

WAFER-ADL-N SBC

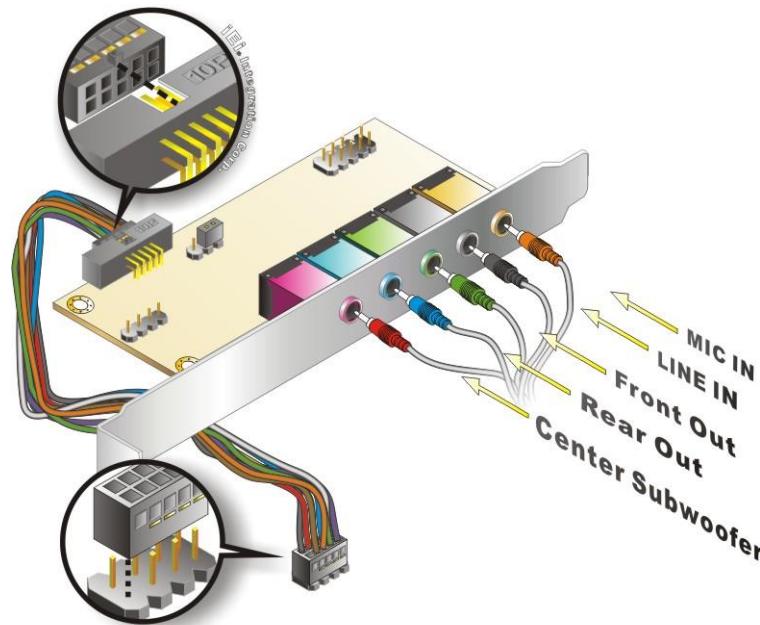

Figure 4-13: 7.1 Channel Audio Kit

Step 3: Mount the audio kit onto the chassis. Once the audio kit is connected to the board, secure the audio kit bracket to the system chassis.

Step 4: Connect the audio devices. Connect speakers and external audio sources to the audio jacks on the audio kit.

Step 5: Install the driver. Install the 7.1 channel audio driver included with the board.

4.6.3 SATA Drive Connection

The WAFER-ADL-N is shipped with a SATA drive cable. To connect the SATA drive to the connector, please follow the steps below.

Step 1: Locate the SATA connector and the SATA power connector. The locations of the connectors are shown in [Chapter 3](#).

Step 2: Insert the cable connector. Insert the cable connector into the on-board SATA drive connector and the SATA power connector. See [Figure 4-14](#).

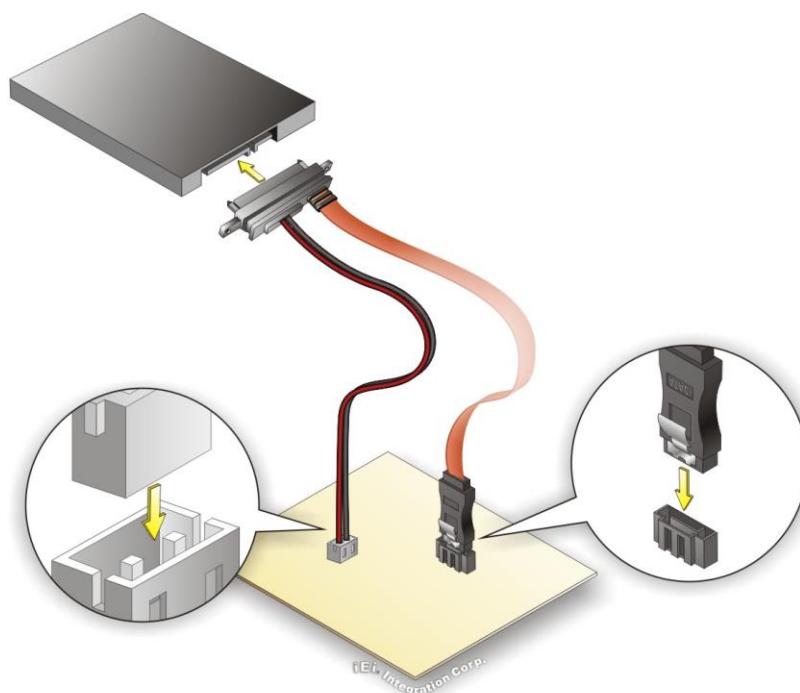

Figure 4-14: SATA Drive Cable Connection

Step 3: Connect the cable to the SATA disk. Connect the connector on the other end of the cable to the connector at the back of the SATA drive.

Step 4: To remove the SATA cable from the SATA connector, press the clip on the connector at the end of the cable.

4.7 Software Drivers

4.7.1 Available Drivers

All the drivers for the WAFER-ADL-N are available on IEI Resource Download Center (<https://download.ieeworld.com>). Type WAFER-ADL-N and press Enter to find all the relevant software, utilities, and documentation.

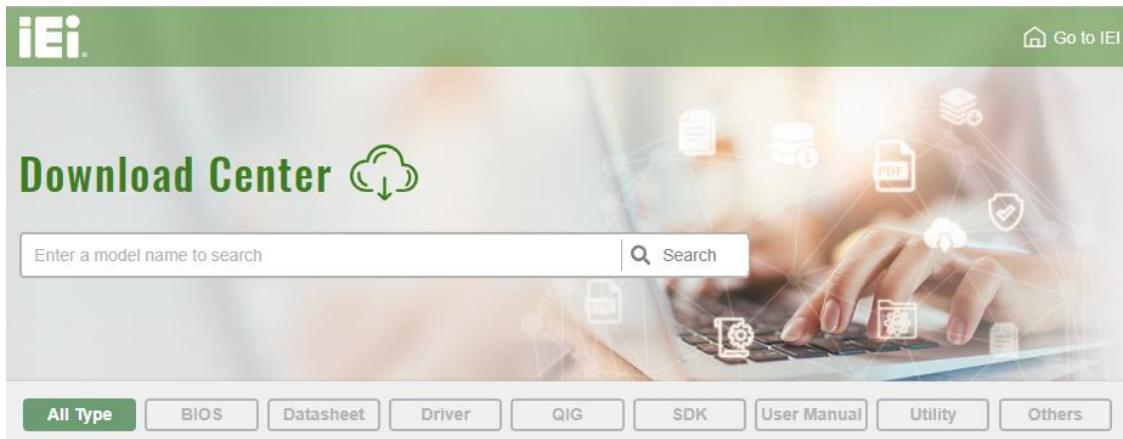

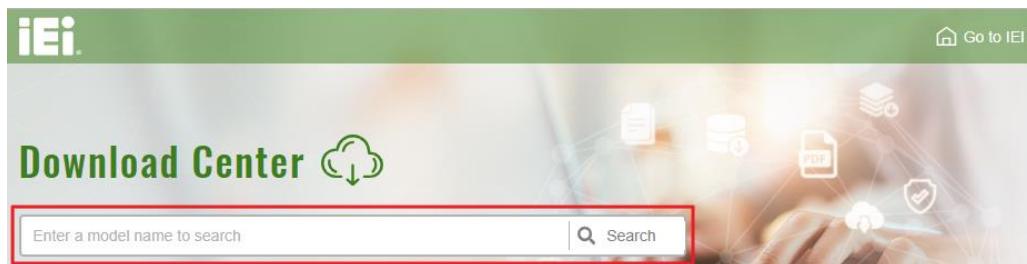

Figure 4-15: IEI Resource Download Center

4.7.2 Driver Download

To download drivers from IEI Resource Download Center, follow the steps below.

Step 1: Go to <https://download.ieeworld.com>. Type WAFER-ADL-N and press Enter.

Step 2: All product-related software, utilities, and documentation will be listed. You can choose **Driver** to filter the result.

BIOS

5.1 Introduction

The BIOS is programmed onto the BIOS chip. The BIOS setup program allows changes to certain system settings. This chapter outlines the options that can be changed.

NOTE:

Some of the BIOS options may vary throughout the life cycle of the product and are subject to change without prior notice.

5.1.1 Starting Setup

The UEFI BIOS is activated when the computer is turned on. The setup program can be activated in one of two ways.

1. **Using keyboard:** Press the **DEL** or **F7** as soon as the system is turned on.
2. **Using touchscreen:** Press the **Setup** button on the upper right corner of the BIOS Starting Menu.

If the message disappears before the **DEL** or **F7** key is pressed, restart the computer and try again, then the BIOS Starting Menu will appear. Select "Setup" and press Enter to get into the BIOS Setup.

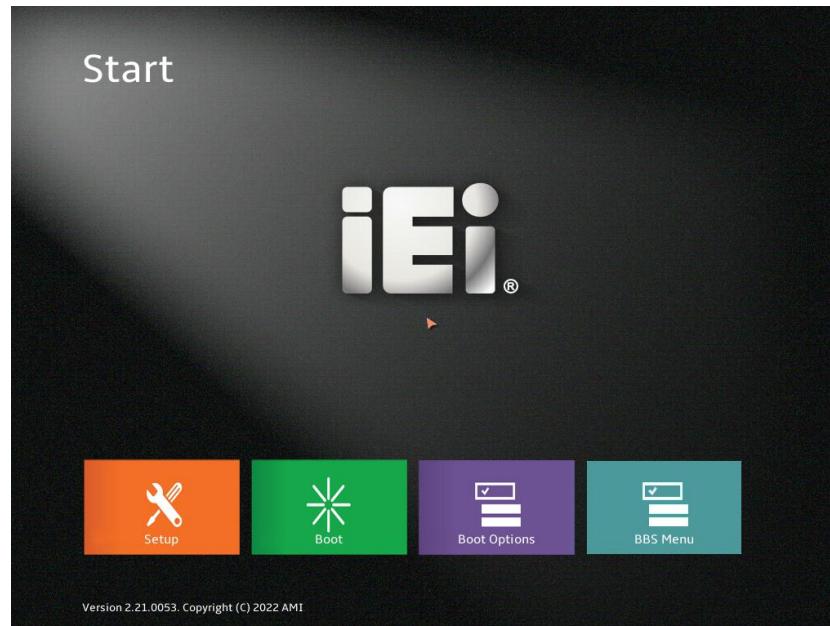

Figure 5-1: BIOS Starting Menu

5.1.2 Using Setup

The BIOS Setup menu can be navigated by using a keyboard or a touchscreen.

5.1.2.1 Keyboard Navigation

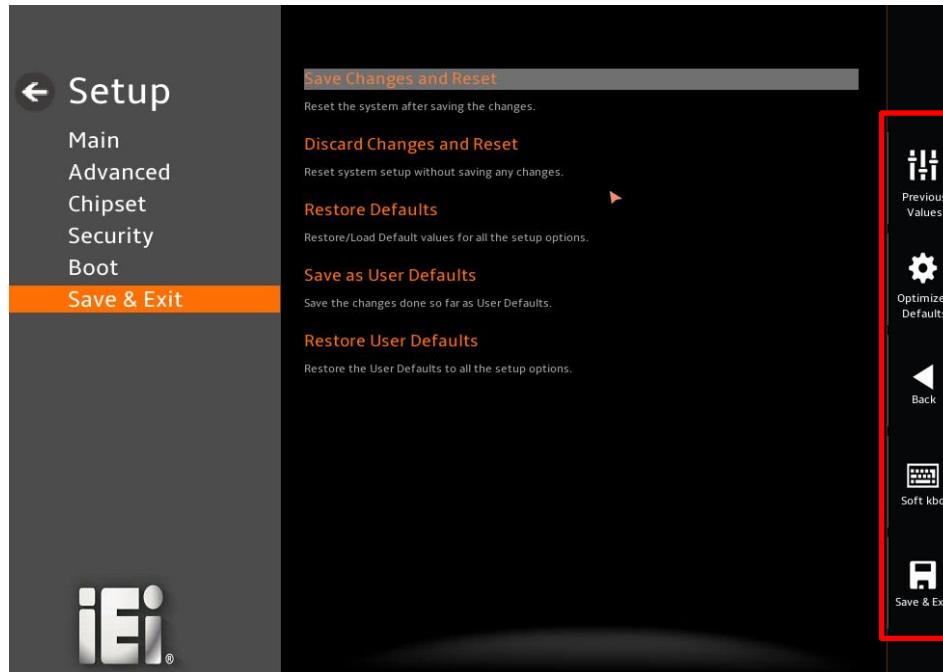

For keyboard navigation, use the navigation keys shown in **Table 5-1**.

Key	Function
Up arrow	Move to previous item
Down arrow	Move to next item
Left arrow	Move to the item on the left hand side
Right arrow	Move to the item on the right hand side
+	Increase the numeric value or make changes
-	Decrease the numeric value or make changes
Page Up	Move to the previous page
Page Dn	Move to the next page
Esc	Main Menu – Quit and not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu
F1	General help, only for Status Page Setup Menu and Option Page Setup Menu
F2	Load previous values
F3	Load optimized defaults
F4	Save changes and Exit BIOS
<K>	Scroll help area upwards
<M>	Scroll help area downwards

Table 5-1: BIOS Navigation Keys

5.1.2.2 Touch Navigation

For touchscreen navigation, use the on-screen navigation keys shown below.

On-screen Button	Function
Previous Values	Load the last value you set.
Optimized Defaults	Load the factory default values in order to achieve the best performance.
Back	Return to the previous menu.
Soft kbd	Display the on-screen keyboard.
Save & Exit	Save the changes made to the BIOS options and reset the system.

Table 5-2: BIOS On-screen Navigation Keys

5.1.3 Getting Help

When **F1** is pressed a small help window describing the appropriate keys to use and the possible selections for the highlighted item appears. To exit the Help Window, press the **Esc** key.

5.1.4 Unable to Reboot after Configuration Changes

If the computer cannot boot after changes to the system configuration is made, CMOS defaults. Use the clear CMOS button described in **Chapter 4**.

5.1.5 BIOS Menu Bar

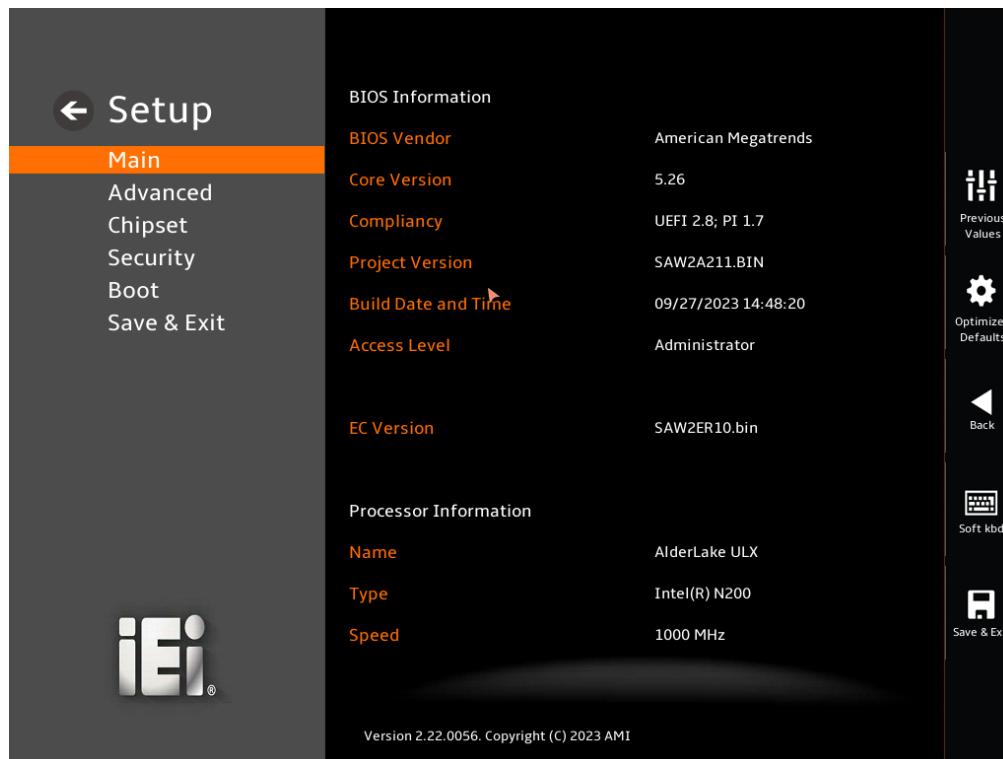

The **menu bar** on top of the BIOS screen has the following main items:

- Main – Changes the basic system configuration.
- Advanced – Changes the advanced system settings.
- Chipset – Changes the chipset settings.
- Security – Sets User and Supervisor Passwords.
- Boot – Changes the system boot configuration.
- Save & Exit – Selects exit options and loads default settings

The following sections completely describe the configuration options found in the menu items at the top of the BIOS screen and listed above.

5.2 Main

The **Main** BIOS menu (**BIOS Menu 1 & BIOS Menu 2**) appears when the **BIOS Setup** program is entered. The **Main** menu gives an overview of the basic system information.

BIOS Menu 1: Main (1/2)

WAFER-ADL-N SBC

BIOS Menu 2: Main (2/2)

→ BIOS Information

The **BIOS Information** lists a brief summary of the BIOS. The fields in **BIOS Information** cannot be changed. The items shown in the system overview include:

- **BIOS Vendor:** Installed BIOS vendor
- **Core Version:** Current BIOS version
- **Compliance:** Current UEFI & PI version
- **Project Version:** the board version
- **Build Date and Time:** Date the current BIOS version was made
- **EC Version:** Current EC version
- BIOS Information

→ Compute Die Information

The **Compute Die Information** lists a brief summary of the Processor. The fields in **Compute Die Information** cannot be changed. The items shown in the system overview include:

- **Name:** Displays the Processor Details
- **Type:** Displays the Processor Type
- **Speed:** Displays the Processor Speed
- **ID:** Displays the Processor ID
- **Stepping:** Displays the Processor Stepping
- **Number of Processors:** Displays number of CPU cores
- **Microcode Revision:** CPU Microcode Revision
- **Total Memory:** Total Memory in the System
- **Memory Data Rate:** Displays the Data Rate of Memory

→ **PCH Information**

The **PCH Information** lists a brief summary of the PCH. The fields in **PCH Information** cannot be changed. The items shown in the system overview include:

- **Name:** Displays the PCH Name
- **Stepping:** Displays the PCH Stepping
- **ME FW Version:** Displays the ME Firmware Version
- **ME Firmware SKU:** Displays the ME Firmware SKU

The System Overview field also has two user configurable fields:

→ **System Date [xx/xx/xx]**

Use the **System Date** option to set the system date. Manually enter the day, month and year.

→ **System Time [xx:xx:xx]**

Use the **System Time** option to set the system time. Manually enter the hours, minutes and seconds.

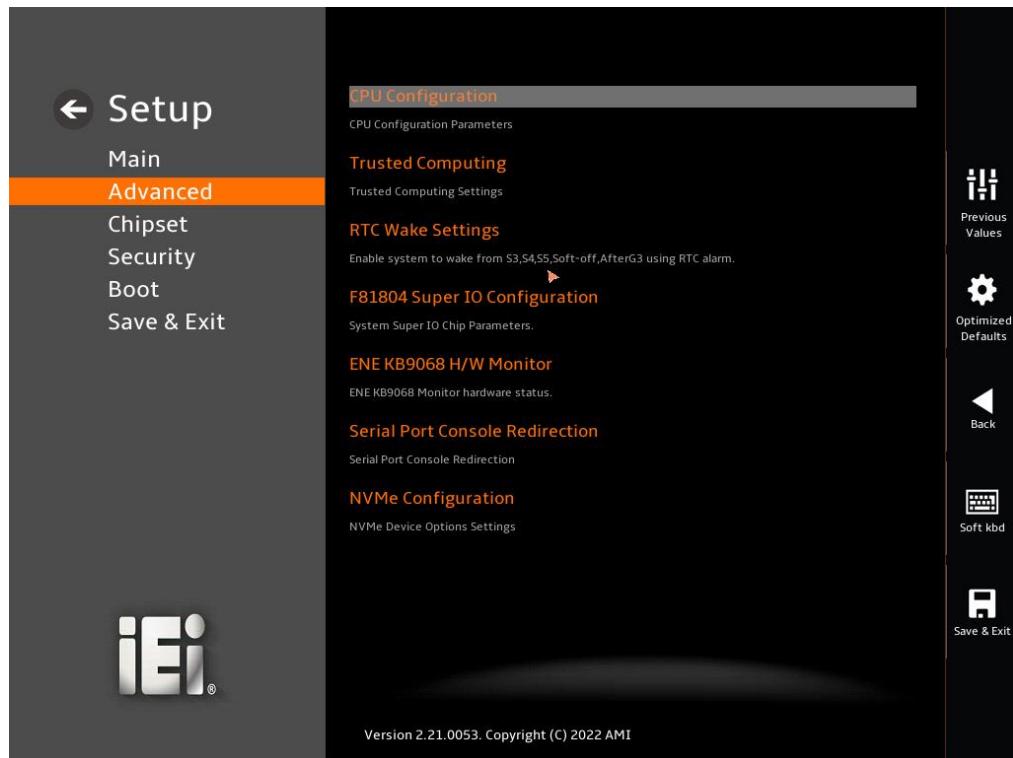

5.3 Advanced

Use the **Advanced** menu (**BIOS Menu 3**) to configure the CPU and peripheral devices through the following sub-menus:

WARNING!

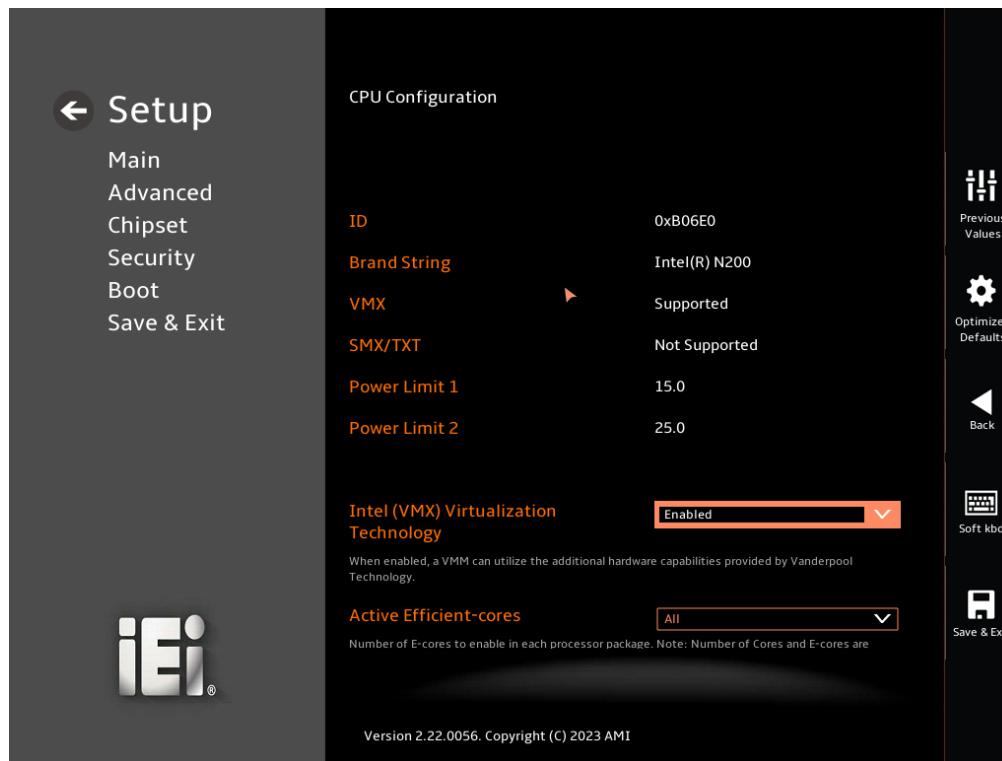

Setting the wrong values in the sections below may cause the system to malfunction. Make sure that the settings made are compatible with the hardware.

BIOS Menu 3: Advanced

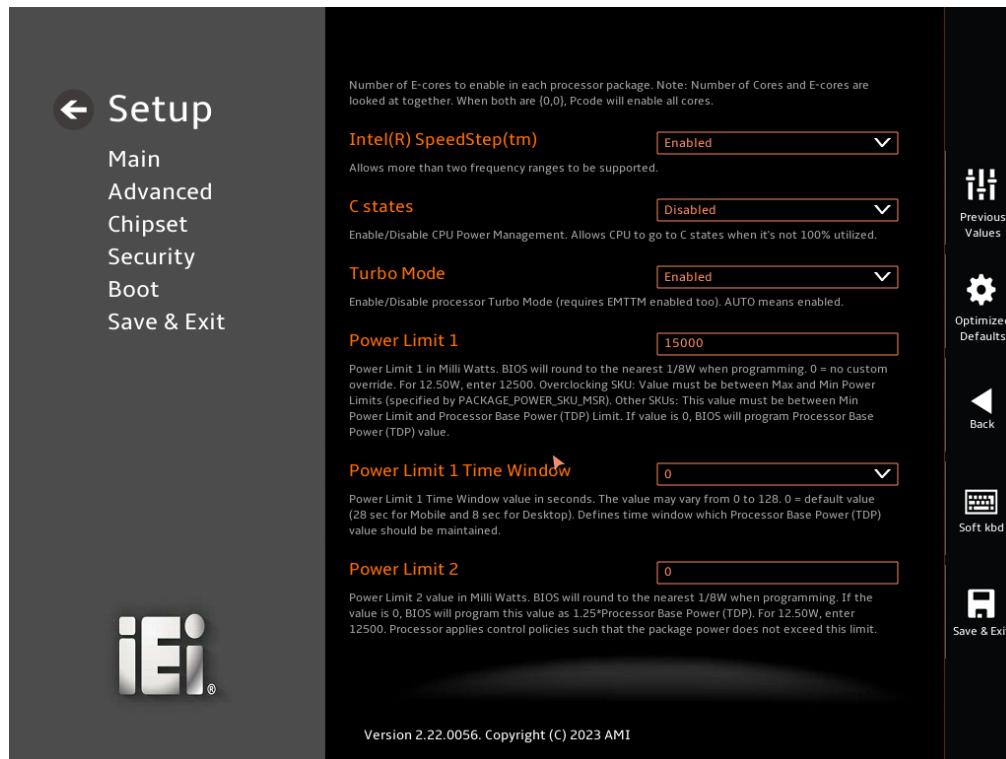

5.3.1 CPU Configuration

Use the **CPU Configuration** menu (**BIOS Menu 4 & BIOS Menu 5**) to view detailed CPU specifications or enable the Intel Virtualization Technology.

BIOS Menu 4: CPU Configuration (1/2)

WAFER-ADL-N SBC

**BIOS Menu 5: CPU Configuration (2/2)****→ Intel (VMX) Virtualization Technology [Enabled]**

Use the **Intel (VMX) Virtualization Technology** option to enable or disable virtualization on the system. When combined with third party software, Intel® Virtualization technology allows several OSs to run on the same system at the same time.

→ Disabled Disables Intel Virtualization Technology.

→ Enabled **DEFAULT** Enables Intel Virtualization Technology.

→ Active Processor Cores [All]

Use the **Active Processor Cores** BIOS option to enable numbers of cores in the processor package.

→ All **DEFAULT** Enable all cores in the processor package.

→ 1 Enable one core in the processor package.

→ 2 Enable two cores in the processor package.

- 3 Enable three cores in the processor package.

→ **Intel® Speedstep [Enable]**

Use the **Intel® Speedstep** option to enable more than two frequency ranges to be supported.

- **Disabled** Disables more than two frequency ranges
- **Enabled** **DEFAULT** Enables more than two frequency ranges

→ **C states [Disabled]**

Use the **C states** option to enable or disable the CPU Power Management.

- **Disabled** **DEFAULT** Disables CPU to go to C states when it's not 100% utilized.
- **Enabled** Enables CPU to go to C states when it's not 100% utilized.

→ **Turbo Mode [Enabled]**

Use the **Turbo Mode** option to enable or disable Turbo Mode which requires Intel Speed Step or Intel Speed Shift to be available and enabled.

- **Disabled** Disables Turbo Mode Technology
- **Enabled** **DEFAULT** Enables Turbo Mode Technology

→ **Power Limit 1**

Use the **Power Limit 1** to set Power Limit in Milli Watts. BIOS will round to the nearest 1/8W when programming. 0 = no custom override. For 12.50W, enter 12500. Overclocking SKU: Value must be between Min and Max Power Limits. Other SKUs: This value must be between Min Power limit and TDP Limit. If value is 0, BIOS will use TDP value.

WAFER-ADL-N SBC

→ Power Limit 1 Time Window

Power Limit 1 Time Window value in second. The value may vary from 0 to 128.0, 0 = default value (28 sec for mobile and 8 sec for desktop). Defines time window which TDP value should be maintained.

→ Power Limit 2

Use the **Power Limit 2** to set Power Limit in Max Watts. BIOS will round to the nearest 1/8W when programming. If the value is 0, BIOS will program this value as 1.25*TDP. For 12.50W, enter 12500. Processor applies control policies such that the package power does not exceed this limit.

5.3.2 Trusted Computing

Use the **Trusted Computing** menu (**BIOS Menu 6**) to configure settings related to the Trusted Computing Group (TCG) Trusted Platform Module (TPM).

BIOS Menu 6: Trusted Computing

→ TPM Support [Enable]

Use the **TPM Support** option to configure support for the TPM.

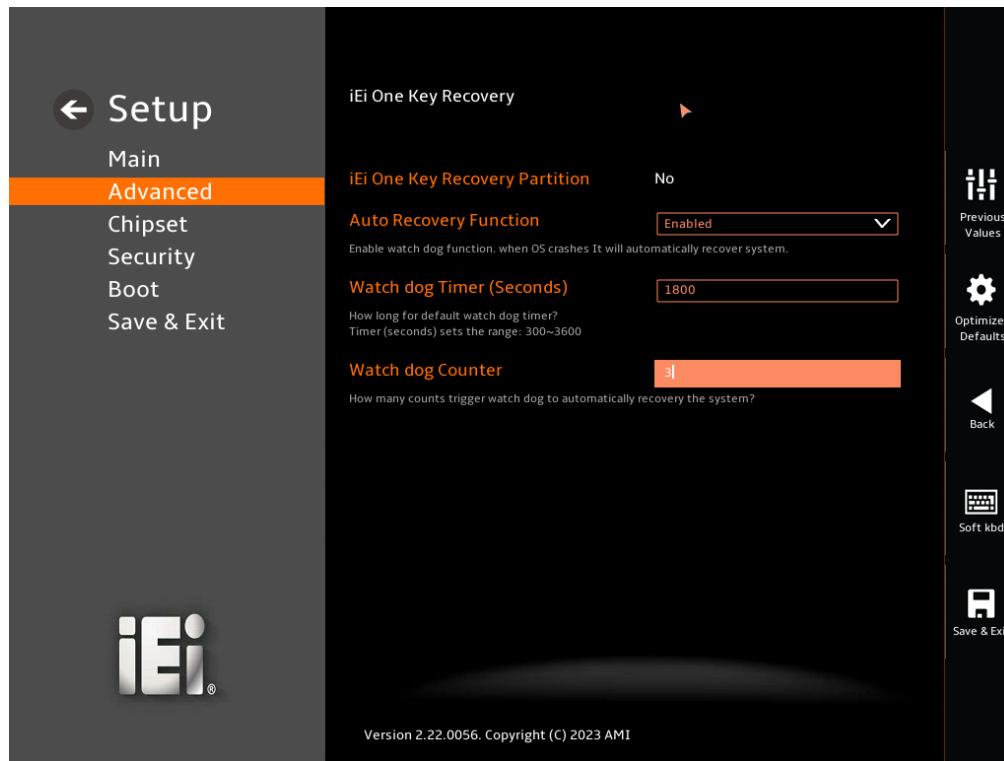

- | | |
|--------------------------------|--------------------------|
| → Disable | TPM support is disabled. |
| → Enable DEFAULT | TPM support is enabled. |

→ Pending Operation [None]

Use the **Pending Operation** option to schedule an operation for the security device.

- | | |
|------------------------------|-------------------------------|
| → None DEFAULT | TPM information is previous.S |
| → TPM Clear | TPM information is cleared |

5.3.3 iEI One Key Recovery

BIOS Menu 7: iEI One Key Recovery

→ Auto Recovery Function [Enable]

Use the **Auto Recovery Function** option to enable watch dog function. When OS crashed, it will automatically recover system.

- | | |
|-----------|--|
| → Disable | Auto Recovery Function is disabled |
| → Enable | DEFAULT Auto Recovery Function is enable |

→ Watch dog Timer (Seconds)

Use the **Watch dog Timer** option to set how long the watch dog time for default. The range is from 300s to 3600s.

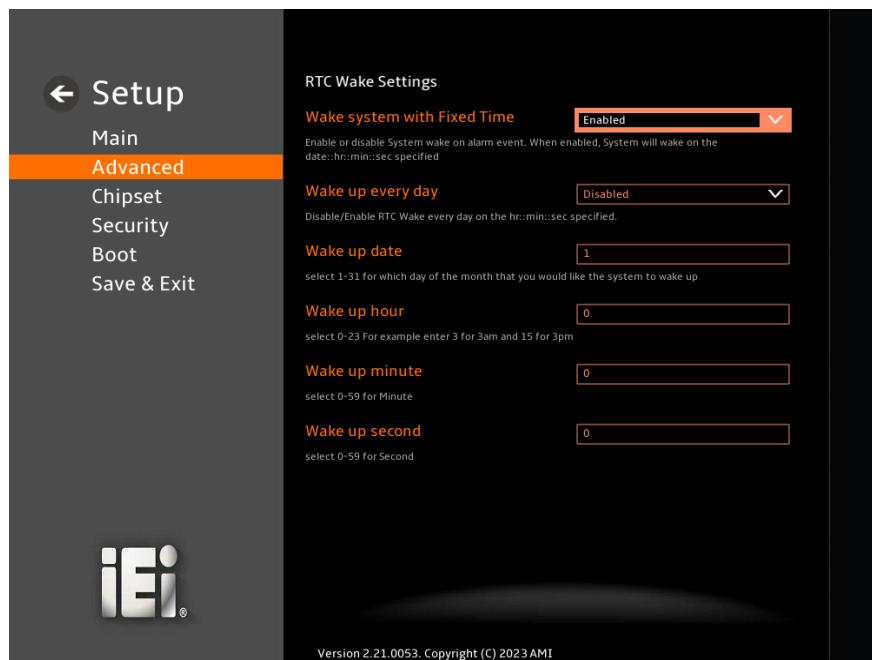

→ Watch dog Counter

Use the **Watch dog Timer** option to set how many counts trigger watch dog to automatically recovery the system

5.3.4 RTC Wake Setting

BIOS Menu 8: RTC Wake Setting (1/2)

BIOS Menu 9: RTC Wake Settings (2/2)

WAFER-ADL-N SBC

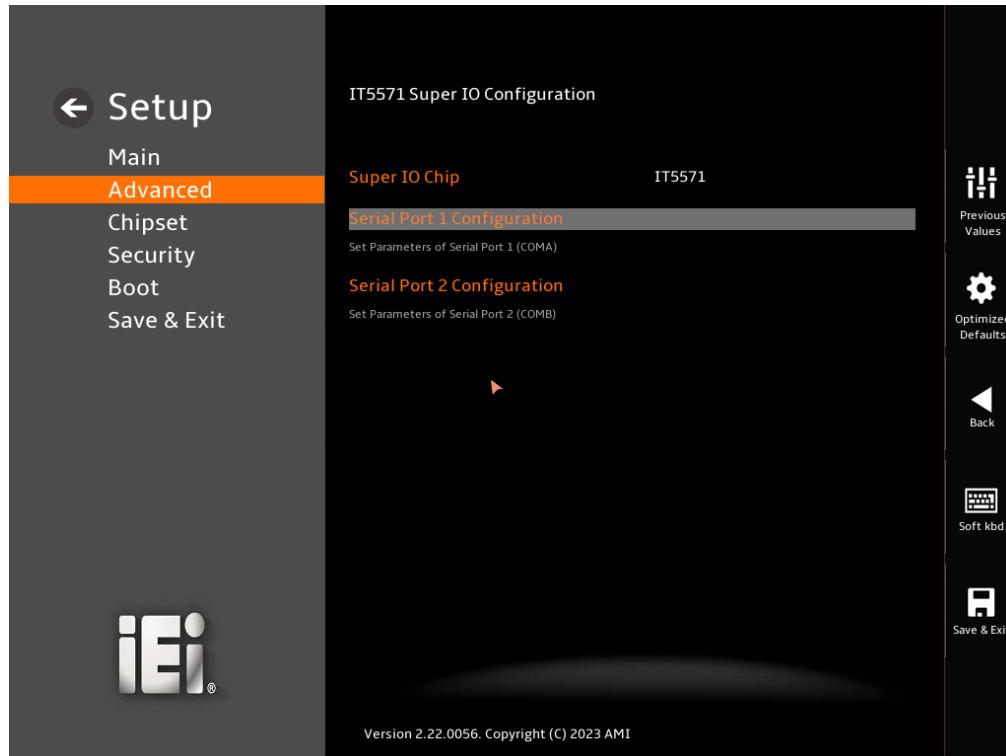

→ Wake system with Fixed Time [Disable]

Use the **Wake system with Fixed Time** option to enable or disable System wake on alarm event. When enable, system will wake on the date.

- | | | |
|------------------|----------------|------------------------------------|
| → Disable | DEFAULT | Disable System wake on alarm event |
| → Enable | | Enable System wake on alarm event |

5.3.5 IT5571 Super IO Configuration

Use the **IT5571 Super IO Configuration** menu (**BIOS Menu 10**) to set or change the configurations for the serial ports.

BIOS Menu 10: IT5571 Super IO Configuration

5.3.5.1 Serial Port 1 Configuration

Use the **Serial Port 1 Configuration** menu (**BIOS Menu 11**) to configure the serial port.

BIOS Menu 11: Serial Port 1 Configuration Menu

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

→ **Disabled** Disable the serial port

→ **Enabled DEFAULT** Enable the serial port

→ **Device Settings**

The **Device Settings** option shows the serial port IO port address and interrupt address.

→ **IO=3F8h;
IRQ=4** Serial Port I/O port address is 3F8h and the interrupt address is IRQ4

WAFER-ADL-N SBC

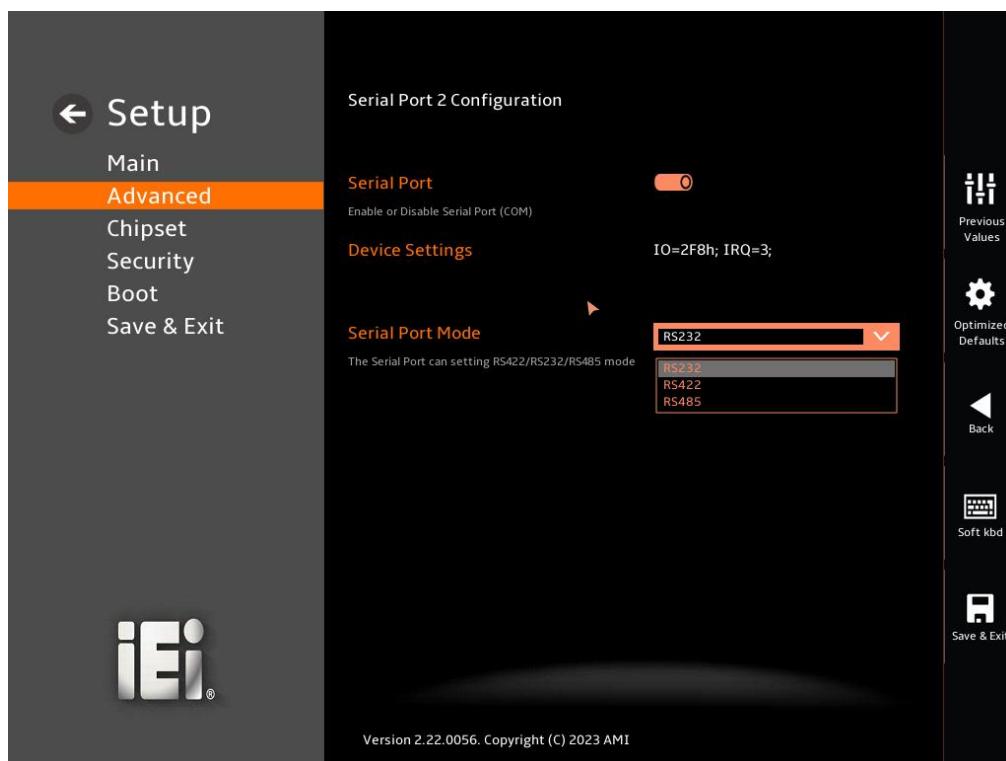

→ Device Mode

Use the **Device Mode** option to change the serial port mode.

→ RS232	DEFAULT	The serial port mode is RS-232
RS422 with Register		The serial port mode is RS-422
RS485 with Register		The serial port mode is RS-485

5.3.5.2 Serial Port 2 Configuration

Use the **Serial Port 2 Configuration** menu (**BIOS Menu 12**) to configure the serial port.

BIOS Menu 12: Serial Port 2 Configuration Menu

→ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

→ Disabled		Disable the serial port
→ Enabled	DEFAULT	Enable the serial port

→ **Device Settings**

The **Device Settings** option shows the serial port IO port address and interrupt address.

- **IO=2F8h;** Serial Port I/O port address is 2F8h and the interrupt
IRQ=3 address is IRQ3

→ **Device Mode**

Use the **Device Mode** option to change the serial port mode.

- | | | |
|----------------------------|----------------|--------------------------------|
| → RS232 | DEFAULT | The serial port mode is RS-232 |
| RS422 with Register | | The serial port mode is RS-422 |
| RS485 with Register | | The serial port mode is RS-485 |

5.3.6 EC H/W Monitor

The EC H/W Monitor menu (**BIOS Menu 13**) contains the smart fan mode configuration submenu and shows the state of H/W real-time operating temperature, fan speeds and system voltages.

BIOS Menu 13: IT5571 Monitor

→ PC Health Status

The following system parameters and values are shown. The system parameters that are monitored are:

- System Temperatures:
 - CPU Temperature
 - System Temperature
- Fan Speeds:
 - Fan1 Speed
- Voltages:
 - CPU_CORE

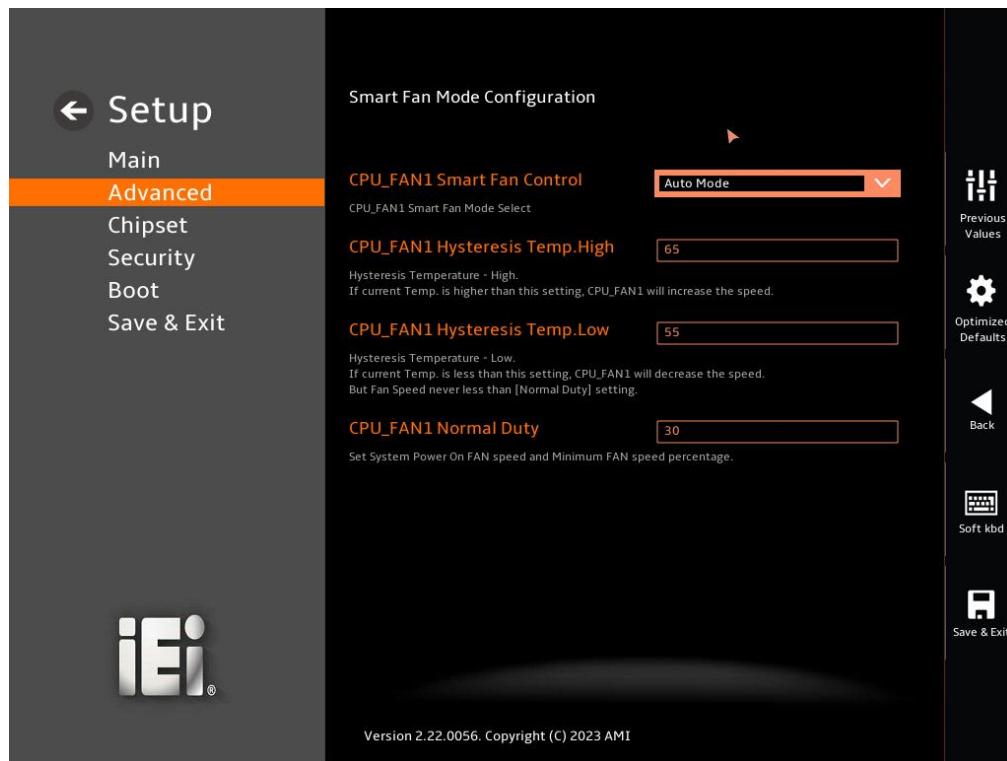

- +12V
- DDR
- +5VSB
- +3.3VSB

→ **Tcc Activation Offset [0]**

Offset from factoryset Tcc activation temprature at which the Thermal Control Circuit must be activated. Tcc will be activated at: Tcc Activation Temp-Tcc Activation Offset.Tcc Activation Offset range is 0 to 63.

5.3.6.1 Smart Fan Mode Configuration

Use the **Smart Fan Mode Configuration** submenu (**BIOS Menu 14**) to configure the CPU/system fan start/off temperature and control mode.

BIOS Menu 14: Smart Fan Mode Configuration

→ CPU_FAN1 Smart Fan Control [Auto Mode]

Use the **CPU_FAN1 Smart Fan Control** option to configure the CPU Smart Fan.

- | | |
|-----------------------------------|---|
| → Manual Mode | The fan spins at the speed set in Manual Mode settings. |
| → Auto Mode DEFAULT | The fan adjusts its speed using Auto Mode settings. |

→ CPU_FAN1 Hysteresis Temp.High

If the CPU temperature is higher than the value set this option, the fan will increase the speed. To set a value, Use the + or – key to change the value or enter a decimal number between 1 and 100.

→ CPU_FAN Off Hysteresis Temp.Low

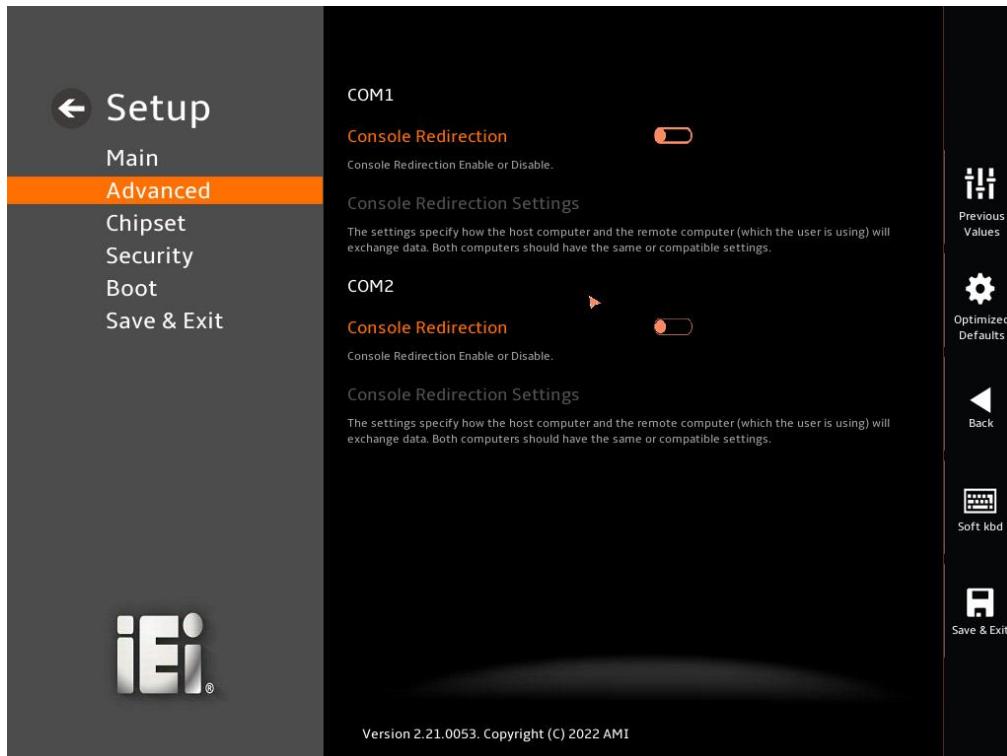

If the CPU temperature is lower than the value set this option, the fan speed change to be lowest. To set a value, Use the + or – key to change the value or enter a decimal number between 1 and 100.

→ CPU_FAN1 Normal Duty

Use the **CPU_FAN1 Normal Duty** option to set System Power On FAN speed and Minimum FAN speed percentage. Use the + or – key to change the value or enter a decimal number between 1 and 100.

5.3.7 Serial Port Console Redirection

The **Serial Port Console Redirection** menu (**BIOS Menu 15**) allows the console redirection options to be configured. Console Redirection allows users to maintain a system remotely by re-directing keyboard input and text output through the serial port.

BIOS Menu 15: Serial Port Console Redirection

→ **Console Redirection [Disabled]**

Use **Console Redirection** option to enable or disable the console redirection function.

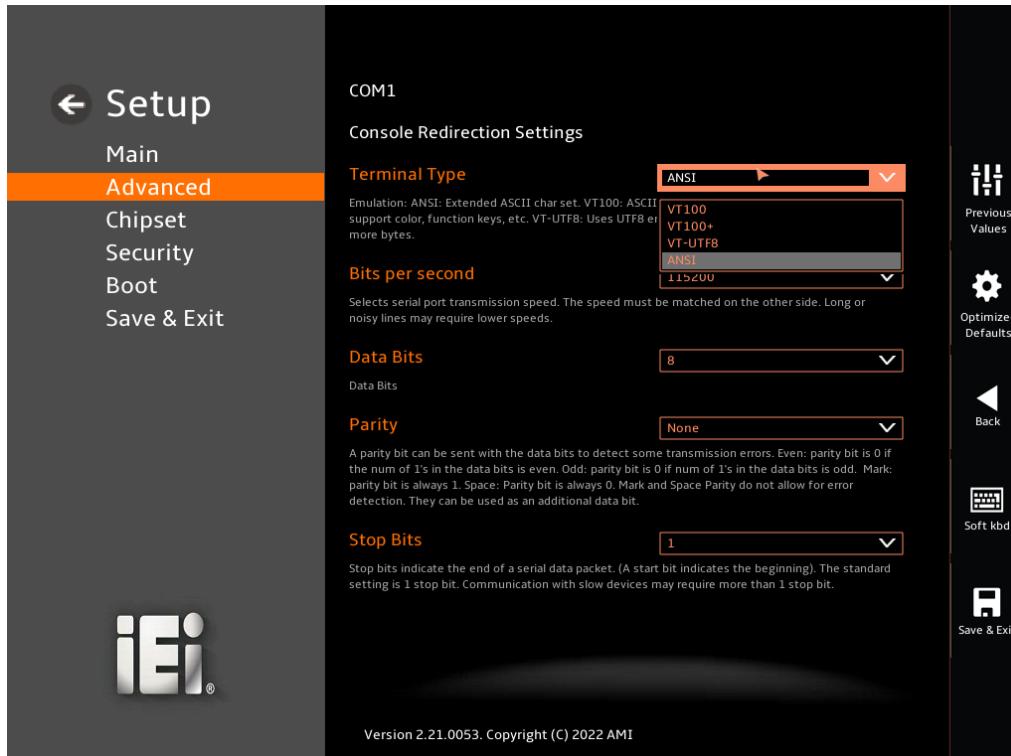

→ **Disabled** **DEFAULT** Disabled the console redirection function

→ **Enabled** Enabled the console redirection function

The **Console Redirection Settings** submenu will be available when the **Console Redirection** option is enabled.

5.3.7.1 Console Redirection Settings

The following options are available in the **Console Redirection Settings** submenu (**BIOS Menu 16**) when the **COM Console Redirection** (for COM1 to COM6) option is enabled.

BIOS Menu 16: COM Console Redirection Settings

→ Terminal Type [ANSI]

Use the **Terminal Type** option to specify the remote terminal type.

- **VT100** The target terminal type is VT100
- **VT100+** The target terminal type is VT100+
- **VT-UTF8** The target terminal type is VT-UTF8
- **ANSI** **DEFAULT** The target terminal type is ANSI

WAFER-ADL-N SBC

→ Bits per second [115200]

Use the **Bits per second** option to specify the serial port transmission speed. The speed must match on the other side. Long or noisy lines may require lower speeds.

- **9600** Sets the serial port transmission speed at 9600.
- **19200** Sets the serial port transmission speed at 19200.
- **38400** Sets the serial port transmission speed at 38400.
- **57600** Sets the serial port transmission speed at 57600.
- **115200** **DEFAULT** Sets the serial port transmission speed at 115200.

→ Data Bits [8]

Use the **Data Bits** option to specify the number of data bits.

- **7** Sets the data bits at 7.
- **8** **DEFAULT** Sets the data bits at 8.

→ Parity [None]

Use the **Parity** option to specify the parity bit that can be sent with the data bits for detecting the transmission errors.

- **None** **DEFAULT** No parity bit is sent with the data bits.
- **Even** The parity bit is 0 if the number of ones in the data bits is even.
- **Odd** The parity bit is 0 if the number of ones in the data bits is odd.
- **Mark** The parity bit is always 1. This option does not allow for error detection.
- **Space** The parity bit is always 0. T This option does not allow for error detection.

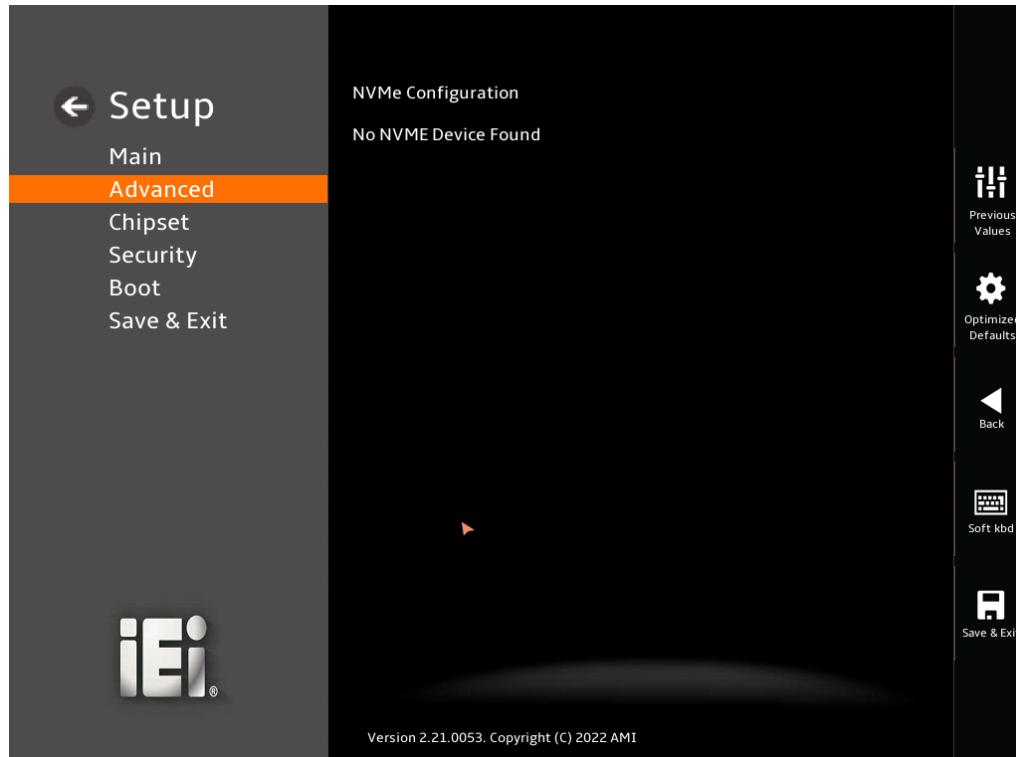

→ Stop Bits [1]

Use the **Stop Bits** option to specify the number of stop bits used to indicate the end of a serial data packet. Communication with slow devices may require more than 1 stop bit.

- 1 **DEFAULT** Sets the number of stop bits at 1.
- 2 Sets the number of stop bits at 2.

5.3.8 NVMe Configuration

Use the **NVMe Configuration (BIOS Menu 17)** menu to display the NVMe controller and device information.

BIOS Menu 17: NVMe Configuration

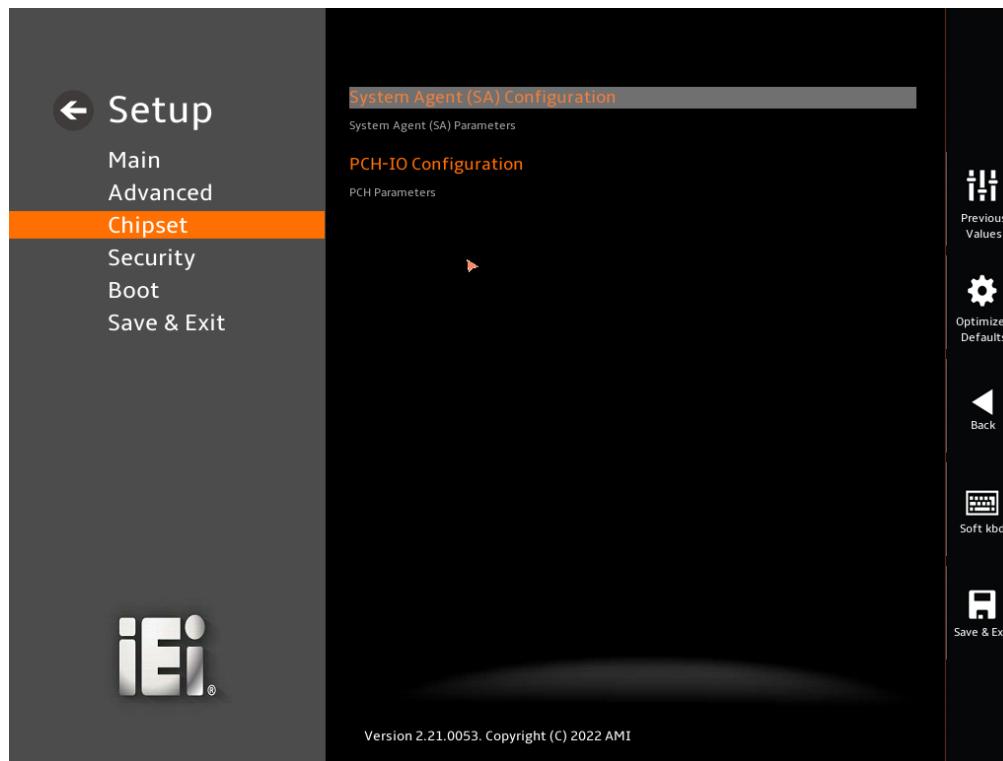

5.4 Chipset

Use the **Chipset** menu (**BIOS Menu 18**) to access the PCH IO and System Agent (SA) configuration menus.

WARNING!

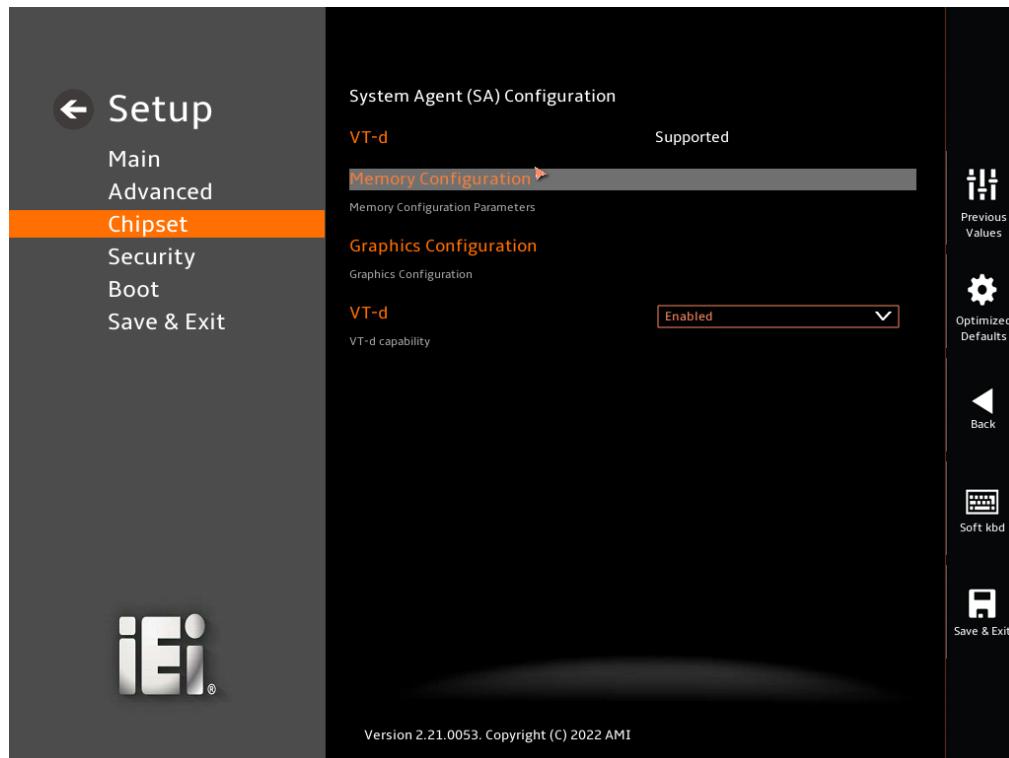

Setting the wrong values for the Chipset BIOS selections in the Chipset BIOS menu may cause the system to malfunction.

BIOS Menu 18: Chipset

5.4.1 System Agent (SA) Configuration

Use the **System Agent (SA) Configuration** menu (**BIOS Menu 19**) to configure the System Agent (SA) parameters.

BIOS Menu 19: System Agent (SA) Configuration

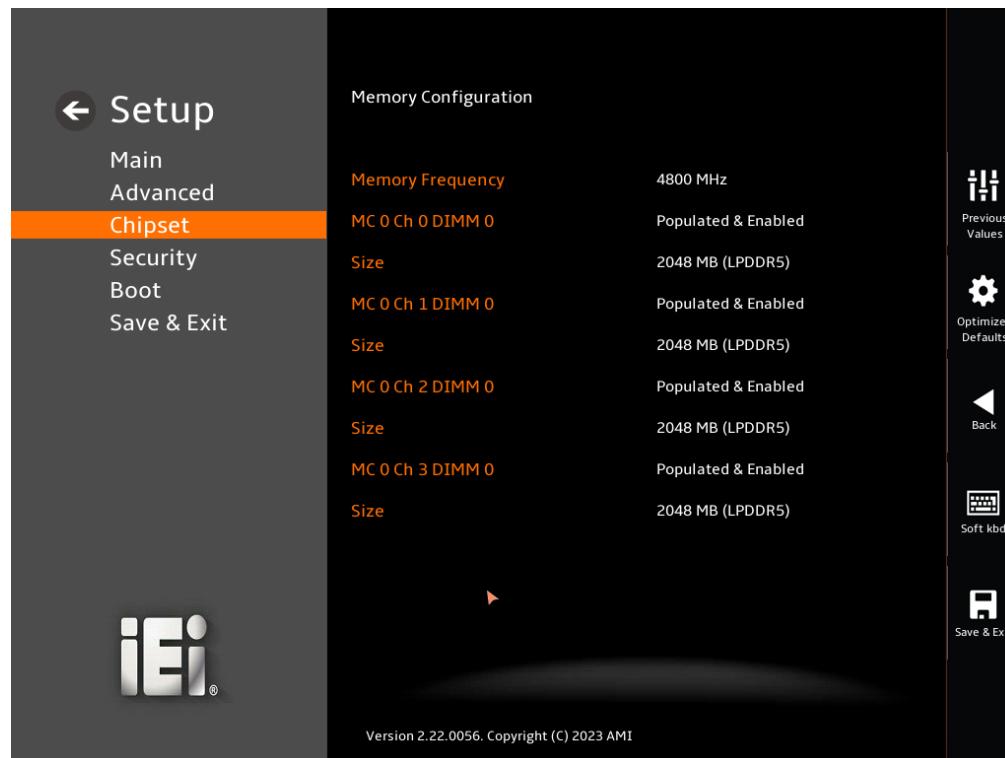

→ VT-d [Enabled]

Use the **VT-d** option to enable or disable the VT-d capability.

- | | |
|---------------------------------|-----------------------------|
| → Disabled | Disable the VT-d capability |
| → Enabled DEFAULT | Enable the VT-d capability |

5.4.1.1 Memory Configuration

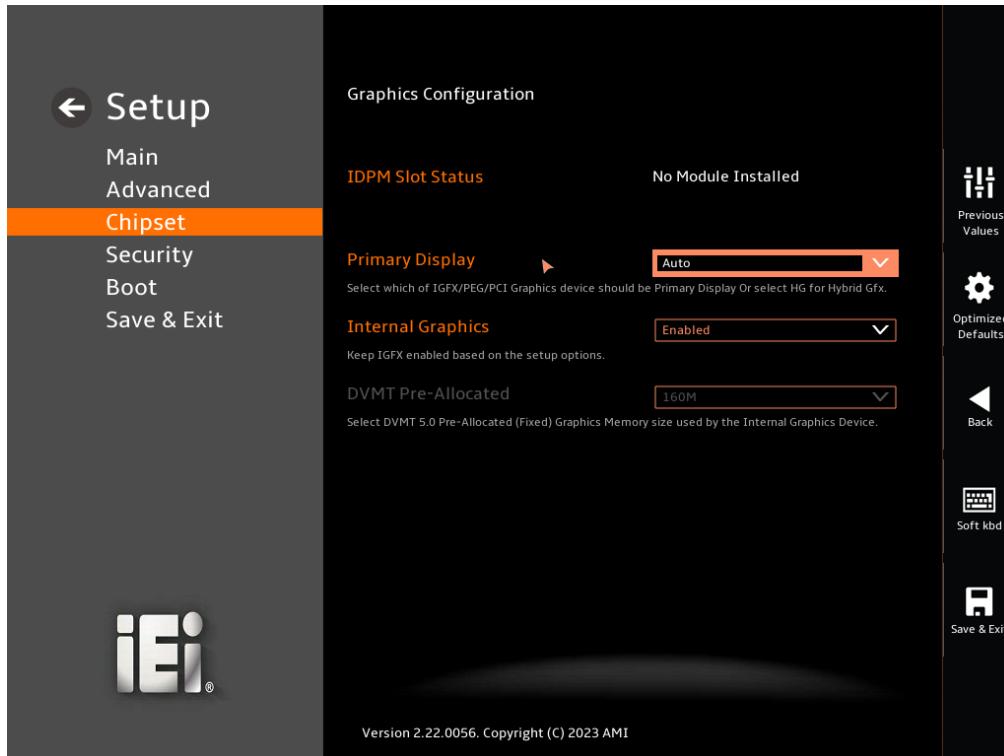

Use the **Memory Configuration** submenu (**BIOS Menu 20**) to view memory information.

BIOS Menu 20: Memory Configuration

5.4.1.2 Graphics Configuration

Use the **Graphics Configuration (BIOS Menu 21)** menu to configure the video device connected to the system.

BIOS Menu 21: Graphics Configuration

→ Primary Display [Auto]

Use the **Primary Display** option to select the primary graphics controller the system uses.

The following options are available:

- Auto **Default**
- IGFX
- PEG
- PCI

→ Internal Graphics [Enabled]

Use the **Internal Graphics** option to configure whether to keep IGFX enabled. If user wants to support dual display by internal graphics and external graphics, this Internal Graphics

option should be set to Enabled and the above Primary Display option should be set to IGFX.

- ➔ **Auto** Auto mode
- ➔ **Disabled** Disables IGFX.
- ➔ **Enabled** **Default** Enables IGFX.

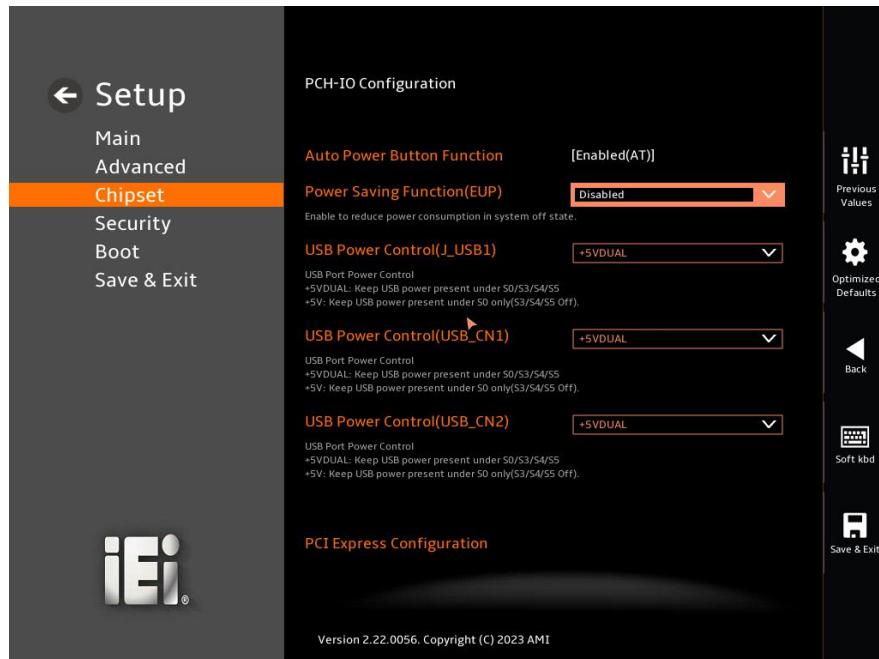

➔ **DVMT Pre-Allocated [160M]**

Use the **DVMT Pre-Allocated** option to set the amount of system memory allocated to the integrated graphics processor when the system boots. The system memory allocated can then only be used as graphics memory, and is no longer available to applications or the operating system. Configuration options are listed below:

- 80M
- 160M **Default**

5.4.2 PCH-IO Configuration

Use the **PCH-IO Configuration** menu to configure the PCH parameters.

BIOS Menu 22: PCH-IO Configuration (1/2)

BIOS Menu 23: PCH-IO Configuration (1/2)

→ **Auto Power Button Function [Enabled(AT)]**

Use the **Auto Power Button Function** BIOS option to show the power mode state. Use the **J_ATX_AT1** to switch the AT/ATX power mode.

- **Enabled (AT)** The system power mode is AT.
- **Disabled (ATX)** The system power mode is ATX.

→ **Power Saving Function(EUP) [Disabled]**

Use the **Power Saving Function(EUP)** BIOS option to enable or disable the power saving function.

- **Disabled** **DEFAULT** Power saving function is disabled.
- **Enabled** Power saving function is enabled. It will reduce power consumption when the system is off.

→ **USB Power Control (J_USB1) [+5V DUAL]**

Use the **USB Power Control** BIOS option to configure the USB power source for the corresponding USB connectors (**Figure 5-2**).

- **+5V DUAL** **DEFAULT** Sets the USB power source to +5V dual
- **+5V** Sets the USB power source to +5V

→ **USB Power Control (USB_CN1) [+5V DUAL]**

Use the **USB Power Control** BIOS option to configure the USB power source for the corresponding USB connectors (**Figure 5-2**).

- **+5V DUAL** **DEFAULT** Sets the USB power source to +5V dual
- **+5V** Sets the USB power source to +5V

→ **USB Power SW2 (USB_CN2) [+5V DUAL]**

Use the **USB Power SW2** BIOS option to configure the USB power source for the corresponding USB connectors (Figure 5-2).

WAFER-ADL-N SBC

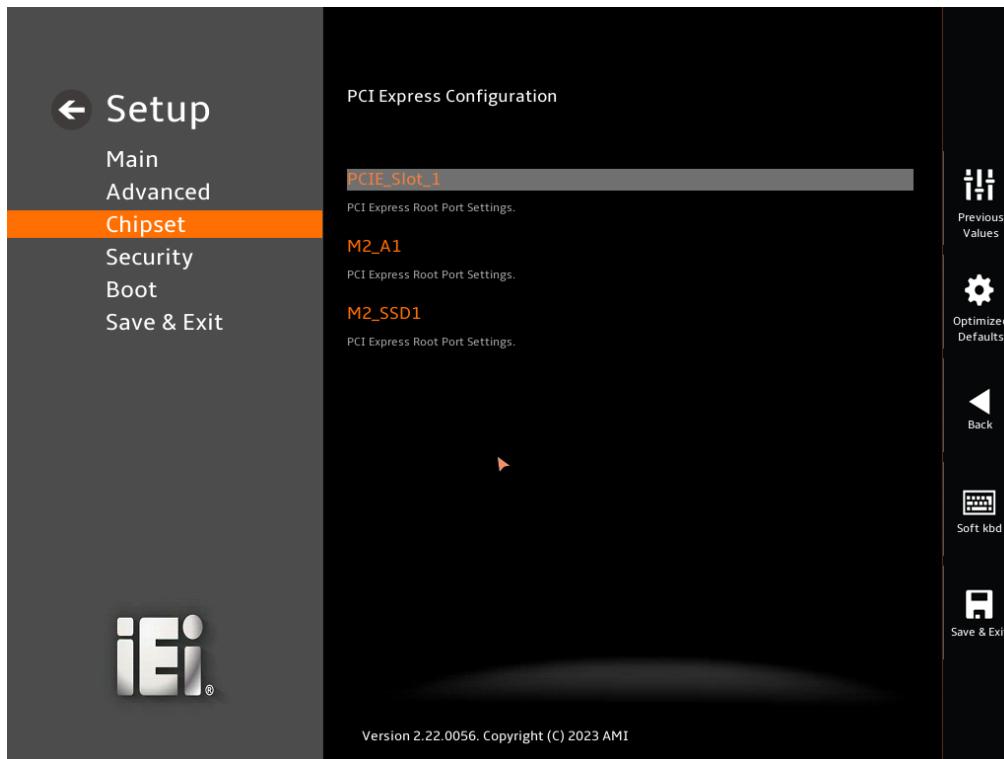

- ➔ +5V DUAL DEFAULT Sets the USB power source to +5V dual
- ➔ +5V Sets the USB power source to +5V

BIOS Options	Configured USB Ports
USB Power Control (J_USB1)	J_USB1 (external USB 3.2 Gen 2 ports)
USB Power Control (USB_CN1)	USB_CN1 (external USB 2.0 ports)
USB Power Control (USB_CN2)	USB_CN2 (internal USB 2.0 ports)

Figure 5-2: BIOS Options and Configured USB Ports

5.4.2.1 PCI Express Configuration

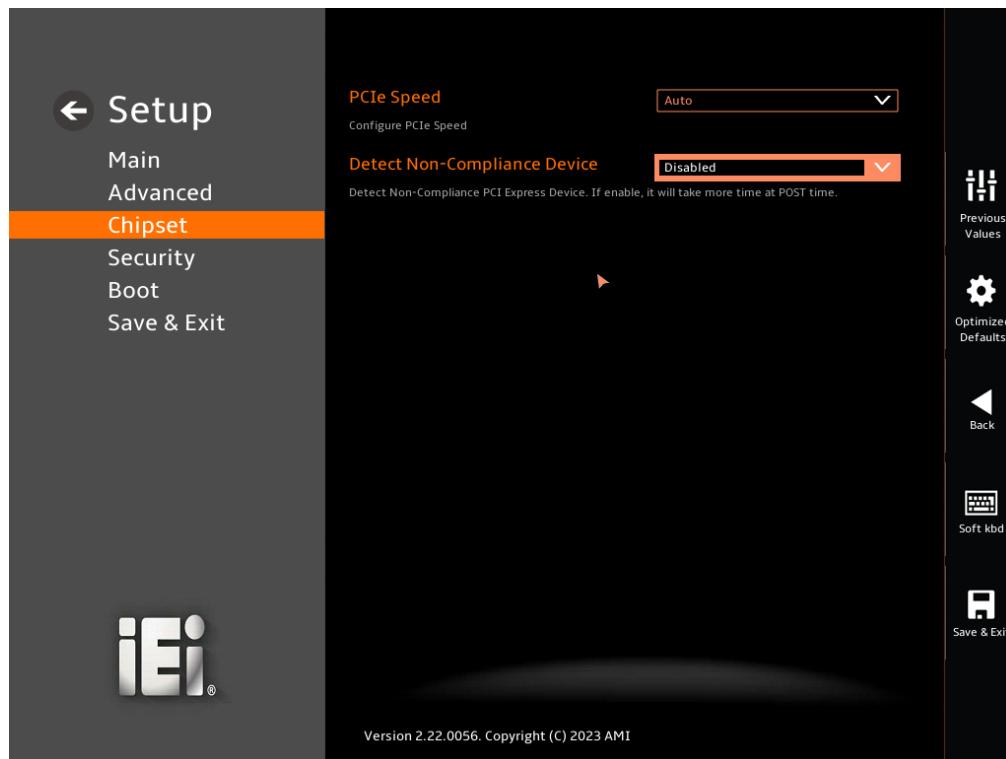

Use the **PCI Express Configuration** submenu (**BIOS Menu 24**) to configure the PCI Express slots.

BIOS Menu 24: PCI Express Configuration

5.4.2.1.1 PCIe Root Port Setting

Use the **PCIE_Slot_1, M2_A1 Slot, M2_SSD1 Slot** submenu (**BIOS Menu 25**) to configure the PCI Root Port Setting.

BIOS Menu 25: PCIe Slot Configuration Submenu

→ PCIe Speed [Auto]

Use the **PCIe Speed** option to specify the PCI Express port speed. Configuration options are listed below.

- | | | |
|---------------|----------------|-------------------------------|
| → Auto | DEFAULT | Auto mode. |
| → Gen1 | | Configure PCIe Speed to Gen1. |
| → Gen2 | | Configure PCIe Speed to Gen2. |
| → Gen3 | | Configure PCIe Speed to Gen3. |

WAFER-ADL-N SBC

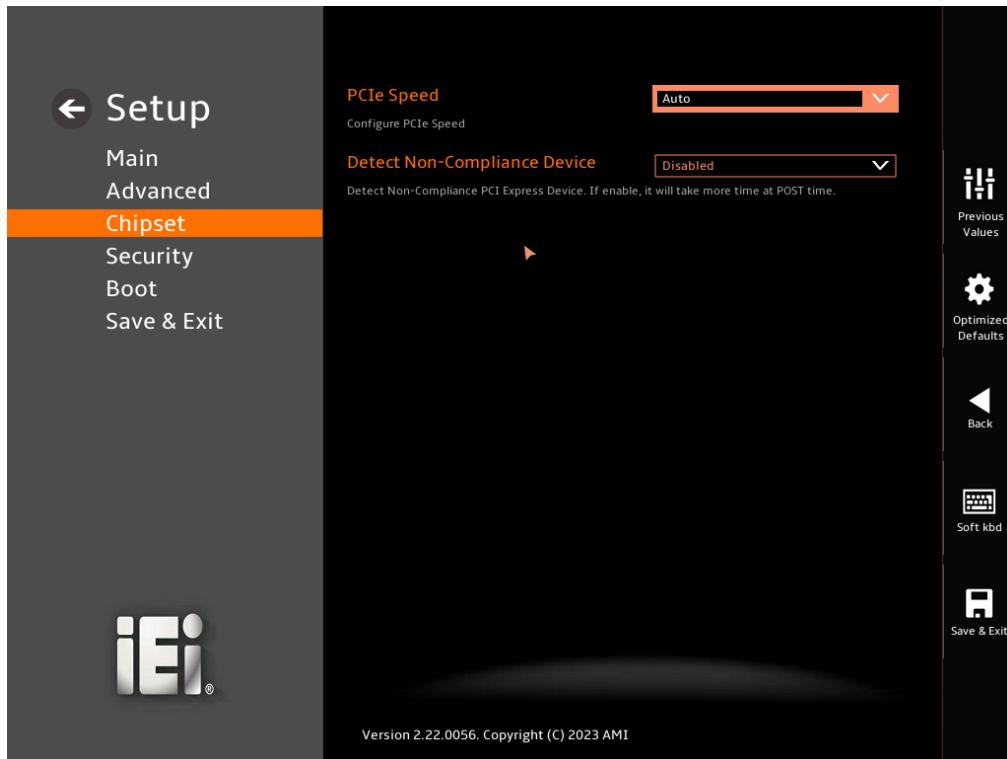

→ Detect Non-Compliance Device [Disabled]

Use the **Detect Non-Compliance Device** option to configure whether to detect if a non-compliance PCI Express device is connected to the PCI Express port.

- | | | |
|-------------------|----------------|--|
| → Disabled | DEFAULT | Do not detect if a non-compliance PCI Express device is connected to the PCI Express port. |
| → Enabled | | Detect if a non-compliance PCI Express device is connected to the PCI Express port. |

5.4.2.1.2 M2_A1 Slot

Use the **M2_A1** menu (**BIOS Menu 26**) to change and/or set the configuration of the SATA devices installed in the system.

**BIOS Menu 26: M.2 A KEY**

→ PCIe Speed [Auto]

Use the **PCIe Speed** option to specify the PCI Express port speed. Configuration options are listed below.

- ➔ **Auto** **DEFAULT** Auto mode.
- ➔ **Gen1** Configure PCIe Speed to Gen1.
- ➔ **Gen2** Configure PCIe Speed to Gen2.
- ➔ **Gen3** Configure PCIe Speed to Gen3.

➔ **Detect Non-Compliance Device [Disabled]**

Use the **Detect Non-Compliance Device** option to configure whether to detect if a non-compliance PCI Express device is connected to the PCI Express port.

- ➔ **Disabled** **DEFAULT** Do not detect if a non-compliance PCI Express device is connected to the PCI Express port.
- ➔ **Enabled** Detect if a non-compliance PCI Express device is connected to the PCI Express port.

5.4.2.1.3 M2_SSD1 Slot

Use the **M2_SSD1** menu (**BIOS Menu 27**) to change and/or set the configuration of the SATA devices installed in the system.

BIOS Menu 27: M.2 M KEY

→ PCIe Speed [Auto]

Use the **PCIe Speed** option to specify the PCI Express port speed. Configuration options are listed below.

- | | | |
|---------------|----------------|-------------------------------|
| → Auto | DEFAULT | Auto mode. |
| → Gen1 | | Configure PCIe Speed to Gen1. |
| → Gen2 | | Configure PCIe Speed to Gen2. |
| → Gen3 | | Configure PCIe Speed to Gen3. |

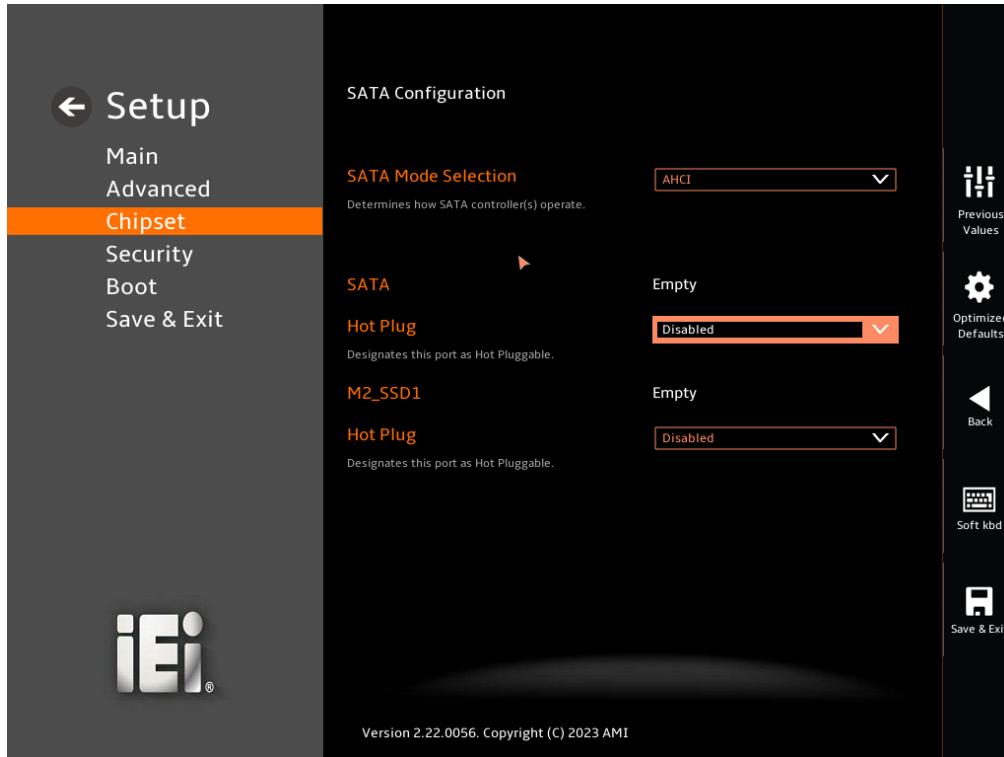

→ Detect Non-Compliance Device [Disabled]

Use the **Detect Non-Compliance Device** option to configure whether to detect if a non-compliance PCI Express device is connected to the PCI Express port.

- | | |
|--------------------------|---|
| <p>→ Disabled</p> | <p>DEFAULT</p> <p>Do not detect if a non-compliance PCI Express device is connected to the PCI Express port.</p> |
| <p>→ Enabled</p> | <p>Detect if a non-compliance PCI Express device is connected to the PCI Express port.</p> |

5.4.2.2 SATA Configuration

Use the **SATA Configuration** menu (**BIOS Menu 28**) to change and/or set the configuration of the SATA devices installed in the system.

BIOS Menu 28: SATA Configuration

→ **SATA Controller(s) [Enabled]**

Use the **SATA Controller(s)** option to configure the SATA controller(s).

WAFER-ADL-N SBC

- ➔ **Enabled** **DEFAULT** Enables the on-board SATA controller(s).
- ➔ **Disabled** Disables the on-board SATA controller(s).

➔ **SATA Mode Selection [AHCI]**

Use the **SATA Mode Selection** option to determine how the SATA devices operate.

- ➔ **AHCI** **DEFAULT** Configures SATA devices as AHCI device.
- ➔ **Intel RST Premium With Intel Optane System Acceleration** Configures SATA devices to the Intel RST Premium With Intel Optane System Acceleration mode.

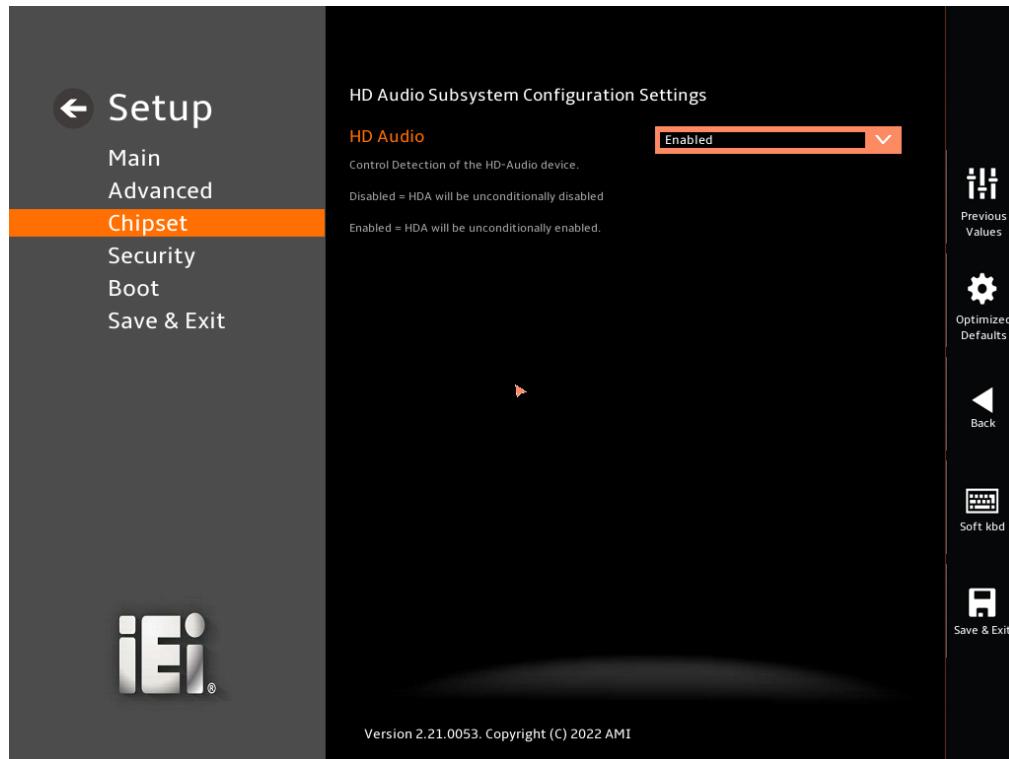

➔ **Hot Plug [Disabled]**

Use the **Hot Plug** option (for S_ATA1 and M2_SSD1) to designate the correspondent port as hot-pluggable.

- ➔ **Disabled** **DEFAULT** Disables the hot-pluggable function of the SATA/M.2 M key port.
- ➔ **Enabled** Designates the SATA/M.2 M key port as hot-pluggable.

5.4.2.3 HD Audio Configuration

Use the **HD Audio Configuration** menu (**BIOS Menu 29**) to configure the PCH Azalia settings.

BIOS Menu 29: HD Audio Configuration

→ **HD Audio [Auto]**

Use the **HD Audio** option to enable or disable the High Definition Audio controller.

- **Disabled** The onboard High Definition Audio controller is disabled.
- **Enabled** **DEFAULT** The onboard High Definition Audio controller is enabled.

5.5 Security

Use the **Security** menu (**BIOS Menu 30**) to set system and user passwords.

BIOS Menu 30: Security

→ Administrator Password

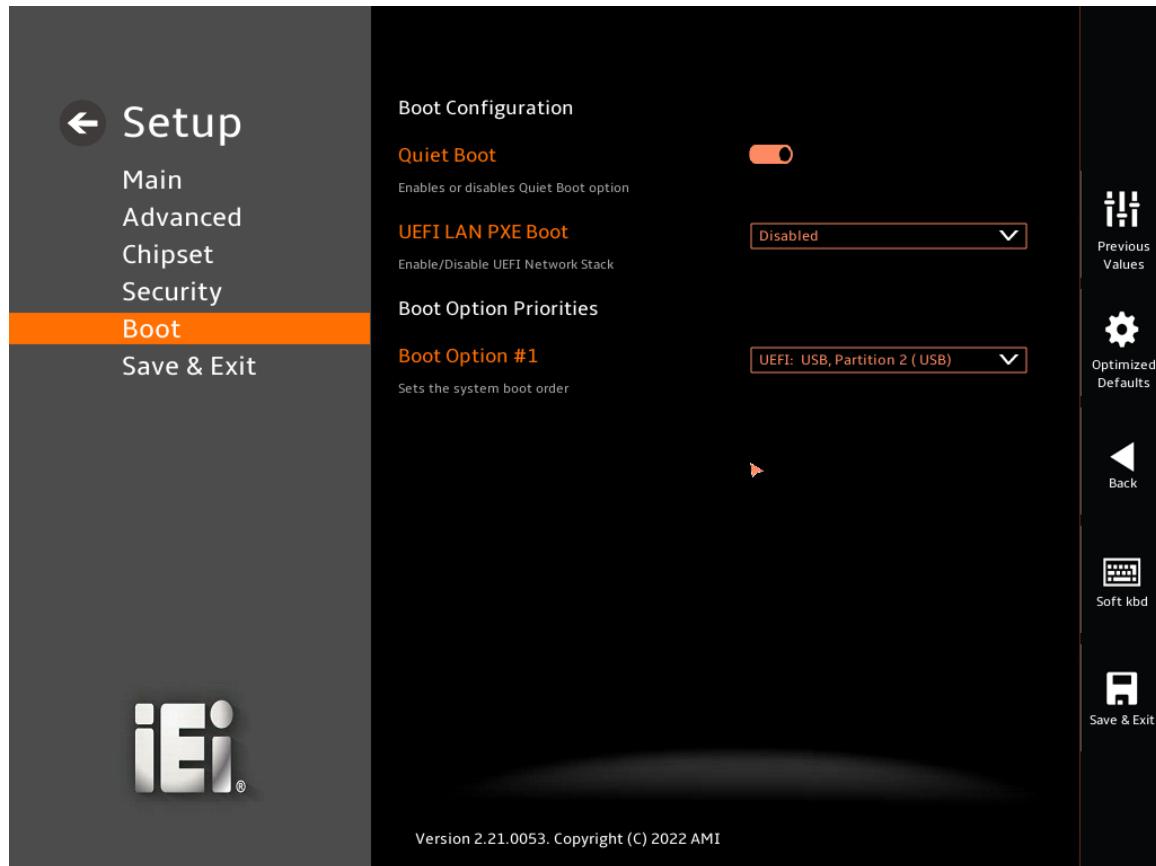

Use the **Administrator Password** to set or change a administrator password.

→ User Password

Use the **User Password** to set or change a user password.

5.6 Boot

Use the **Boot** menu (**BIOS Menu 31**) to configure system boot options.

BIOS Menu 31: Boot

5.6.1 Boot Configuration

→ Quiet Boot [Enabled]

Use the **Quiet Boot** BIOS option to select the screen display when the system boots.

→ **Disabled** Normal POST messages displayed

→ **Enabled** **DEFAULT** OEM Logo displayed instead of POST messages

5.6.2 Boot Option Priorities

Use the Boot Option # N to choose the system boots from the peripherals you selected
The following Boot Options are listed as an example.

→ **Boot Option #1**

Sets the system boot order **ADATA SP580** as the first priority.

- **Windows Boot Manager (P1: ADATA SSD SP580 240GB)**
- **Disabled**

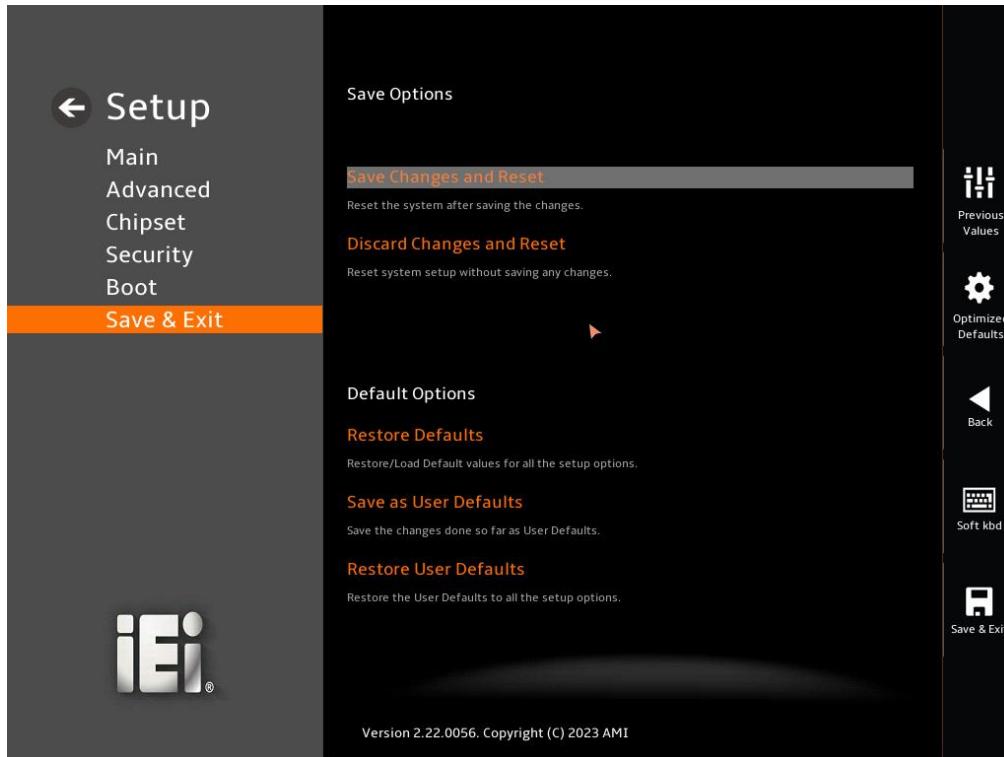

→ **Boot Option #2**

Sets the system boot order **USB Partition 1** as the second priority.

- **UEFI: USB, Partition 1**
- **Disabled**

5.7 Save & Exit

Use the **Save & Exit** menu (**BIOS Menu 32**) to load default BIOS values, optimal failsafe values and to save configuration changes.

BIOS Menu 32: Save & Exit

→ Save Changes and Reset

Use the **Save Changes and Reset** option to save the changes made to the BIOS options and reset the system.

→ Discard Changes and Reset

Use the **Discard Changes and Reset** option to exit the system without saving the changes made to the BIOS configuration setup program.

→ Restore Defaults

Use the **Restore Defaults** option to load the optimal default values for each of the parameters on the Setup menus. **F3 key can be used for this operation.**

WAFER-ADL-N SBC

→ Save as User Defaults

Use the **Save as User Defaults** option to save the changes done so far as user defaults.

→ Restore User Defaults

Use the **Restore User Defaults** option to restore the user defaults to all the setup options.

Appendix

A

Regulatory Compliance

DECLARATION OF CONFORMITY

This equipment has been tested and found to comply with specifications for CE marking. If the user modifies and/or installs other devices in the equipment, the CE conformity declaration may no longer apply.

FCC WARNING

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Appendix

B

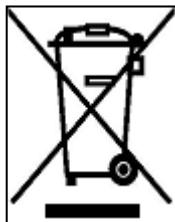

Product Disposal

**CAUTION:**

Risk of explosion if battery is replaced by an incorrect type. Only certified engineers should replace the on-board battery.

Dispose of used batteries according to instructions and local regulations.

- Outside the European Union—If you wish to dispose of used electrical and electronic products outside the European Union, please contact your local authority so as to comply with the correct disposal method.
- Within the European Union—The device that produces less waste and is easier to recycle is classified as electronic device in terms of the European Directive 2012/19/EU (WEEE), and must not be disposed of as domestic garbage.

EU-wide legislation, as implemented in each Member State, requires that waste electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes monitors and electrical accessories, such as signal cables or power cords. When you need to dispose of your device, please follow the guidance of your local authority, or ask the shop where you purchased the product. The mark on electrical and electronic products only applies to the current European Union Member States.

Please follow the national guidelines for electrical and electronic product disposal.

Appendix

C

BIOS Options

WAFER-ADL-N SBC

Below is a list of BIOS configuration options in the BIOS chapter.

→ BIOS Information	67
→ Compute Die Information	67
→ PCH Information.....	68
→ System Date [xx/xx/xx]	68
→ System Time [xx:xx:xx]	68
→ Intel (VMX) Virtualization Technology [Enabled]	71
→ Active Processor Cores [All]	71
→ Intel® Speedstep [Enable]	72
→ C states [Disabled].....	72
→ Turbo Mode [Enabled]	72
→ Power Limit 1.....	72
→ Power Limit 1 Time Window	73
→ Power Limit 2.....	73
→ TPM Support [Enable]	74
→ Pending Operation [None]	74
→ Auto Recovery Function [Enable]	75
→ Watch dog Timer (Seconds)	75
→ Watch dog Counter.....	75
→ Wake system with Fixed Time [Disable].....	77
→ Serial Port [Enabled].....	78
→ Device Settings	78
→ Device Mode	79
→ Serial Port [Enabled].....	79
→ Device Settings	80
→ Device Mode	80
→ PC Health Status	81
→ Tcc Activation Offset [0].....	82
→ CPU_FAN1 Smart Fan Control [Auto Mode]	83
→ CPU_FAN1 Hysteresis Temp.High	84
→ CPU_FAN Off Hysteresis Temp.Low.....	84
→ CPU_FAN1 Normal Duty.....	84
→ Console Redirection [Disabled].....	85
→ Terminal Type [ANSI].....	86

→ Bits per second [115200].....	87
→ Data Bits [8]	87
→ Parity [None].....	87
→ Stop Bits [1].....	88
→ VT-d [Enabled].....	91
→ Primary Display [Auto]	93
→ Internal Graphics [Enabled].....	93
→ DVMT Pre-Allocated [160M]	94
→ Auto Power Button Function [Enabled(AT)]	96
→ Power Saving Function(EUP) [Disabled].....	96
→ USB Power Control (J_USB1) [+5V DUAL].....	96
→ USB Power Control (USB_CN1) [+5V DUAL]	96
→ USB Power SW2 (USB_CN2) [+5V DUAL].....	96
→ PCIe Speed [Auto].....	98
→ Detect Non-Compliance Device [Disabled]	99
→ PCIe Speed [Auto].....	99
→ Detect Non-Compliance Device [Disabled]	100
→ PCIe Speed [Auto].....	101
→ Detect Non-Compliance Device [Disabled]	102
→ SATA Controller(s) [Enabled]	102
→ SATA Mode Selection [AHCI].....	103
→ Hot Plug [Disabled].....	103
→ HD Audio [Auto]	104
→ Administrator Password	105
→ User Password	105
→ Quiet Boot [Enabled]	106
→ Boot Option #1	107
→ Boot Option #2	107
→ Save Changes and Reset	108
→ Discard Changes and Reset	108
→ Restore Defaults	108
→ Save as User Defaults	109
→ Restore User Defaults	109

Appendix

D

Watchdog Timer

**NOTE:**

The following discussion applies to DOS environment. Contact IEI support or visit the IEI website for specific drivers for other operating systems.

The Watchdog Timer is provided to ensure that standalone systems can always recover from catastrophic conditions that cause the CPU to crash. This condition may have occurred by external EMIs or a software bug. When the CPU stops working correctly, Watchdog Timer either performs a hardware reset (cold boot) or a Non-Maskable Interrupt (NMI) to bring the system back to a known state.

A BIOS function call (INT 15H) is used to control the Watchdog Timer.

INT 15H:

AH – 6FH Sub-function:	
AL – 2:	Sets the Watchdog Timer's period.
BL:	Time-out value (Its unit-second is dependent on the item "Watchdog Timer unit select" in CMOS setup).

Table D-1: AH-6FH Sub-function

Call sub-function 2 to set the time-out period of Watchdog Timer first. If the time-out value is not zero, the Watchdog Timer starts counting down. When the timer value reaches zero, the system resets. To ensure that this reset condition does not occur, calling sub-function 2 must periodically refresh the Watchdog Timer. However, the watchdog timer is disabled if the time-out value is set to zero.

A tolerance of at least 10% must be maintained to avoid unknown routines within the operating system (DOS), such as disk I/O that can be very time-consuming.

**NOTE:**

When exiting a program it is necessary to disable the Watchdog Timer, otherwise the system resets.

EXAMPLE PROGRAM:

```
; INITIAL TIMER PERIOD COUNTER

;

W_LOOP:
;

    MOV      AX, 6F02H      ;setting the time-out value
    MOV      BL, 30          ;time-out value is 48 seconds
    INT      15H

;

; ADD THE APPLICATION PROGRAM HERE
;

    CMP      EXIT_AP, 1      ;is the application over?
    JNE      W_LOOP          ;No, restart the application

    MOV      AX, 6F02H      ;disable Watchdog Timer
    MOV      BL, 0           ;
    INT      15H

;

; EXIT ;
```

Appendix

E

Error Beep Code

E.1 PEI Beep Codes

Number of Beeps	Description
4	Memory not Installed
1	Memory was installed twice (InstallPeiMemory routine in PEI Core called twice)
2	Recovery started
3	DXE IPL was not found
3	DXE Core Firmware Volume was not found
4	Recovery failed
4	S3 Resume failed
7	Reset PPI is not available

E.2 DXE Beep Codes

Number of Beeps	Description
1	Invalid password
4	Some of the Architectural Protocols are not available
5	No Console Output Devices are found
5	No Console Input Devices are found
6	Flash update is failed
7	Reset protocol is not available
8	Platform PCI resource requirements cannot be met

NOTE:

If you have any question, please contact IEI for further assistance.

Appendix

F

Hazardous Materials Disclosure

F.1 RoHS II Directive (2015/863/EU)

The details provided in this appendix are to ensure that the product is compliant with the RoHS II Directive (2015/863/EU). The table below acknowledges the presences of small quantities of certain substances in the product, and is applicable to RoHS II Directive (2015/863/EU).

Please refer to the following table.

Part Name	Toxic or Hazardous Substances and Elements										
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated Biphenyls	Polybrominated Diphenyl Ethers	Bis(2-Ethylhexyl) Phthalate	Butyl benzyl phthalate (BBP)	Dibutyl phthalate (DBP)	Diisobutyl phthalate (DIBP)	
Housing	O	O	O	O	O	O	O	O	O	O	
Printed Circuit Board	O	O	O	O	O	O	O	O	O	O	
Metal Fasteners	O	O	O	O	O	O	O	O	O	O	
Cable Assembly	O	O	O	O	O	O	O	O	O	O	
Fan Assembly	O	O	O	O	O	O	O	O	O	O	
Power Supply Assemblies	O	O	O	O	O	O	O	O	O	O	
Battery	O	O	O	O	O	O	O	O	O	O	
O: This toxic or hazardous substance is contained in all of the homogeneous materials for the part is below the limit requirement in Directive (EU) 2015/863. X: This toxic or hazardous substance is contained in at least one of the homogeneous materials for this part is above the limit requirement in Directive (EU) 2015/863.											

F.2 China RoHS

此附件旨在确保本产品符合中国 RoHS 标准。以下表格标示此产品中某有毒物质的含量符合中国 RoHS 标准规定的限量要求。

本产品上会附有“环境友好使用期限”的标签，此期限是估算这些物质“不会有泄漏或突变”的年限。本产品可能包含有较短的环境友好使用期限的可替换元件，像是电池或灯管，这些元件将会单独标示出来。

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
壳体	O	O	O	O	O	O
印刷电路板	O	O	O	O	O	O
金属螺帽	O	O	O	O	O	O
电缆组装	O	O	O	O	O	O
风扇组装	O	O	O	O	O	O
电力供应组装	O	O	O	O	O	O
电池	O	O	O	O	O	O

O: 表示该有毒有害物质在该部件所有物质材料中的含量均在 SJ/T11364-2014 與 GB/T26572-2011 标准规定的限量要求以下。

X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T11364-2014 與 GB/T26572-2011 标准规定的限量要求。
